Schneider,G.J. Heij,1991-08-21 This book contains the results and conclusions of extensive research on the causes and effects of acidification of forests forest soils and heathland in the Netherlands In 1985 the Dutch Priority Programme on Acidification

was started in order to give a more concrete form to the increasing interest of policy makers in the effects of air pollution on ecosystems in particular. In the last three years the research has focused on obtaining a more accurate estimate of the emission of ammonia on the deposition of SO_x, NO_y and NH_x and also on quantifying effects on forest and heathland ecosystems. This quantification of effects included experimental work, model analyses and derivation of critical loads and levels for forest and heathland ecosystems. Furthermore, scenario analyses were made with the Dutch Acidification Systems Model (DAS) in order to evaluate the effectiveness of policy measures. The research itself, which formed the basis for this book, has been described in the reports on individual projects. A summary of the scientific results and conclusions is given in thematic reports added as annex. An independent Review Team has provided a critical assessment of the research carried out since 1988. The Review Report has been incorporated as annex.

Good Business Marthe Hesselmans, Bart Stellingma, Ramy El-Dardiry, Danique François, Catrien Bijleveld, 2025-08-02. This open access book shows how governments can motivate companies to make a positive impact on society and why this is necessary in light of today's pressing social, economic and environmental challenges and transitions. It shows obstacles companies face in conducting socially responsible business. Focusing on government-business relations in the Netherlands, the book also exposes key policy bottlenecks: the tendency of the Dutch government to hold on to the status quo and shield incumbent firms through tax breaks and lax enforcement. There is a real risk of policies that pamper business; it hampers companies that offer societal innovations, for instance for health, education or the labour market. We also show how policies can better capitalise on the innovative qualities of entrepreneurship. Effective government policy makes it worthwhile for companies to alter their business model so that their products, services and production processes benefit society. Our recommendations address the role of government, consumers, financiers and companies themselves. While this work focuses on the Netherlands, it tackles questions that countries face worldwide on how to minimise harmful business conduct and maximise good business solutions. This makes the book broadly relevant to policy makers, business leaders and researchers grappling with the impact of business on society today.

Geschiedenis der stad Lier. - Lier, E. J. van Mol 1873. Anton Bergmann, 1873. *Indisch Lexicon* P. Mingaars, J. Heij, P. Posthumus, 2021-09-13. In het *Indisch Lexicon* zijn bijna 19 000 Indische woorden en begrippen zoals ze in de Nederlandse taal vanaf ongeveer 1600 gebruikt zijn vastgelegd omschreven en in hun context geplaatst. Van ieder woord is de betekenis gegeven op basis van reeds bestaande Indonesische, Maleise, Javaanse, Soendaneese en Nederlandse woordenboeken. Niet alleen enkelvoudige woorden maar ook samenstellingen en spellingsvarianten zijn opgenomen met citaten uit de bron waarin het betreffende woord voorkomt. Dit lexicon is een belangrijk naslagwerk om de Indische woorden en uitdrukkingen die langzaam uit ons collectieve geheugen verdwijnen vast te houden, weer tot leven te wekken en te verklaren binnen hun semantische en culturele context.

Opium to Java James Robert Rush, 2007 Opium smoking was a widespread social custom in nineteenth century Java and commercial trade in opium had far reaching economic and political implications As in many of the Dutch territories in the Indonesian archipelago the drug was imported from elsewhere and sold throughout the island under a government monopoly a system of revenue farms These monopoly franchises were regulated by the government and operated by members of Java s Chinese elite who were frequently also local officials appointed by the Dutch

The farms thus helped support large Chinese patronage networks that vied for control of rural markets throughout Java. James Rush explains the workings of the opium farm system during its mature years by measuring the social economic and political reach of these monopolies within the Dutch dominated colonial society. His analysis of the opium farm incorporates the social history of opium smoking in Java and of the Chinese officer elite that dominated not only the opium farming but also the island's Chinese community and much of its commercial economy. He describes the relations among the various classes of Chinese and Javanese as well as the relation of the Chinese elite to the Dutch and he traces the political interplay that smuggling and the black market stimulated among all these elements. An important contribution to the social and political history of Southeast Asia and now brought back to life as a member of Equinox Publishing's Classic Indonesia series, this book gives a new dimension to our knowledge of nineteenth century Javanese society and the processes of social control and economic dominance during the colonial period.

JAMES R RUSH is a historian of modern Southeast Asia whose other works include *The Last Tree: Reclaiming the Environment in Tropical Asia*, *Java: A Travellers Anthology* and several volumes of contemporary Asian biography in the Ramon Magsaysay Awards series. He is associate professor of history at Arizona State University.

Goederenverwerving van het Duitse Huis te Utrecht 1218-1536 Jerem van Duijl, 2022. Aan de Springweg in het centrum van Utrecht staat het zogeheten Duitse Huis. Het werd halverwege de veertiende eeuw gebouwd als opvolger van een dertiende eeuwse gebouwencomplex buiten de stadsmuur. Dit Duitse Huis was de hoofdvesting van de Duitse Orde in de Noordelijke Nederlanden. Net als bijvoorbeeld de Orde van de Tempeliers en de Johanniterorde was deze orde actief betrokken bij de kruistochten. Vooral na de val van het laatste kruisvaardersbolwerk in het Midden Oosten in 1291 vochten de ridders van de Duitse Orde tevens in het Oostzeegebied alwaar een heuse ordestaat ontstond. Het zijn de militaire activiteiten die dergelijke geestelijke ridderorden bekend hebben gemaakt en die ook in het historisch onderzoek de meeste aandacht hebben gekregen. Minder bekend zijn echter de vestigingen in de herkomstgebieden van de broeders alwaar ridders en priesters gezamenlijk een religieus leven leidden in nederzettingen zoals het Duitse Huis. Daar beheerden ze het lokale goederenbezit van de Duitse Orde waarmee de eigen leefgemeenschap kon worden bekostigd en een bijdrage kon worden geleverd aan de activiteiten van de orde elders. In dit boek wordt inzichtelijk gemaakt hoe de goederenverwerving van het Duitse Huis gedurende de middeleeuwen tot stand kwam. Veel aandacht gaat bijvoorbeeld uit naar de beweegredenen van schenkers. Voor het onderzoek is rijkelijk geput uit een gevarieerde schat aan bronnen zoals oorkonden, pachtregisters en landkaarten. Kruistochten, devotie, politiek en patronage, leiderschapskwaliteiten en economische omstandigheden komen naar voren als de factoren die de ontwikkeling van de goederenverwerving in verschillende vormen hebben bepaald.

Page 4 of cover **Who Owns Whom**, 2007 *Anthocyanins as Flower Pigments* T. Mulder-Krieger, Robert Verpoorte, 2012-12-06. To date, several possibilities exist to change the genetics of plants including classical breeding and modern molecular biological approaches such as recombinant DNA techniques and plant transformation methods. The aim of this publication is to review

the feasibilities offered by the current technologies to modify flower colours Due to the great importance of anthocyanins as flower pigments the main part of this study deals with this class of flavonoids responsible for most red purple and blue colours Being electron deficient the flavylum nucleus of the anthocyanins is highly reactive and undergoes dependent upon pH readily structural transformations which are coupled with colour changes A number of mechanisms that stabilizes the coloured at expense of the colourless structures in plants are described including acylation co pigmentation and metal complex formation Because no plant species possesses the genetic capacity for producing varieties in the full spectrum of colours man has looked for methods to change the genetic properties of plants In recent years conventional flower breeding is more and more being supplemented by genetic engineering techniques This technology offers the possibility to insert specific genes into the cell genome and to transfer genes most efficiently between different organisms The common flower pigments the anthocyanins have been studied for many years and represent now the best understood group of secondary plant metabolites with respect to bio chemistry and genetics

Critical Loads and Dynamic Risk Assessments

Wim de Vries, Jean-Paul Hettelingh, Maximilian Posch, 2015-04-20 This book provides a unique overview of research methods over the past 25 years assessing critical loads and temporal effects of the deposition of air pollutants It includes critical load methods and applications addressing acidification eutrophication and heavy metal pollution of terrestrial and aquatic ecosystems Applications include examples for each air pollution threat both at local and regional scale including Europe Asia Canada and the US The book starts with background information on the effects of the deposition of sulphur nitrogen and heavy metals and geochemical and biological indicators for risk assessments The use of those indicators is then illustrated in the assessment of critical loads and their exceedances and in the temporal assessment of air pollution risks It also includes the most recent developments of assessing critical loads and current and future risks of soil and water chemistry and biodiversity under climate change with a special focus on nitrogen The book thus provides a complete overview of the knowledge that is currently used for the scientific support of policies in the field of air pollution control to protect ecosystem services

User Behavior and Technology Development Peter-Paul Verbeek, Adriaan Slob, 2006-10-11 Environmental policy has long been determined by a dichotomy between technology and behavior Some approaches stress the importance of technology and technological innovation while others focus on behavioral change Each approach has its limitations however since technology and behavior often appear so closely intertwined Human behavior results not only from intentions and deliberate decisions but also from its interaction with technological artifacts In the area of traffic safety for instance people's driving behavior is determined as much by curves speed bumps and the power of their motors as by considerations of safety and responsibility How can we best describe and understand these interactions between behavior and technology What conceptual frameworks and empirical studies are available and how can they be integrated And how can we bring these interactions to bear on product design and policy making The book User Behavior and Technology Development explores these relationships

between technology and behavior from an interdisciplinary perspective This includes contributions from cognitive psychology industrial design public administration marketing sociology ergonomics science and technology studies and philosophy The book aims to create a conceptual basis for analyzing interactions between technology and behavior and to provide insights that are relevant to technology design and environmental policy
