Nature High Summer Camp ,1997 **A Practical Guide to Nature-Based Practice** Niki Buchan, 2017-02-09 WINNER OF THE 2018 NURSERY WORLD STAFF RESOURCES AWARD There is a growing realisation that children in the Early Years benefit from being involved in wild spaces They need dynamic and complex outdoor environments and opportunities for risk and challenge to play with abandon have first hand experiences places where there is adventure delight daring and joy In this exciting book outdoor education guru Niki Buchan offers ideas for natural learning in the Early Years She provides a background to forest school and its relevance to Early Years settings outlines the challenges and benefits of free play and a risk taking disposition in children and uses case studies from educators to explore the concept of nature based practice A Practical Guide to Nature Based Practice presents ideas for outdoor learning that can be used all year round whatever the season This full colour book will help adults and children alike to reconnect with their local environment making it a must have for any Early Years setting *Real Green* Dr Manuel Arias-Maldonado, 2013-04-28 What would a sustainable society look like How could it be achieved By challenging conventional wisdom about the ecological crisis and reframing the traditional values of green politics Real Green Sustainability after the End of Nature offers new answers to the key questions of the environmental debate In this ground breaking and challenging work Manuel Arias Maldonado convincingly argues that since nature has now been transformed into a part of the human environment it can be seen to no longer exist Ecological problems thus become an inevitable and normal feature of our relationship with nature Hence a post natural environmentalism realistic and liberal while remaining green is advocated In this framework sustainability democracy and liberalism become mutually reinforcing elements rather than conflicting ones Only by combining them can a green society be realised **Ecopsychology, Phenomenology, and the Environment** Douglas A. Vakoch, Fernando Castrillón, 2014-02-17 This book seeks to confront an apparent contradiction that while we are constantly attending to environmental issues we seem to be woefully out of touch with nature The goal of Ecopsychology Phenomenology and the Environment is to foster an enhanced awareness of nature that can lead us to new ways of relating to the environment ultimately yielding more

sustainable patterns of living This volume is different from other books in the rapidly growing field of ecopsychology in its emphasis on phenomenological approaches building on the work of phenomenological psychologists such as Maurice Merleau Ponty This focus on phenomenological methodologies for articulating our direct experience of nature serves as a critical complement to the usual methodologies of environmental and conservation psychologists who have emphasized quantitative research Moreover Ecopsychology Phenomenology and the Environment is distinctive insofar as chapters by phenomenologically sophisticated ecopsychologists are complemented by chapters written by phenomenological researchers of environmental issues with backgrounds in philosophy and geology providing a breadth and depth of perspective not found in other works written exclusively by psychologists
