Chiras,2000 This sourcebook examines the options for building a house that is economical energy efficient nontoxic kind to the environment and pleasurable to inhabit Explores the pros and cons of 14 natural building methods including straw bale rammed earth cob cordwood adobe earthbags and papercrete **The Art of Natural Building-Second Edition-Completely Revised, Expanded and Updated** Joseph F. Kennedy,Michael G. Smith,Catherine Wanek,2014-07-01 The original complete user friendly introduction to natural building now fully revised and updated The popularity of natural building has grown by leaps and bounds spurred by a grassroots desire for housing that is healthy affordable and environmentally responsible While there are many books available on specific methods such as straw bale construction cob or timber framing there are few resources which introduce the reader to the entire scope of this burgeoning field Fully revised and updated The Art of Natural Building is the complete and user friendly introduction to natural building for everyone from the do it yourselfer to architects and designers This collection of articles from over fifty leaders in the field is now stunningly illustrated with over two hundred full color photographs of natural buildings from around the world Learn about The case for building with natural materials from the perspectives of sustainability lifestyle and health What you need to know to plan and design your own beautiful and efficient natural home Explanations of thirty versatile materials and techniques with resources on where to go for further information on each How these techniques are being used to address housing crises around the world Clearly written logically organized and beautifully illustrated The Art of Natural Building is the encyclopedia of natural building Joseph F Kennedy is a designer builder writer artist educator and co founder of Builders Without Borders Michael G Smith is a respected workshop instructor consultant and co author of the best selling book The Hand Sculpted House Catherine Wanek is a co founder of Builders Without Borders and author photographer of The Hybrid House and The New Straw Bale Home **The Healthy Home Workbook** Kimberly Rider,2006-02-23 A guide to creating a healthy home environment offering advice on how to remove commonly found dangerous or toxic materials and answering questions about household materials chemicals and product ingredients Covers each room of the house as well as outdoor spaces *The Solar House* Daniel D. Chiras,2002-10-01 Passive solar heating and passive cooling approaches known as natural conditioning provide comfort throughout the year by reducing or eliminating the need for fossil fuel Yet while heat from sunlight and ventilation from breezes is free for the taking few modern architects or builders really understand the principles involved Now Dan Chiras author of the popular book The Natural House brings those principles up to date for a new generation of solar enthusiasts The techniques required to heat and cool a building passively have been used for thousands of years Early societies such as the Native American Anasazis and the ancient Greeks perfected designs that effectively exploited these natural processes The Greeks considered anyone who didn't use passive solar to heat a home to be a barbarian In the United States passive solar architecture experienced a major resurgence of interest in the 1970s in

response to crippling oil embargoes With grand enthusiasm but with scant knowledge and sometimes little common sense architects and builders created a wide variety of solar homes Some worked pretty well but looked more like laboratories than houses Others performed poorly overheating in the summer because of excessive or misplaced windows and skylights and growing chilly in the colder months because of insufficient thermal mass and insulation and poor siting In *The Solar House* Dan Chiras sets the record straight on the vast potential for passive heating and cooling Acknowledging the good intentions of misguided solar designers in the past he highlights certain egregious and entirely avoidable errors More importantly Chiras explains in methodical detail how today's home builders can succeed with solar designs Now that energy efficiency measures including higher levels of insulation and multi layered glazing have become standard it is easier than ever before to create a comfortable and affordable passive solar house that will provide year round comfort in any climate Moreover since modern building materials and airtight construction methods sometimes result in air quality and even toxicity problems Chiras explains state of the art ventilation and filtering techniques that complement the ancient solar strategies of thermal mass and daylighting Chiras also explains the new diagnostic aids available in printed worksheet or software formats allowing readers to generate their own design schemes
