of writers and researchers      *Why Knowledge Matters in Curriculum* Leesa Wheelahan, 2012 What should we teach in our schools and vocational education and higher education institutions Is theoretical knowledge still important This book argues that providing students with access to knowledge should be the raison d'être of education Its premise is that access to knowledge is an issue of social justice because society uses it to conduct its debates and controversies Theoretical knowledge is increasingly marginalised in curriculum in all sectors of education particularly in competency based training which is the dominant curriculum model in vocational education in many countries This book uses competency based training to explore the negative consequences that arise when knowledge is displaced in curriculum in favour of a focus on workplace relevance The book takes a unique approach by using the sociology of Basil Bernstein and the philosophy of critical realism as complementary modes of theorising to extend and develop social realist arguments about the role of knowledge in curriculum Both approaches are increasingly influential in education and the social sciences and the book will be helpful for those seeking an accessible introduction to these complex subjects *Why Knowledge Matters in Curriculum* is a key reading for those interested in the sociology of education curriculum studies work based learning vocational education higher education adult and community education tertiary education policy and lifelong learning more broadly      *In Both Worlds* Wm. H Holcombe, 2020-07-31 Reproduction of the original *In Both Worlds* by Wm H Holcombe      **The Routledge Companion to Historical Theory** Chiel van den Akker, 2021-11-15 This Companion provides a wide ranging and up to date overview of the conceptual issues that history as a discipline and mode of thought gives rise to The book offers both historical and systematic treatments of these issues as well as addressing their contemporary relevance Structured in three parts Modes and Schools of Historical Thought Epistemology and Metaphysics of History and Issues and Challenges in Historical Theory it offers the reader a wide scope and expert treatment of each topic in this vibrant field that can be read in any order An international team of experts both discuss the basis of their topic and present their own view offering the reader a cutting edge contribution while ensuring their chapters are of interest to both students and specialists in the field of historical theory and engaging with the very nature of historical thought the metaphysics of historical existence the politics of history writing and the intelligibility of the historical process The volume is an indispensable companion to the study of history and essential reading for anyone interested in the reflection on the nature of history and our historical existence      *Atlas of Material Worlds* Matthew Seibert, 2021-08-17 *Atlas of Material Worlds* is a highly designed narrative atlas illustrating the agency of nonliving materials with unique ubiquitous and often hidden influence on our daily lives Employing new materialism as a jumping off point it examines the increasingly blurry lines between the organic and inorganic engaging the following questions What roles do nonliving materials play Might a closer examination of those roles reveal an undeniable agency we have long overlooked or disregarded If so does this material agency change our understanding of the social structures ecologies economies cosmologies technologies and landscapes that surround us And perhaps most importantly why does

material agency matter This is the story of the world's driest nonpolar desert pink flamingos and cerulean blue lithium ponds industrial shipping logistics pudding like jiggling substrates and monuments of mud galactic bodies radioactive sheep and the yellowcake of uranium Put simply this book dares readers to see the world anew from material up Atlas of Material Worlds offers this new relationship to our host environment in a time of mounting crises accelerating climate change ballooning socioeconomic inequality and rising toxic nationalism uniquely telling materialist stories for practitioners and students in landscape architecture and other built environment disciplines

*The Play World* Patricia Anne Simpson, 2020-09-21 The Play World chronicles the history and evolution of the concept of play as a universal part of childhood Examining texts and toys coming out of Europe between 1631 and 1914 Patricia Anne Simpson argues that German material literary and pedagogical cultures were central to the construction of the modern ideas and realities of play and childhood in the transatlantic world With attention to the details of toy manufacturing and marketing Simpson considers prescriptive texts about how children should play treat their possessions and experience adventure in the scientific exploration of distant geographies She illuminates the role of toys among them a mechanical guillotine yo-yos hybridized dolls and circus figures as agents of history Using an interdisciplinary approach that draws from postcolonial childhood and migration studies she makes the case that these texts and toys transfer the world of play into a space in which model childhoods are imagined and enacted as German With chapters on the Protestant play ethic enlightened parenting Goethe as an advocate of play colonial fantasies children's almanacs ethnographic play and an empire of toys Simpson's argument follows a compelling path toward understanding the reproduction of religious gendered ethnic racial national and imperial identities emanating from German speaking Europe that collectively construct a global imaginary This foundational and deeply original study connects German speaking communities across the Atlantic as they collectively engender the epistemology of the play world It will be of particular interest to German studies scholars whose research crosses the Atlantic

Basnett,2021-07-30** Built upon the principle that divides and elevates humans above other animals humanism is the cornerstone of a worldview that sanctifies inequality and threatens all animal life Adorno Politics and the Aesthetic Animal analyses this state of affairs and suggests an alternative a way for humanity to make itself into a new kind of animal Theodor W Adorno has been accused of leading critical theory into a blind alley divorced from practical social and political concerns In Adorno Politics and the Aesthetic Animal Caleb J Basnett argues that by placing the

problem of the human animal distinction at the centre of Adorno's thought we discover a new Adorno one whose critique of domination is in dialogue with classic concerns of political thought forged by Aristotle including questions of humanist political education and the role of art Through a close reading of primary sources Basnett identifies the principal conceptual structure entwined with the understanding of human life as antagonistic to other animals and outlines how forms of aesthetic experience disrupt this problematic concept in favour of a reconceptualization of what we call human His analysis displaces the centrality of the human and attempts to open up a space for its transformation both in terms of how humans relate to each other and in how humans relate to other animals

Human Interaction with the Natural World in Wisdom Literature and Beyond Mordechai Cogan, Katharine J. Dell, David A. Glatt-Gilad, 2023-05-04 Created in honor of the work of Professor Tova Forti this collection considers the natural world in key wisdom books Proverbs Job and Qoheleth Ecclesiastes Ben Sira and Song of Songs Solomon and also examines particular animal and plant imagery in other texts in the Hebrew Bible It crucially involves ancient Near Eastern parallels and like texts from the classical world but also draws on rabbinic tradition and broader interpretative works as well as different textual traditions such as the LXX and Qumran scrolls Whilst the natural world notably plants and animals is a key uniting element the human aspect is also crucial To explore this contributors also treat the wider concerns within wisdom literature on human beings in relation to their social context and in comparison with neighbouring nations They emphasize that the human animal and plant worlds act together in synthesis all enhanced and imbued by the world view of wisdom literature
