departure in the history of town planning because of their planned nature based on the geometrical division of the land. However, other cities of the world also began as planned towns with geometric layouts, so American cities are not unique. Why did the regular grid come to so pervasively characterize American urbanism? Are American cities really so different? The *Syntax of City Space: American Urban Grids* by Mark David Major with Foreword by Ruth Conroy Dalton, co-editor of *Take One Building*, answers these questions and much more by exploring the urban morphology of American cities. It argues that American cities do represent a radical departure in the history of town planning while simultaneously still being subject to the same processes linking the street network and function found in other types of cities around the world. A historical preference for regularity in town planning had a profound influence on American urbanism which endures to this day.

Manning, Richard H. Sullivan, Timothy M. Kipp, 1977 **Nationwide Evaluation of Combined Sewer Overflows and Urban Stormwater Discharges**, 1977 *Research Reporting Series*, 1977 **Urban Form and Life in Tripoli, Libya**

Adel Remali, Huyam Abudib, 2022-10-14 This book charts the city of Tripoli's rapid economic, environmental, and physical transformation, investigating how these new developments have failed to incorporate the cultural and historic values of the urban fabric. As a result, the city is juxtaposed between traditional and modern urban forms. *Urban Form and Life in Tripoli, Libya: Maintaining Cultural Heritage* seeks to address this imbalance and argues for greater understanding of local culture and heritage and how this can be enhanced and preserved in future city developments. It explores the challenges of enabling growth and development to accommodate an increasing population and their changing requirements whilst sustaining the unique cultural and individual characteristics of place. It traces the evolution of urban form and evaluates street quality and life within the city centre of Tripoli, which represents one of the most central, valued, and iconic environments in Libya. It interprets the early urban structure covering the traditional old town and the colonial urban developments which includes the Italian Quarter and the Garden City. Through the case study city, the book presents a wider approach for understanding how design can be informed by a deeper knowledge of the structural mechanisms of evolution and change in built form. It will appeal to academics, researchers, and students interested in urban history, Islamic architecture, and cultural studies. [The Eye in US](#) Charles Curtis Blackwell, 2023-08-10 *The Eye in US* harkens back to the days before gentrification where the characteristics of the predominately Black population in Washington DC seasoned the flavor of the city. *The Eye in US* provides multifarious perspectives on life through the lives of the Blind family who are entangled by the culture, humanity, and misadventures of the nation's capital. Like in the tale of Buffus of the Blind family, a Washington DC resident who, back in 1952, took a notion to shine coins for the United States Treasury Department. There is the tale of Sendus, an ex-baseball player turned bus driver in our nation's capital. Now he's using his strength of will to be on the job every day, making a living despite his crushed dreams. Markus and Candus are working the streets of DC, keeping themselves fierce as they face the hustle and

the story of Minus a postal carrier walking the streets trying to stave off the hassles The tales are tongue in cheek irreverent raw reality which gives a glimpse of US Cirrius Primus Uwinus and those others who take on their own lot in life and make due The Eye in US will compel you to consider a reality where it is US against and in spite of them Arlene Turner Crawford

The Architecture of Survival Erik Trump, Jake Parcell, 2023-09-05 The Architecture of Survival Setting and Politics in Apocalypse Films offers a compelling exploration of how popular films and TV series from the past two decades use architectural spaces to comment on socio political issues The authors harness varied theoretical perspectives to demonstrate how through set design these works suggest that certain kinds of architecture support human development community and freedom while other kinds separate us from our fellow humans and make democratic politics impossible The clean lines of modernist design serve in films such as Contagion and Ex Machina as a metaphor for the sanitized sterile politics that drive disaster In The Walking Dead apocalypse survivors favor traditional architectural styles when rebuilding society a choice that symbolically affirms their democratic principles The massive walls and super gentrification as seen in Elysium and Army of the Dead divide humanity with those on one side wielding illegitimate power Empty streetscapes intensify loneliness alienation and the destruction of civil norms Smart cities offering a blend of high tech surveillance and big data erode social capital and community in Her and Transcendence The book concludes with a somewhat hopeful glimpse into architecture s potential to mitigate the catastrophic adverse effects of climate change as seen in films like Zootopia *Deans and Truants* Gene Andrew Jarrett, 2013-03-01 For a work to be considered African American literature does it need to focus on black characters or political themes Must it represent these within a specific stylistic range Or is it enough for the author to be identified as African American In *Deans and Truants* Gene Andrew Jarrett traces the shifting definitions of African American literature and the authors who wrote beyond those boundaries at the cost of critical dismissal and at times obscurity From the late nineteenth century to the end of the twentieth de facto deans critics and authors as different as William Howells Alain Locke Richard Wright and Amiri Baraka prescribed the shifting parameters of realism and racial subject matter appropriate to authentic African American literature while truant authors such as Paul Laurence Dunbar George S Schuyler Frank Yerby and Toni Morrison perhaps the most celebrated African American author of the twentieth century wrote literature anomalous to those standards Jarrett explores the issues at stake when Howells the Dean of American Letters argues in 1896 that only Dunbar s entirely black verse written in dialect would succeed Three decades later Locke the cultural arbiter of the Harlem Renaissance stands in contrast to Schuyler a journalist and novelist who questions the existence of a peculiarly black or New Negro art Next Wright s 1937 blueprint for African American writing sets the terms of the Chicago Renaissance but Yerby s version of historical romance approaches race and realism in alternative literary ways Finally *Deans and Truants* measures the gravitational pull of the late 1960s Black Aesthetic in Baraka s editorial silence on Toni Morrison s first and only short story *Recitatif* Drawing from a wealth of biographical historical and literary sources
