Popular Series Fiction for K-6 Readers Rebecca L. Thomas, Catherine Barr, 2004 Because of their popularity books in series are great vehicles for fostering literacy among all types of readers who are almost always adamant about reading every title in the series in series order Yet

traditional information sources on children's and YA literature include very little about series fiction so librarians often have difficulty managing this literature. This guide will be a rich resource and time saver for librarians who work with children. It introduces users to the best and most popular fiction series of today covering more than 1 000 series with over 10 000 titles appropriate for elementary readers. Annotations also indicate series and titles accepted by some of the popular electronic reading programs e.g. Accelerated Reading, Reading First. A numbered list of titles in the series follows. Canadian Book Review Annual Joyce M. Wilson, 2001 **Quill & Quire**, 2003 **Canadian Books in Print. Author and Title Index**, 1975 The Publishers Weekly, 2005 **School Library Journal**, 2003 **A Head Start on Science** William C. Ritz, 2007-06. For the littlest scientists the whole wide world can be a laboratory for learning. Nurture their natural curiosity with *A Head Start on Science* a treasury of 89 hands-on science activities specifically for children ages 3 to 6. The activities are grouped into seven stimulating topic areas: the five senses, weather, physical science, critters, water and water mixture, seeds and nature walks. Because the activities have been field tested by more than a thousand Head Start teachers over 10 years you'll find this collection unusually easy to use in a variety of settings including elementary schools, pre-K programs and day care. In addition to clear background and a helpful materials list you get step-by-step procedures and help preparing for comments and questions children may pose. Each activity ends with a reproducible Family Science Connection in both English and Spanish to send home so the whole family can share a learning experience that's both simple and pleasant. Thanks to a focus on the fun of exploration and discovery children probably won't be the only ones who find these activities irresistible. As Editor Bill Ritz writes in the Introduction: We hope your own sense of wonder will be heightened as you observe children and as their curiosity leads them to answer their own questions about everything they see, hear, smell and touch.
