Lyme Disease and the SS Elbrus updated 2011 , Lyme Disease and the Ss Elbrus Rachel Verdon,2012-03-09
Lyme Disease and the SS Elbrus is a WWII history of the Soviet Union s fur shipping industry Lend Lease and the subsequent suspect infestation of Lyme Disease at four major port sites in America Nazi Germany and the Soviet Union s secret military industrial complex began in 1926 and lasted long after the Capitulation Newly declassified historical records point to the Soviet Union s double crossing its Western Allies The Communists long range plans with the Nazis to overthrow democracies from within through tick borne diseases of the nervous system and doping the belligerents intensified during the Cold War After all we cannot run a democracy on drug addicts As our US Health Department remained silent for over half a century on the advancement of these tick borne plagues the American Intelligence Community opened the doors to Nazi Paperclip scientists and Dragon Returnees from Russia With Love to fight the Cold War totally compromising our national security By 1951 Congress passed the Trade Agreements Extension Act banning shipments of Russian and Chinese furs too little too late Here lies the explanation for an onslaught of global drug trafficking from the Golden Triangle to the ODESSA drug cartel We seek a witness to the Soviet Union s military industrial collaboration with Nazis before during and after WWII Who was I G Farben chemist Dr Henry Tolkmith Was his identity switched with the infamous Auschwitz Angel of Death Dr Josef Mengele both an expert in poison gas and tick borne plagues his expertise highly coveted both East and West This author is asking historical witnesses to come forth and solve the mystery of Lyme Disease and the SS Elbrus **Murder by Madness 9/11** Rachel Verdon,2012-02-02 Murder By Madness 9 11 is not just the history of the most notorious attack upon American shores it is a banking caper Just who are the financiers of terrorism As always follow the money *Double Agent Balloon* David Tremain,2023-05-04 Dickie Metcalfe was not your typical secret agent but he was larger than life in more ways than one Unlike many other agents who were part of the Double Cross System during the Second World War he did not defect nor was he blackmailed into becoming a spy Instead using his father s connection with Sir Vernon Kell the first Director of MI5 Metcalfe volunteered his services Recently cashiered from his infantry regiment he had an ulterior motive by supplying MI5 with tidbits of information about weapons and arms deals in his newfound profession as an arms dealer he hoped they would be able to help him get his commission reinstated Metcalfe became BALLOON a sub agent of double agent TRICYCLE s Yugoslav spy ring Concurrent with his spying activities he collaborated with the co inventor of the Bren gun to develop a new submachine gun for British forces After the war he was also a celebrated motor racing driver and continued to compete until shortly before his death His success as a double cross agent in the eyes of both his masters British and German is examined in this book using official documents as a primary source *World Travel Guide* Columbus Publishing Ltd,Marie Peyre,2005 With E World guide CD [Books in Print Supplement](#) ,2002 **Books In Print 2004-2005** Ed Bowker Staff,Staff Bowker, Ed,2004 *Monthly Index of Russian Accessions* Library of Congress. Liegner, 2015-10-08 Following completion of his medical training and a one year stint as attending physician on Howard Champion's Surgical Critical Care Service and MedStar Unit at Washington Hospital Center in the District of Columbia Kenneth Liegner M D returned to Westchester County home of his Alma Mater New York Medical College to start a private practice Unwittingly he had plunked himself down in the heart of a burgeoning epidemic of Lyme disease His patients confronted him with puzzling syndromes that defied tidy formulations of the illness and thrust him in to a Maelstrom of medical controversy Lyme disease a new poorly understood disease emerged hand in hand with the rise managed care Physicians caring for persons with Lyme disease loyal to the Hippocratic Oath and serving what they saw as patients best medical interests found themselves on a collision course with a new Corporate Medical Ethic dedicated to maximizing profit One practitioner's work over 25 years is presented here along with correspondence with many principals in the field Documentational in nature and not written as a narrative the materials nonetheless convey the intensity of the struggle to characterize the nature of Lyme disease and the desperate fight for proper diagnosis and treatment upon the outcome of which patients very lives depended The volume includes protocols useful as reference materials for patients and practitioners alike as well as photographic images of many persons important in the history of Lyme disease Foreword by Pam Weintraub Senior Editor of aeon digital magazine and author of award winning book *Cure Unknown Inside the Lyme Epidemic* Preface by Paul W Ewald Professor of Evolutionary Biology at the University of Louisville and author of *Plague Time* *Lyme Disease* Gail B. Stewart, 2003 Discusses the history symptoms diagnosis and treatment of Lyme disease current research into cures and the challenges of living with the disease *Lyme Disease: Recent Advances and Perspectives* Tanja Petnicki-Ocwieja, Catherine A. Brissette, 2015-08-08 The interplay between host and pathogen is a complex co evolutionary battle of surveillance and evasion The pathogen continuously develops mechanisms to subvert the immune response in order to establish infection while the immune system responds with novel mechanisms of detection Because the majority of Lyme disease pathology is due to an over exuberant immune response much research in *Borrelia burgdorferi* pathogenesis has been devoted to understanding the mammalian host response to the bacterium Immunological studies continue to be an active area of research employing emerging techniques such as intra vital imaging These studies have furthered our understanding of inflammatory processes during long term infection and provided some surprising insights such as the continued presence of bacterial products after clearance The field of Lyme disease has long debated the etiology of long term inflammation and recent studies in the murine host have shed light on relevant cell types and inflammatory

mediators that participate in the pathology of Lyme arthritis Live imaging and bioluminescent studies have allowed for a novel view of the bacterial life cycle including the tick mid gut tick to mammal transmission and dissemination throughout a mouse A number of tick and bacterial proteins have been shown to participate in the completion of the enzootic cycle Novel mechanisms of gene regulation are continuously being identified However *B burgdorferi* lacks many traditional virulence factors such as toxins or specialized secretion systems Many genes in the *B burgdorferi* genome have no known homolog in other bacteria Therefore studies focusing on host pathogen interactions have therefore been limited by an incomplete understanding of the repertoire of bacterial virulence factors Questions such as how the pathogen causes disease colonizes the tick and evades host immune surveillance have been difficult to address Genetic studies involving single gene deletions have identified a number of important bacterial proteins but a large scale genomics approach to identify virulence factors has not been attempted until recently The generation of a site directed mutagenesis library is an important step towards a detailed analysis of the *B burgdorferi* genome and pathogenome Using this library high throughput genomic studies utilizing techniques such as massively parallel sequencing have been promising and could be used to identify novel virulence determinants of disease in the mammalian host or persistence in the tick vector Continued research on this unique pathogen and its specific interaction with host and vector may have far reaching consequences and provide insights for diverse disciplines including ecology infectious disease and immunology Here several reviews will discuss the most recent advances and future studies to be undertaken in the field of *B burgdorferi* biology
