Naturalized Reptiles And Amphibians Of The World:

Naturalized Reptiles and Amphibians of the World Christopher Lever, 2003 This book describes how the various alien reptiles and amphibians now living in the wild throughout the world were first introduced how they subsequently became naturalized their present distribution and status in those countries to which they were introduced and their ecological and socio economic impact if any on the native biota and local economies Many species have had a more or less neutral impact being neither beneficial nor harmful However several have had a positive ecological or socio economic impact while some such as the cane toad have had an extremely destructive effect The criteria for inclusion of a species are that it should have been imported from its natural range to a new country by human agency either accidentally or deliberately and that it should currently be established in the wild in self maintaining and self perpetuating populations unsupported by and independent of mankind

Naturalised Birds of the World Christopher Lever, 2010-01-29 This book looks at the world's naturalised successfully introduced species of bird Many species have been introduced to countries outside their natural range by people either deliberately or accidentally with varied consequences for both those species themselves and the native fauna of their new homes In Britain the introduced Canada Goose has quickly become ubiquitous at every lake and riverside while the Golden Pheasant remains a scarce and unobtrusive inhabitant of a few scattered remote woodlands The House Sparrow and Common Starling both in decline over parts of their native range are thriving in a naturalised state in North America and elsewhere in the world Naturalised populations of Mallard in various parts of the world are threatening a total of seven other duck species with extinction through hybridisation This book discusses each species in turn describing how why when and where its introduction took place how it became established and the ecological and economic impacts its presence has had in the country or countries it is naturalised in Each account has a map showing natural and introduced range and there is a wealth of beautiful line drawings of the species concerned
