Selling Destinations Geography For The Travel Professional:

Selling Destinations: Geography for the Travel Professional Marc Mancini, 2012 This special 5th Canadian edition of the bestselling *Selling Destinations Geography for the Travel Professional* offers a fresh approach to destination geography. It argues that geography provides the foundation for the entire travel tourism and hospitality industries and that travel professionals need to know not just the facts about places but also how to sell them to the traveling public. *Selling Destinations* features in-depth exploration of the nations, regions, and cities that Canadian travelers favor most. Sales and marketing factors such as visitor profiles, their preferences, motivations, and misgivings, as well as other sales and marketing considerations. Hundreds of photos, maps, charts, and graphics that help organize the content for the reader and make geography come alive. Detailed information on climate, attractions, transportation, sample itineraries, and cultural patterns. Mini case studies, map exercises, and creative activities that pull together each chapter's content to create an interactive and entertaining learning experience. A style that is relaxed, informal, and enjoyable, not unlike a leisure vacation itself. **Selling**

Destinations Marc Mancini, 1999 Recognizing that geography is something the travel industry sells, this text provides students with aspects about different places that enable the students to effectively match clients and destinations. Students will have exposure to maps of cities and areas most frequented by tourists, geographic facts about major destinations, and other details that enhance the book's sales geography philosophy. **Selling Destinations** Marc Mancini, 2004 *Selling Destinations* is the resource no student or travel professional from any sector of the industry will want to do without. The author's sales geography philosophy is supported by essential information on major tourist destinations around the world, as well as lesser-known hot spots. The author uses more than 300 maps, graphs, and other visual aids to give the reader a wealth of information about location, selection, modes of travel to and around the desired area, climate, cultural patterns, lodging options, day trips, attractions, and allied destinations. Each chapter closes with a map activity testing knowledge of geographic locations and their attractions, a case study to apply the knowledge learned to hypothetical travelers, and a creative activity that challenges the reader to find an innovative solution to a hypothetical situation.
