Modern Vascular Surgery John B. Chang, 2012-12-06 Based on the research and clinical work presented at the Fifth International Symposium Vascular Surgery 1991 this book gathers forty contributions from renowned clinicians and researchers and outstanding young investigators around the world *Current Catalog* National Library of Medicine (U.S.), 1993 First multi year cumulation covers six years 1965 70 **Modern Vascular Surgery, Volume 4** John B. Chang, 1991 *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1990 Sutureless Anastomoses Piergiorgio Tozzi, 2007-05-27 When doctors first look at sutureless anastomosis devices created by new technologies the most frequent comment is how amazingly easy it is to create a vascular anastomosis and as a direct consequence they believe anybody could play the role of the cardiovascular surgeon Pessimistic cardiovascular surgeons on their side think that creating a machine capable of perfectly reproducing their core activity which consists in making an anastomosis will kill their profession Actually no medical specialty's demise has been more often predicted and at the same time more greatly exaggerated than that of cardiovascular surgery According to its detractors ginning in the late 1980s with the angioplasty boom continuing in the mid 1990s with the introduction of bare metal stents and then more recently with the introduction of drug eluting stents cardiovascular surgery has been on life support for nearly 15 years This specialty's claimed collapse has generally been attributed to recent advantages in percutaneous procedures and devices that give the opportunity to non surgeon doctors to accomplish the surgeon's work The reality is different Data suggest that cardiac surgery continues to survive and has not suffered the precipitous decline that was predicted From the economical standpoint CABG is much more of a mature market and the size of the opportunity remains impressive and relatively stable with around 1 500 000 procedures performed annually worldwide at a total cost approaching 2 5 billion US *Textbook of Angiology* Kailash Prasad, John B. Chang, Earl R. Olsen, Bauer E. Sumpio, 2012-12-06 Textbook of Angiology aims to provide the reader with a fully integrated view of medical and surgical aspects of both vascular and cardiovascular disease Covering the complete spectrum of angiology from Basic Physiologic Principles to Phlebology this text is the only one of its kind and will be a must for the libraries of cardiologists and cardiovascular surgeons alike *Management of Head and Neck Surgery Complications* Kwang-Jae Cho, Jun-Ook Park, 2025-07-20 Head and neck anatomy is a complex area and densely populated by critical structures Surgical complications after head and neck surgery are associated with significant morbidity and may even be fatal Thus a surgeon's knowledge of surgical complications is essential for successful outcome This book provides a comprehensive guide to manage complications after head and neck surgery It consists of pearls and pitfalls of experienced surgeons evidence based information and full coloured photographs for managing possible complications after head and neck surgery With the illustrative figures This book will be a practical reference for otolaryngologists head and neck surgeons professional clinical staff and medical students **Of Life and Limb** Justin Barr, 2019 Examining the history of arterial

Diagnosis, Screening and Treatment of Abdominal, Thoracoabdominal and Thoracic Aortic Aneurysms Reinhart Grundmann, 2011-09-12 This book considers mainly diagnosis screening surveillance and treatment of abdominal thoracoabdominal and thoracic aortic aneurysms It addresses vascular and cardiothoracic surgeons and interventional radiologists but also anyone engaged in vascular medicine The high mortality of ruptured aneurysms certainly favors the recommendation of prophylactic repair of asymptomatic aortic aneurysms AA and therewith a generous screening However the comorbidities of these patients and their age have to be kept in mind if the efficacy and cost effectiveness of screening and prophylactic surgery should not be overestimated The treatment recommendations which will be outlined here have to regard on the one hand the natural course of the disease the risk of rupture and the life expectancy of the patient and on the other hand the morbidity and mortality of the prophylactic surgical intervention The book describes perioperative mortality after endovascular and open repair of AA long term outcome after repair and the cost effectiveness of treatment
