M John Cage, 1973-03 Mainly mesostics inspired by music mushrooms Marcel Duchamp Merce Cunningham Marshall McLuhan etc and includes Mureau composed from the writings of Henry David Thoreau M. Writings, '67-'72 John Cage, 1983 **Anarchists in the Academy** Dani Spinosa, 2022-08-29 Dani Spinosa takes up anarchism's power as a cultural and artistic ideology rather than as a political philosophy with a persistent emphasis on the common. She demonstrates how postanarchism offers a useful theoretical context for poetry that is not explicitly political specifically for the contemporary experimental poem with its characteristic challenges to subjectivity representation authorial power and conventional constructions of the reader text relationship. Her case studies of sixteen texts make a bold move toward politicizing readers and imbuing literary theory with an activist praxis a sharp hope. This is a provocative volume for those interested in contemporary poetics experimental literatures and the digital humanities. Reading Experimental Writing Colby Georgina Colby, 2019-11-06 Explores the challenges and significance of experimental writing. Offers a forum for reflecting on the significance of avant garde writing for the twenty first century. Explores the way in which contemporary experimental writers engage with socio political issues. Utilizes unpublished archive materials bringing to light a number of previously unpublished works. Includes innovative readings of significant avant garde writers previously neglected in the critical canon. Bringing together internationally leading scholars whose work engages with the continued importance of literary experiment this book takes up the question of reading in the contemporary climate from culturally and linguistically diverse perspectives. New reading practices are both offered and traced in avant garde writers across the twentieth and twenty first centuries including John Cage Kathy Acker Charles Bernstein Erica Hunt Theresa Hak Kyung Cha Rosmarie Waldrop Joan Retallack M NourbeSe Philip Caroline Bergvall Uljana Wolf Samantha Gorman and Dave Jhave Johnston among others. Exploring the socio political significance of literary experiment the book yields new critical approaches to reading avant garde writing. **Poetry on & Off the Page** Marjorie Perloff, 1998 The fourteen essays that make up this collection have as their common theme a reconsideration of the role historical and cultural change has played in the evolution of twentieth century poetry and poetics. Committed to the notion that in John Ashbery's words You can't say it that way anymore Poetry On Off the Page describes the formations and transformations of literary and artistic discourses and traces these discourses as they have evolved in their dialogue with history culture and society. The volume is testimony to the important role that contemporary artistic practice will continue to play as we move into the twenty first century. **I-VI** John Cage, 1997-11-14 Cage's contribution to Harvard's prestigious Norton Lecture Series in 1988-89. More like performances than lectures these six mesostics a complex horizontal arrangement of text to form vertical letter sequences that spell out key

word a kind of meticulously choreographed anarchy in which choice and chance join to redefine the concepts of meaning and meaningfulness

Modern Music and After Paul Griffiths, 2011-02-16 Over three decades Paul Griffiths's survey has remained the definitive study of music since the Second World War this fully revised and updated edition re-establishes *Modern Music and After* as the preeminent introduction to the music of our time The disruptions of the war and the struggles of the ensuing peace were reflected in the music of the time in Pierre Boulez's radical reformation of compositional technique and in John Cage's development of zen music in Milton Babbitt's settling of the serial system and in Dmitry Shostakovich's unsettling symphonies in Karlheinz Stockhausen's development of electronic music and in Luigi Nono's pursuit of the universally human in Iannis Xenakis's view of music as sounding mathematics and in Luciano Berio's consideration of it as language The initiatives of these composers and their contemporaries opened prospects that haven't yet stopped unfolding This constant expansion of musical thinking since 1945 has left us with no singular history of music Griffiths's study accordingly follows several different paths showing how and why they converge and diverge This new edition of *Modern Music and After* discusses not only the music of the fifteen years that have passed since the previous edition but also the recent explosion of scholarly interest in the latter half of the twentieth century In particular the book has been expanded to incorporate the variety of responses to the modernist impasse experienced by composers of the 1980s and 1990s Griffiths then moves the book into the twenty-first century as he examines such highly influential composers as Helmut Lachenmann and Salvatore Sciarrino For its breadth wealth of detail and characteristic wit and clarity the third edition of *Modern Music and After* is required reading for the student and the enquiring listener

CageTalk Peter Dickinson, 2014 John Cage was one of America's most renowned composers from the 1940s until his death in 1992 But he was also a much admired writer and artist and a uniquely attractive personality able to present his ideas engagingly wherever he went As an interview subject he was a consummate professional The main source of *CageTalk* Dialogues with and about John Cage is a panoply of vivid and compulsively readable interviews given to Peter Dickinson in the late 1980s for a BBC Radio 3 documentary The original BBC program lasted an hour but the full discussions with Cage and many of the main figures connected with him were not published until the first edition of this book *CageTalk* also includes earlier BBC interviews with Cage including ones by the renowned literary critic Frank Kermode and art critic David Sylvester And Dickinson the editor of this volume contributes little known source material about Cage's *Musicircus* and *Roaratorio* as well as a substantial introduction exploring the multiple roles that Cage's varied and challenging output played during much of the twentieth century and continues to play in the early twenty-first Apart from the long interview with Cage himself there are discussions with Bonnie Bird Earle Brown Merce Cunningham Minna Lederman Otto Luening Jackson Mac Low Peadar Mercier Pauline Oliveros John Rockwell Kurt Schwertsik Karlheinz Stockhausen Virgil Thomson David Tudor La Monte Young and Paul Zukovsky Most of the interviews were given to Peter Dickinson but there are others involving Rebecca Boyle Anthony Cheevers Michael Oliver

and Roger Smalley Peter Dickinson British composer and pianist is Emeritus Professor University of Keele and University of London and has written or edited several books about twentieth century music including Copland Connnotations Boydell Press 2002 and The Music of Lennox Berkeley Boydell Press 2003

Silencing the Sounded Self Christopher Shultis, 2013-11-05 Christopher Shultis observes an intriguing contrast between John Cage's affinity for Thoreau and fellow composer Charles Ives connection with Emerson Although both Thoreau and Emerson have been called transcendentalists they held different views about the relationship between nature and humanity and the artist's role in creativity Shultis explores the artist's sounded or silenced selves the self that takes control of the creative experience versus the one that seeks to coexist with it and shows how understanding this distinction allows a better understanding of Cage Having placed Cage in this experimental tradition of music poetry and literature Shultis offers provocative interpretations of Cage's aesthetic views especially as they concern the issue of non intention and addresses some of his most path breaking music as well as several experimentally innovative written works

Reminded by the Instruments You Nakai, Yu Nakai, 2021 David Tudor is remembered today as an extraordinary pianist of post war avant garde music who worked closely with composers like John Cage and Karlheinz Stockhausen and as a founding figure of live electronic music His bold reinterpretation of Cage's Variations II and his idiosyncratic performances using homemade modular instruments inspired a whole generation of musicians But his reticence his unorthodox approaches and the diversity of his creative output which began with the organ and ended with visual art have kept Tudor a puzzle Reminded by the Instruments sets out to solve the puzzle of David Tudor by applying Tudor's own methods for approaching the materials of others to the vast archive of materials that he himself left behind Author You Nakai deftly patches together instruments electronic circuits sketches diagrams recordings letters receipts customs declaration forms and testimonies like modular pieces of a giant puzzle to reveal a new perspective on Tudor's creative process Rejecting the established narrative of Tudor as a performer turned composer this book presents a lively portrait of an artist whose work always merged both of these roles In reading Tudor's electronic devices as musicological texts and examining his dissection of electronic circuits Nakai transcends discourses on sound and illuminates our understanding of the instruments behind the sounds in post war experimental music

Into the Light of Things George J. Leonard, 1995-06-15 When John Cage opened his compositions to chance sounds in the 1950s and Andy Warhol began exhibiting paintings of Brillo boxes in the 1960s the art of the commonplace seemed like something radically even frighteningly new But noting an unprecedented shift around 1800 away from the idealism of Western aesthetics Leonard shows that attacks on the art object as outspoken as any made by twentieth century avant gardists can be found in the works of Wordsworth Ruskin Carlyle Emerson and Whitman From Wordsworth to Cage a certain kind of artist sought to re-orient humanity's devotion from the next world to this one to situate paradise in the simple produce of the common day Enough of Science and Art Wordsworth began his first book of poems Come forth into the light of things Two hundred years later John Cage would tell us We open our eyes and ears seeing life each day excellent as it is This realization no longer needs art By studying artists together with poets Leonard uncovers the rich tradition that links Wordsworth to Cage and illuminates many figures in between Into the Light of Things transforms our understanding of modern culture Jacket **John Cage** Marjorie Perloff, Charles Junkerman, 1994-08 John Cage Composed in America is the first book length work to address the other John Cage a revisionist treatment of the way Cage himself has composed and been composed in America Cage as these original essays testify is a contradictory figure A disciple of Duchamp and Schoenberg Satie and Joyce he created compositions that undercut some of these artists central principles and then attributed his own compositional theories to their tradition An American in the Emerson Thoreau mold he paradoxically won his biggest audience in Europe A freewheeling Californian artist Cage was committed to a severe work ethic and a firm discipline especially the discipline of Zen Buddhism *Heiner Goebbels and Curatorial Composing after Cage* Ed McKeon, 2022-11-24 This Element introduces the notion of curatorial composing to account for certain musical practices that emerged from the 1960s as the founding concepts of music as an art instituted in the modern era were systematically dismantled It raises the key question of how musical value and authority might be produced without recourse to an external principle origin transcendental framework or other foundation It argues that these practices do not dismiss the issue of value or simply relativise it but shift the paradigm to a curatorial concern for composing public encounters and staging events The Element shows that Lydia Goehr's elaboration of the work concept provides a framework that was transformed by John Cage

in his work from 0 00 1962 onwards The Element then introduces Heiner Goebbels practice and focus on his role as Artistic Director of the Ruhrtriennale 2012 14 which it argues was an extension of his curatorial composing The Ashgate Research Companion to Experimental Music James Saunders, 2017-02-03 The recent resurgence of experimental music has given rise to a more divergent range of practices than has previously been the case The Ashgate Research Companion to Experimental Music reflects these recent developments by providing examples of current thinking and presenting detailed case studies that document the work of contemporary figures The book examines fourteen current practitioners by interrogating their artistic practices through annotated interviews contextualized by nine authored chapters which explore central issues that emerge from and inform these discussions Whilst focusing on composition the book also encompasses related aspects of performance improvisation and sonic art The interviews all explore how the selected artists work focusing on the processes involved in developing their recent projects set against more general aesthetic concerns They aim to shed light on the disparate nature of current work whilst seeking to find possible points of contact Many of the practitioners are active in areas that span disciplines such as composition and improvisation and the book explores the interaction of these activities in the context of their work The other chapters consider a range of issues pertinent to recent developments in the genre including definitions of experimentalism and its relationship with a broader avant garde experimentalism and cultural change notation and its effect on composition realising open scores issues of notation and interpretation in live electronic music performing experimental music improvisation and technology improvisation and social meaning instrumentalizing objects visual artists relationships to experimental music working across interdisciplinary boundaries listening and the soundscape working methods techniques and aesthetics of recent experimental music
