Nature At War:

Nature at War Thomas Robertson, Richard P. Tucker, Nicholas B. Breyfogle, Peter Mansoor, 2020-04-02 World War II was the largest and most destructive conflict in human history. It was an existential struggle that pitted irreconcilable political systems and ideologies against one another across the globe in a decade of violence unlike any other. There is little doubt today that the United States had to engage in the fighting especially after the Japanese attack on Pearl Harbor on December 7, 1941. The conflict was, in the words of historians Allan Millett and Williamson Murray, a war to be won. As the world's largest industrial power, the United States put forth a supreme effort to produce the weapons, munitions, and military formations essential to achieving victory. When the war finally ended, the finale signaled by atomic mushroom clouds over Hiroshima and Nagasaki, upwards of 60 million people had perished in the inferno. Of course, the human toll represented only part of the devastation; global environments also suffered greatly. The growth and devastation of the Second World War significantly changed American landscapes as well. The war created or significantly expanded a number of industries, put land to new uses, spurred urbanization, and left a legacy of pollution that would in time create a new term: Superfund site.

The Nature of War Ron Tira, 2009-10-05 Examines the different aspects that characterise a war from the centre of gravity to be attacked to the elements constituting military decision as they are manifested in simple symmetrical wars, asymmetrical wars, versus a state opponent, guerrilla warfare, parallel warfare, and next generation warfare. Rethinking the Nature of War Isabelle

Duyvesteyn, Jan Angstrom, 2005 Have globalization, virulent ethnic differences, and globally operating insurgents fundamentally changed the nature of war in the last decade? Interpretations of war as driven by politics and state rationale formulated most importantly by the 19th century practitioner Carl von Clausewitz have received strong criticism. Political explanations have been said to fall short in explaining conflicts in the Balkans, Africa, Asia, and the attacks of 11 September 2001 in the United States. This book re-evaluates these criticisms not only by scrutinising Clausewitz's arguments and their applicability but also by a careful reading of the criticism itself. In doing so, it presents empirical evidence on the basis of several case studies addressing various aspects of modern war such as the actors' conduct and purposes of war. *Theory and Nature of War: Syllabus*, 1993 Theory and Nature of War, 1993 Theory and Nature of War: readings, 1993

The Nature of War in the Information Age David J. Lonsdale, 2004-06 Much of today's Revolution in Military Affairs (RMA) literature subscribes to the idea that the information age will witness a transformation in the very nature of war. In this book, David Lonsdale puts that notion to the test. **Globalization and the Nature of War** Antulio J. Echevarria (II), 2003

Nature at War Hal Butler, 1976-01-01 **War and Nature** Edmund Russell, 2001-02-12 This 2001 book shows the intersection of chemical warfare and pest control in the twentieth century. **War and Nature** Jurgen Brauer, 2009-10-15 SOME PLACES YOU NEVER FORGET For Amanda Stockenberg that place was Smugglers Inn. The seaside inn had been a refuge for Amanda when she was sixteen, a place to find solace, to find herself, and to find love. She can't think of the inn now.

without remembering Dane Cutter The then nineteen year old illegitimate son of the cook had taught her about love She d been ready to give up everything to be with him But at the end of the summer he it seemed was not Now ten years later Amanda once again finds herself staying at Smugglers Inn this time for a corporate retreat The event is her last chance to prove herself to her bosses so she doesn t need any complications like finding Dane Cutter still working at the inn And still as dangerous to her equilibrium as ever Because suddenly Amanda isn t sure what she wants the window office or the window room of a seaside inn She has one week Seven days to choose between achieving all her dreams or reuniting with the man she never stopped loving

Writing Nature in Cold War American Literature Sarah Daw,2018-08-23 First book length ecocritical study of Cold War American literatureCompelling analyses of the function and representation of Nature in a wide range of Cold War fiction and poetry by authors including Paul Bowles J D Salinger Jack Kerouac Allen Ginsberg and Mary McCarthy reveals the prevalence of portrayals of Nature as an infinite interdependent system in American literature written between 1945 and 1971 Daw astutely highlights the Cold War s often overlooked role in environmental history and argues that Rachel Carson s Silent Spring 1962 can be considered as part of a trend of increasingly ecological depictions of Nature in literature written after 1945 By exploring the most recent developments in the field of ecocriticism the book is embedded within current ecocritical debates concerning the Anthropocene and anthropogenic climate change Key FeaturesContains five case studies of six Cold War writers Paul Bowles Peggy Pond Church J D Salinger Jack Kerouac Allen Ginsberg and Mary McCarthyOffers an in depth exploration of the influences behind each writer s presentation of NatureShows the Cold War to be a time of seismic change in the human s relationship to the environment and demonstrates the degree to which this inflects Cold War literatureEngages with the most recent developments in the field of ecocriticism which drive the study s analytical methodology and embed the book within current ecocritical debates

War, Peace, and Human Nature Douglas P. Fry,2015-02 The chapters in this book posit that humans clearly have the capacity to make war but since war is absent in some cultures it cannot be viewed as a human universal And counter to frequent presumption the actual archaeological record reveals the recent emergence of war It does not typify the ancestral type of human society the nomadic forager band and contrary to widespread assumptions there is little support for the idea that war is ancient or an evolved adaptation Views of human nature as inherently warlike stem not from the facts but from cultural views embedded in Western thinking Amazon com

The Rights of War and Peace, Including the Law of Nature and of Nations Hugo Grotius,2007-10-01 The Rights of War and Peace establishes a system of international law based on the concept of natural law Natural law as Grotius describes it is law that applies to all people regardless of country or nationality This law establishes concepts like justifiable war and

natural justice Grotius discusses situations under which countries should go to war and then further explains the proper way in which wars should be prosecuted There are he says certain rules in warfare that must be observed regardless of whether the parties involved have signed any specific agreement to do so Philosophy and law students as well as those with an interest in international politics will be amazed at how modern many of Grotius's ideas seem and intrigued by this foray into international law that still has repercussions in the world today HUGO GROTIUS 1583-1645 was born in the city of Delft in the Dutch Republic Astoundingly intelligent he entered the University of Leiden at age eleven and graduated at age fifteen He was a philosopher and Christian apologist now remembered for his work in establishing a philosophical basis for international law

War and Nature Jurgen Brauer, 2009-10-15 The inherent dangers of war zones constrain even the most ardent researchers with the consequence that little has been known for certain about the effects of war on stable environments War and Nature sifts through the available data from past wars to evaluate the actual impact that combat has on natural surroundings Examining conflicts of various kinds_ the long war in tropical Vietnam the relatively brief and highly technical wars in the Persian Gulf and various civil wars in Africa and South Central Asia fought with small arms_ Brauer asks whether differences in technology location and duration are critical in causing environmental and humanitarian harm A number of unexpected conclusions are drawn from this data including practical agendas for collecting scientific evidence in future wars and suggestions about what the world's environmental and conservation organizations can do One thing War and Nature does is to show us how globalization can be a force harnessed for good ends

Human Nature and the Causes of War John David Orme, 2018-04-07 What are the causes of war Wars are generally begun by a revisionist state seeking to take territory The psychological root of revisionism is the yearning for glory honor and power Human nature is the primary cause of war but political regimes can temper or intensify these passions This book examines the effects of six types of regime on foreign policy monarchy republic and sultanistic charismatic and military and totalitarian dictatorship Dictatorships encourage and unleash human ambition and are thus the governments most likely to begin ill considered wars Classical realism modified to incorporate the impact of regimes and beliefs provides a more convincing explanation of war than neo realism
