Critical Terms for Art History, Second Edition Robert S. Nelson, Richard Shiff, 2010-03-15 Art has always been contested terrain whether the object in question is a medieval tapestry or Duchamp's Fountain But questions about the categories of art and art history acquired increased urgency during the 1970s when new developments in critical theory and other intellectual projects dramatically transformed the discipline The first edition of Critical Terms for Art History both mapped and contributed to those transformations offering a spirited reassessment of the field's methods and terminology Art history as a field has kept pace with debates over globalization and other social and political issues in recent years making a second edition of this book not just timely but crucial Like its predecessor this new edition consists of essays that cover a wide variety of loaded terms in the history of art from sign to meaning ritual to commodity Each essay explains and comments on a single term discussing the issues the term raises and putting the term into practice as an interpretive framework for a specific work of art For example Richard Shiff discusses Originality in Vija Celmins's To Fix the Image in Memory a work made of eleven pairs of stones each consisting of one original stone and one painted bronze replica In addition to the twenty two original essays this edition includes nine new ones performance style memory monument body beauty ugliness identity visual culture visual studies and social history of art as well as new introductory material All help expand the book's scope

Women Artists in Interwar France PaulaJ. Birnbaum,2017-07-05 *Women Artists in Interwar France Framing Femininities* illuminates the importance of the Soci des Femmes Artistes Modernes more commonly known as FAM and returns this group to its proper place in the history of modern art In particular this volume explores how FAM and its most famous members Suzanne Valadon Marie Laurencin and Tamara de Lempicka brought a new approach to the most prominent themes of female embodiment the self portrait motherhood and the female nude These women reimaged art s conventions and changed the direction of both art history and the politics of their contemporary art world FAM has been excluded from histories of modern art despite its prominence during the interwar years Paula Birnbaum s study redresses this omission contextualizing the group s legacy in light of the conservative politics of 1930s France The group s artistic response to the reactionary views and images of women at the time is shown to be a key element in the narrative of modernist formalism

Although many FAM works are missing one reason for the lack of attention paid to their efforts Birnbaum's extensive research through archives press clippings and first hand interviews with artists families reclaims FAM as an important chapter in the history of art from the interwar years
