W. Randolph,2010-01-01 Weight loss research shows that the average person will add 1 to 2 pounds around their abdomen each year between the ages of 35 and 55

without changing their eating or exercise habits. Noted expert Dr C W Randolph explains why estrogen dominance is a natural shift in hormone production that begins at age thirty which causes weight gain and sabotages the most steadfast attempts at shedding it. Even worse, estrogen places the added weight around the middle which has a negative impact both aesthetically and medically. Once estrogen dominance has taken hold, it creates a vicious cycle: fat cells will produce even more estrogen which then biochemically predisposes the body to add on even more pounds. Here Dr Randolph introduces the three step plan he's used with success in thousands of patients. In simple language Dr Randolph lays out the facts about bioidentical hormones and explains what foods and supplements guard against or reverse estrogen dominance. He also shares client success stories and presents practical eating plans, recipes and shopping guides to put the advice into practice. [A Race for Life](#) Ruth Heidrich, 2000. In her mid forties Ruth Heidrich was diagnosed with breast cancer. After undergoing a double mastectomy she challenged herself to the punishing Ironman Triathlon, a test of endurance involving a 2.4 mile swim, 112 mile bike ride and a 26.2 mile marathon run. Twenty years later Heidrich is still running, cancer free and positive about life. This is her story. She describes her fight with cancer, the healing powers of proper nutrition and the rewards of running the toughest races in the world. **What Your Doctor May Not Tell You About(TM)** John Lee, Virginia Hopkins, 2024-09-24. From a doctor who has pioneered in women's health, an alternative to HRT for managing menopause symptoms. Christiane Northrup MD, author of *The Wisdom of Menopause*. Arguing that giving estrogen replacement therapy to women after menopause is medically the wrong thing to do, Dr John Lee suggests that natural progesterone can prevent most of the unpleasant side effects of menopause including osteoporosis and weight gain. [The Yeast Connection Handbook](#) William G. Cook, 2013-04-30. What can you eat if you have a yeast related problem? The Yeast Connection Handbook provides general information on the effects that some common foods can have on yeast sufferers and crucial instructions on detecting the specific foods to which you are particularly sensitive or allergic. The authors then present over 225 recipes for breads, soups, entrées, desserts and more that eliminate most common food allergens while providing a diet that is healthful and satisfying.

Menopause Without Medicine Linda Ojeda, 2003-08-26. This book is needed more than ever. The National Institute of Health interrupted their huge HRT hormone replacement therapy study in July 2002 after they found that Prempro, a combination of estrogen and progestin, had detrimental health effects which include an increased risk for breast cancer, heart disease and stroke. This new edition examines the latest information about HRT and the safer alternatives. It completely validates the author's long held bias against HRT and shows women whether perimenopausal, menopausal or postmenopausal how they can maintain and improve their health and well being without the use of synthetic hormones. The book offers complete information on menopausal symptoms and effects and ways to alleviate them. Updated sections cover heart disease including hormonal effects, the role of cholesterol, diet and supplements, osteoporosis and breast cancer. The section on exercise and nutrition for health and weight is completely rewritten. The latest information on non hormonal remedies to

balance hormones is what is needed by every woman wanting to avoid HRT
