Just Trying to Have School Natalie G. Adams,James H. Adams,2018-10-09 After the 1954 Brown v Board of Education ruling no state fought longer or harder to preserve segregated schools than Mississippi This massive resistance came to a crashing halt in October 1969 when the Supreme Court ruled in Alexander v Holmes Board of Education that the obligation of every school district is to terminate dual school systems at once and to operate now and hereafter only unitary schools Thirty of the thirty three Mississippi districts named in the case were ordered to open as desegregated schools after Christmas break With little guidance from state officials and no formal training or experience in effective school desegregation processes ordinary people were thrown into extraordinary circumstances However their stories have been largely ignored in desegregation literature Based on meticulous archival research and oral history interviews with over one hundred parents teachers students principals superintendents community leaders and school board members Natalie G Adams and James H Adams explore the arduous and complex task of implementing school desegregation How were bus routes determined Who lost their position as

principal Who was assigned to what classes Without losing sight of the important macro forces in precipitating social change the authors shift attention to how the daily work of just trying to have school helped shape the contours of school desegregation in communities still living with the decisions made fifty years ago *Black Power Encyclopedia* Akinyele Umoja, Karin L. The University of Mississippi: A Sesquicentennial History Sansing, David G.,1999 *Ruling by Other Means* Grzegorz Ekiert,Elizabeth J. Perry,Xiaojun Yan,2020-07-30 What do states gain by sending citizens into the streets *Ruling by Other Means* investigates this question through the lens of State Mobilized Movements SMMs an umbrella concept that includes a range of often covertly organized collective actions intended to advance state interests The SMMs research agenda departs significantly from that of classic social movement and contentious politics theory focused on threats to the state from seemingly autonomous societal actors Existing theories assume that the goal of popular protest is to voice societal grievances represent oppressed groups and challenge state authorities and other powerholders The chapters in this volume show however that states themselves organize citizens sometimes surreptitiously and even transnationally to act collectively to advance state goals Drawn from different historical periods and diverse geographical regions these case studies expand and improve our understanding of social movements civil society and state society relations under authoritarian regimes
