Congress. House. Committee on Appropriations. Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies,2011 **Natural Resources and Society: Understanding the Complex Relationship Between Humans and the Environment** Mohd Akhter Ali,M. Kamraju,2023-11-14 Natural Resources and Society Understanding the Complex Relationship Between Humans and the Environment is a study of the dynamic interplay between humans and the natural world The book explores the complex relationship between human societies and the environment examining how human actions can both impact and be influenced by natural resources The book covers a broad range of topics including the history of human resource use the role of natural resources in economic development and the environmental impacts of resource extraction and consumption It also considers the social and cultural factors that shape human interactions with the natural world and the challenges of sustainable resource management Overall the book provides a comprehensive overview of the relationship between humans and the environment emphasizing the importance of understanding this relationship in order to develop more sustainable and equitable societies **Natural Resources, Renewable Energy, and Governance** Tii Njivukuh Nchofoung,Nathanael Ojong,2022 Based on data for 48 African countries for the period 2000 2020 we analyse the effects of natural resources on renewable energy development and the mediating effects of governance on that relationship For this purpose the Ordinary Least Squares method was used to develop a baseline regression model and the Generalized Method of Moments GMM approach was used for the dynamic model regression Quantile regression was used for robustness checking across the various distributions of renewable energy First we find that natural resources enhance renewable energy development in Africa and that the results are robust across alternative specifications of natural resources and governance except for forest resources which have a negative effect on renewable energy development When robustness is checked through a quantile regression analysis the results show that the positive effect depends on the conditional distribution of natural resources and the type of natural resource under consideration The negative effect of total natural resources becomes weaker as we move towards higher quantiles Second governance interacts with natural resource rents to generate positive effects across different governance specifications and natural resources except for coal rent We thereby derive some relevant implications for renewable energy financing in African countries Environmental Studies Dr Narendra Mal Surana,Mrs Hemlata Ojha Malviya,2020-07-30 Environmental Studies by Dr Narendra Mal Surana and Mrs Hemlata Ojha Malviya is a publication of the SBPD Publishing House Agra Environmental science has become the most popular subject in

the world nowadays The whole world is facing the threat of imbalance in the environment such as overexploitation of nature and natural resources deforestation industrialisation and urbanisation Our ancient scriptures and literature are the witness of awareness and conservation instinct about the environment at that time The subject environmental studies has become the part of syllabus of the Degree courses after the issuing of an order by the Hon ble Supreme Court to create awareness among the students This book has been written according to the unified syllabus issued by U G C for all universities and colleges in India The authors are very satisfied to say that the book contains all the latest information and data which will be useful for the young generation The authors are proud to incorporate some more chapters viz Chapter 2 The Vedic Description and Religious Aspect of Environment Chapter 3 Current Status of Environment in India and Chapter 10 A Threat to 21st Century AIDS Attention has also been drawn to provide more and more questions objective type questions etc to the students for their examination point of view
