Cinematography Alexander Nevill, 2021-06-01 This book presents three interrelated essays about cinematography which offer a theoretical understanding of the ways that film practitioners orchestrate light in today s post digital context Cinematography is a practice at the heart of film production which traditionally involves the control of light and camera technologies to creatively capture moving imagery During recent years the widespread adoption of digital processes in cinematography has received a good deal of critical attention from practitioners and scholars alike however little specific consideration about evolving lighting practices can be found amongst this discourse Drawing on new materialist ideas actor network theory and the concept of co creativity these essays examine the impact of changing production processes for the role and responsibilities of a cinematographer with a specific focus on lighting Each essay advances a new perspective on the discipline moving from the notion of light as vision to light as material from technology as a tool to technology as a network and from cinematography as an industry to cinematography as a collaborative art **Touch** Laura U. Marks, In Touch Laura U Marks develops a critical approach more tactile than visual an intensely physical and sensuous engagement with works of media art that enriches our understanding and experience of these works and of art itself These critical theoretical and personal essays serve as a guide to developments in nonmainstream media art during the past ten years sexual representation debates documentary ethics the shift from analog to digital media a new social obsession with smell Marks takes up well known artists like experimental filmmaker Ken Jacobs and mysterious animators the Brothers Quay and introduces groundbreaking lesser known film video and digital artists From this emerges a materialist theory an embodied erotic relationship to art and to the world Marks s approach leads to an appreciation of the works mortal bodies film s volatile emulsion video s fragile magnetic base crash prone Net art it also offers a productive alternative to the popular understanding of digital media as virtual and immaterial Weaving a continuous fabric from philosophy fiction science dreams

and intimate experience Touch opens a new world of art media to readers

Media Matter Bernd Herzogenrath, Patricia Pisters, 2017-02-23 Launching Bloomsbury's Thinking Media series Media Matter introduces readers to the nascent field of media philosophy Contributors urge readers to re adjust their ideas of Media Studies by extending the understanding of medium to include a concept of materiality that also includes non human transmitters elements such as water earth fire air and also by understanding media not only in the context of cultural or discursive systems or apparatuses relays transistors hardware or discourse networks but more inclusively in terms of a media ecology Beginning with more general essays on media and then focusing on particular themes neuroplasticity photography sculpture and music especially in relation to film Herzogenrath and the contributors redefine the concept of medium in order to think through media rather than about them

Ruins and Resilience Karel Doing, 2024-07-23 Experimental film practice from an international and transdisciplinary perspective Karel Doing is an experimental filmmaker and researcher who has worked across the globe with fellow artists and filmmakers creating a body of work that is difficult to pinpoint with a simple catchphrase In Ruins and Resilience he weaves autobiographical elements and critical reviews together with his wide ranging interdisciplinary approach reflecting on his own practice by positioning key works within the context of a vibrant experimental film scene in Europe North and South America and Asia Doing demonstrates how experimental filmmakers have continued to renew their practice despite the almost total demise of analog motion picture film and the constant neglect of this art form by institutions and critics Written in a fluent and accessible style the book looks into the connections between the work of groundbreaking artists within the field and subjects such as transgression improvisation collectivity materiality phenomenology and perception Specifically intersections with music and sound are investigated appealing to the idea of the cross modal brain the ability to perceive sounds and images in an integrated way Instead of looking again at the golden era of experimental film the book starts in the 1980s showing how this art form has never ceased to surprise and inspire The author's hands on

engagement with the medium is formational for his more theoretical approach and writing making the book a highly original contribution in the field that is informative and inspiring for academic and practitioners alike

Towards a Film Theory from Below Jiri Anger, 2024-05-30 Operating between film theory media philosophy archival practice and audiovisual research Jiri Anger focuses on the relationship between figuration and materiality in early films experimental found footage cinema and video essays Would it be possible to do film theory from below through the perspective of moving image objects of their multifarious details and facets however marginal unintentional or aleatory they might be Could we treat scratches stains and shakes in archival footage as speculatively and aesthetically generative features Do these material actors have the capacity to create weird shapes within the figurative image that decenter distort and transform the existing conceptual and methodological frameworks Building on his theoretical as well as practical experience with the recently digitized corpus of the first Czech films created by Jan Kr eneck between 1898 and 1911 the author demonstrates how technological defects and accidents in archival films shape their aesthetic function and our understanding of the materiality of film in the digital age The specific clashes between the figurative and material spheres are understood through the concept of a crack up This term developed by Francis Scott Fitzgerald and theoretically reimaged by Gilles Deleuze allows us to capture the convoluted relationship between figuration and materiality as inherent to the medium of film containing negativity and productivity difference and simultaneity contingency and fate at the same time even within the tiniest cinematic units

After

Uniqueness Erika Balsom, 2017-03-21 Images have never been as freely circulated as they are today They have also never been so tightly controlled As with the birth of photography digital reproduction has created new possibilities for the duplication and consumption of images offering greater dissemination and access But digital reproduction has also stoked new anxieties concerning authenticity and ownership From this contemporary vantage point After Uniqueness traces the ambivalence of reproducibility through the intersecting histories of experimental cinema and the moving image in art examining how artists filmmakers and theorists have found in the copy a utopian promise or a dangerous inauthenticity or both at once From the sale of film in limited editions on the art market to the downloading of bootlegs from the singularity of live cinema to video art broadcast on television Erika Balsom investigates how the reproducibility of the moving image has been embraced rejected and negotiated by major figures including Stan Brakhage Leo Castelli and Gregory Markopoulos Through a comparative analysis of selected distribution models and key case studies she demonstrates how the question of image circulation is central to the history of film and video art After Uniqueness shows that distribution channels are more than neutral pathways they determine how we encounter interpret and write the history of the moving image as an art form

Too Bold for the Box Office Cynthia J. Miller, 2012-08-02 In *Too Bold for the Box Office* Cynthia J Miller has assembled essays by scholars and filmmakers who examine the unique cinematic form of mockumentary Individually each of these essays looks at a given instance of mockumentary parody and subversion examining the ways in which each calls into

question our assumptions pleasures beliefs and even our senses Writing about national film television and new media traditions as diverse as their backgrounds this volume s contributors explore and theorize the workings of mockumentaries as well as the strategies and motivations of the writers and filmmakers who brought them into being Into the Past William Beard,2010-01-01 Guy Maddin started making films in his back yard and on his kitchen table Now his unique work which relies heavily on such archaic means as black and white small format cinematography and silent film storytelling premieres at major film festivals around the world and is avidly discussed in the critical press Into the Past provides a complete and systematic critical commentary on each of Maddin s feature films and shorts from his 1986 debut film The Dead Father through to his highly successful 2008 full length docu fantasia My Winnipeg William Beard s extensive analysis of Maddin s narrative and aesthetic strategies themes influences and underlying issues also examines the origins and production history of each film Each of Maddin s projects and collaborations showcase his gradual evolution as a filmmaker and his singular development of narrative forms Beard s close readings of these films illuminate among other things the profound ways in which Maddin s art is founded in the past both in the cultural past and in his personal memory **Killer Tapes and Shattered Screens** Caetlin Anne Benson-Allott,2013-02-20 Since the mid 1980s US audiences have watched the majority of movies they see on a video platform be it VHS DVD Blu ray Video On Demand or streaming media Annual video revenues have exceeded box office returns for over twenty five years In short video has become the structuring discourse of US movie culture Killer Tapes and Shattered Screens examines how prerecorded video reframes the premises and promises of motion picture spectatorship But instead of offering a history of video technology or reception Caetlin Benson Allott analyzes how the movies themselves understand and represent the symbiosis of platform and spectator Through case studies and close readings that blend industry history with apparatus theory psychoanalysis with platform studies and production history with postmodern philosophy Killer Tapes and Shattered Screens unearths a genealogy of post cinematic spectatorship in horror movies thrillers and other exploitation genres From Night of the Living Dead 1968 through Paranormal Activity 2009 these movies pursue their spectator from one platform to another adapting to suit new exhibition norms and cultural concerns in the evolution of the video subject
