Molecular inclusion and molecular recognition, clathrates, *Advances in Molecular Structure Research* M. Hargittai, I. Hargittai, 1998-08-02 This volume is the fourth in the series and offers both quality and breadth As a whole it reflects two increasingly discernible trends in modern structural chemistry One trend is that parallel to the ever increasing specialization of techniques there is a strong interaction between the techniques This interaction crosses the boundaries between various experiments between the experiments and computations experiments and theory and organic and inorganic chemistry The other trend is the ever increasing penetration of the most modern aspects of structural chemistry the rest of chemistry making the demarkation of structural chemistry increasingly fuzzy which is the most welcome development from a structural chemist's point of view **Separations and Reactions in Organic Supramolecular Chemistry** Fumio Toda, Roger Bishop, 2004-04-21 A new volume in the Perspectives in Supramolecular Chemistry series focusing on separating supramolecular structures a key step in supramolecular chemistry Two guest editors have been at the forefront of the development of chromatographical methods to deal with supramolecular systems Reactions of supramolecular structures show the way into the future of chemistry Fumio Toda is one of the driving forces in the development of supramolecular separation systems A practical title in the prestigious Perspectives in Supramolecular Chemistry series **Molecular Engineering of Nanosystems** Edward A. Rietman, 2013-03-09 Molecular nanotechnology is an emerging technology that allows us to build materials and systems with atomic and molecular precision by manipulating atoms and molecules at very small scales ultimately at the single molecule scale Since the properties of materials depend on how their atoms are arranged the ability to manipulate atoms and molecules at the nano scale will allow us to create new materials to improve current materials and to build systems heretofore only dreamt of The implications of this technology are great continued revolutions in computer chip technology continued revolutions in manufacturing new and stronger materials and highly precise medical
