

NATURE CONSERVATION AND COUNTRYSIDE LAW

A stylized, light-colored illustration on a dark green background. It features several three-lobed tree shapes scattered across the upper half. Below the trees, there are wavy lines representing hills or fields, and a network of intersecting lines that could represent roads or property boundaries. The overall style is minimalist and graphic.

Jane Holder, Maria Lee

Nature Conservation And Countryside Law:

Nature Conservation and Countryside Law Christopher P. Rodgers, 1996 Our countryside is facing ever greater demands for access by the public for recreation for better environmental practices in farming and stronger laws to protect wildlife These essays by a number of experts analyse these and other related issues *Nature's Place (Routledge Revivals)* William M. Adams, 2014-05-01 Nature conservation has become increasingly important in Britain over the last three decades This title first published in 1986 deals with the critical issues surrounding nature conservation and wildlife protection The book is broad in scope with a focus on the 1981 Wildlife and Countryside Act and its provisions for the protection of wildlife habitats in Sites of Special Scientific Interest SSSIs This follows an historical account of habitat loss over the past 200 years and the origins of conservation and site protection policy This reissue will be of particular value to professionals voluntary workers and students with an interest in the origins developments and practice of nature conservation **A Manual of Nature Conservation Law** Michael J. Fry, 1995 This Manual contains in a convenient reference volume the sources of nature and countryside conservation law This area of law covers a wide range including the protection of species nature reserves sites of special scientific interest SSSIs national parks and areas of outstanding natural beauty Legal provisions relating to nature conservation extend to agriculture forestry and the water industry and to areas such as environmental duties and organisations The materials in the book include primary legislation statutory instruments and policy guidance Legislation such as the National Parks and Access to the Countryside Act 1949 and the Wildlife and Countryside Act 1981 have been heavily amended The text incorporates these amendments together with annotations providing cross references to definitions related primary legislation and statutory instruments commencement dates and selected cases It also includes the regulations made in respect of the EC Habitats Directive the Planning Policy Guidance on nature conservation relating to England and the Scottish Office Circular on the implementation of the EC Birds and Habitats Directives The arrangement of the Manual enables legal provisions to be located quickly without the need to search through several sources and will prove to be a practical guide to all those concerned with nature conservation Environmental Law and Policy in Wales Patrick Bishop, Mark Stallworthy, 2013-02-15 This book examines welsh perspectives on the search for sustainable law and policy solutions to modern environmental threats **Urban Environments and Wildlife Law** Paul A. Rees, 2008-04-15 Today construction industry is being asked more and more to protect the quality of the countryside and to help enhance our natural environment The industry is subject to a complex and wide ranging regulatory framework it now needs to understand its responsibilities and take them seriously Paul Rees provides here an authoritative guide outlining wildlife and nature conservation law in the UK including our European and international commitments and giving clear explanations to a potentially costly area of law in a style accessible to the non legal market This comprehensive manual offers information and guidance for building surveyors environmental managers engineers and planners on the legal and planning issues around

biodiversity nature conservation and construction how ecosystems work and why certain species and habitats need protection where to go for the relevant legislation and appropriate organisations for help and advice UK and European case law demonstrates how the law has functioned in particular instances and case studies illustrate how companies have adapted to fulfil their legal obligations These are key features of the book and provide information on important legal precedents as well as demonstrating current industry best practice

Wildlife Law Great Britain: Law Commission, 2012-08-14 Current law regulating wildlife is spread over a collection of Acts dating back to 1831 The original purpose of much of the law was to govern activities such as hunting and fishing including poaching Over the years it has expanded to conserve certain species ensure the welfare of wildlife and protect local biodiversity from invasive species The result is a legal landscape that is out of date confused and often contradictory Much of the older legislation is out of step with modern requirements and the principal modern Act the Wildlife and Countryside Act 1981 has been amended to such a degree that it is difficult for any non specialists to use The Commission's proposals in this consultation aim to simplify the existing complex framework introducing a single statute which covers the species specific law on the conservation protection and exploitation of wildlife The new regime would reduce the current dependency on criminal law by allowing an appropriate mix of regulatory measures such as guidance advice and a varied and flexible system of civil sanctions such as fines and bans The Commission also suggests that the introduction of statutory factors could play a role in ensuring transparent decision making and improve the engagement of those representing competing interests Factors would include 1 conservation of the species about which the decision is concerned 2 preservation and conservation of biodiversity 3 economic implications 4 wider social factors and 5 the welfare of those animals potentially affected by the decision

Spon's Landscape Handbook Derek Lovejoy Partnership, 2013-01-11 There have been such great changes in legislation official guidance the British Standards and the techniques used in landscape and external works since the third edition was written ten years ago that the Handbook has been totally rewritten for this edition This new edition of the Handbook provides a guide to planning and landscape law a review of computer aided design techniques for landscape designers together with guidance on data to be collected during first site visits The opportunity has been taken to change the format of the work sections to comply with SMM7 to make it easier to find specific items and to read in conjunction with the current edition of Spon's Landscape and External Works Price Book The SMM7 sections are now divided into four parts General Guidance British Standards Data and Outline Specification Diagrams typical drawings and photographs illustrate each section The useful bibliography has been updated and revised

Contract Law and the Legislature TT Arvind, Jenny Steele, 2020-08-06 This volume revisits some of the key debates about the nature and shape of contract law in light of the impact that statutes have had on its development With contributions from leading contract law scholars it fills a significant gap in existing theoretical and doctrinal analyses of contract law which rely primarily on cases to put forward accounts of the general principles and structure of contract law

Statutory rules are typically seen as being specific instances of legal regulation that carve out exceptions to these general principles for specific reasons of policy This treatment of these rules has resulted in an incomplete understanding of the nature of contract law and the principles that underpin it By drawing specifically on contract statutes the volume produces a more complete picture of modern contract law A companion to the ground breaking Tort Law and the Legislature Common Law Statute and the Dynamics of Legal Change Hart Publishing 2012 this collection will have a significant impact on the study of contract law

The Oxford Handbook of Comparative Environmental Law Emma Lees, Jorge E. Viñuales, 2019-05-06 This Handbook is the first comprehensive account of comparative environmental law It examines in detail the methodological foundations of the discipline as well as the substance of environmental law across countries from four vantage points country studies from all continents responses to common problems including air pollution water management nature conservation genetically modified organisms climate change and energy chemicals waste foundational components of environmental law systems including principles property rights administrative and judicial organisation command and control regulation market mechanisms informational techniques and liability mechanisms and common interactions of environmental protection with the broader public private and criminal law contexts The volume brings together the foremost authorities in this field from around the world to provide a concise self contained and technically rigorous account of environmental law as a single overall system

Environmental Protection, Law and Policy Jane Holder, Maria Lee, 2007-07-19 This 2007 book examines environmental law from a range of perspectives emphasising the policy world from which environmental law is drawn and nourished Those working within the discipline of environmental law need to engage with concepts and methods employed by disciplines other than law The authors analyse the ways in which legal activities are supported and legitimated by work in traditional scientific or technical domains as well as by certain more obscure but also influential cultural or philosophical assumptions A range of regulatory techniques is explored in this book through a close examination of both pollution control and land use The highly complex nature of current environmental problems demanding sophisticated and responsive legal controls is illustrated by several in depth case studies including legal and policy analysis of the highly contested issues of genetically modified organisms and renewable energy projects

Urban Ecology Kevin J. Gaston, 2010 This is the urban century in which for the first time the majority of people live in towns and cities Understanding how people influence and are influenced by the green component of these environments is therefore of enormous significance Providing an overview of the essentials of urban ecology the book begins by covering the vital background concepts of the urbanisation process and the effect that it can have on ecosystem functions and services Later sections are devoted to examining how species respond to urbanisation the many facets of human ecology interactions and the issues surrounding urban planning and the provision of urban green spaces Drawing on examples from urban settlements around the world it highlights the progress to date in this burgeoning field as well as the challenges that lie ahead Provided by publisher

Property Law: Current Issues and

Debates Paul Jackson, David C. Wilde, 2018-12-20 Published in 1999 Questions of human rights changes in social structures economic climates and technological developments all impact on property law This edited collection provides an in depth analysis of present law and practical proposals for the future written by the foremost international figures in the field from a variety of theoretical and professional backgrounds *Sourcebook on Environmental Law* Maurice Sunkin, 2001-11-30 The second edition of this sourcebook brings together a comprehensive selection of the principal international European and domestic sources of environmental law together with commentary and extensive references to secondary sources including relevant websites The new edition has been fully revised and extended to include the major developments in this rapidly evolving area of law In particular at the international level there is now consideration of the Kyoto Protocol 1997 the Aarhus Convention 1998 the Basel Protocol 1999 and the Biosafety Protocol 2000 At the European level there is coverage of the changes introduced by the Amsterdam Treaty the 2000 Water Framework Directive the new Air Quality Directives and the EC White Paper on Environmental Liability There is also discussion of the proposed Sixth Environmental Action Programme The domestic coverage includes consideration of the Pollution Prevention and Control Act 1999 the Countryside and Rights of Way Act 2000 the implementation of the contaminated land regime together with coverage of the new UK waste strategy The book now also includes extensive consideration of the impact of the Human Rights Act 1998 on environmental law Recent case law is included throughout This unique work will provide an extremely valuable resource for all those studying teaching and working in the field of environmental law **Environmental Rights in Europe and Beyond** Sanja

Bogojevic, Rosemary Rayfuse, 2018-08-23 This open access book explores the highly topical issue of environmental rights through national European and international perspectives The growing awareness of an impending environmental crisis coupled with a series of national and regional environmental disasters led in the 1960s and 1970s to the birth of the global environmental movement and the widespread recognition of the need to protect the environment for both current and future generations Against this backdrop the concept of environmental rights surfaced as a means by which claims relating to the environment could be formulated in legal terms and thereby safeguarded In the decades that followed this concept has come to encompass many different variations of legal rights which this book seeks to investigate and assess The ebook editions of this book are available open access under a CC BY NC ND 4.0 licence on bloomsburycollections.com Open access was funded by the Swedish Studies Network **Environmental Law** Elizabeth Fisher, Bettina Lange, Eloise Scotford, 2019

Environmental Law Text Cases and Materials offers a comprehensive critical and case focused approach to the subject combining insightful author commentary with carefully selected extracts to fully support students Manual of Environmental Management Adrian Belcham, 2014-09-25 *Manual of Environmental Management* is a practical guide for those involved in the control and reduction of environmental impacts in organisations This comprehensive and practical guide takes you through the main environmental challenges organisations face and the improvement strategies used to manage

them Chapter by chapter Manual of Environmental Management discusses the fundamental issues and principles surrounding environmental policy law and management and provides crucial information on how to respond and implement environmental programmes This book is the perfect reference tool for the environmental professional and an invaluable study text for those preparing for professional examinations such as the NEBOSH Environmental Diploma and IEMA Associate

Membership Exam **Interpreting Environmental Offences** Emma Lees,2015-07-30 This book analyses the interpretation of environmental offences contained in the waste contaminated land and habitats protection regimes It concludes that the current purposive approach to interpretation has produced an unacceptable degree of uncertainty Such uncertainty threatens compliance with rule of law values inhibits predictability and therefore produces a scenario which is unacceptable to the wider legal and business community The author proposes that a primarily linguistic approach to interpretation of the relevant rules should be adopted In so doing the book analyses the appropriate judicial role in an area of high levels of scientific and administrative complexity The book provides a framework for interpretation of these offences The key elements that ought to be included in this framework the language of the provision the harm tackled as drafted regulatory context explanatory notes and preamble and finally purpose in a broader sense are considered in this book

Through this framework a solution to the certainty problem is provided **Research Methods for the Biosciences** Debbie Holmes,Peter Moody,Diana Dine,2011 Research Methods in the Biosciences demystifies the process of research and describes all the factors that enable effective investigation These include planning your experiment data collection analysis interpretation and reporting and legal ethical and health safety considerations **National and Regional Approaches for**

Ecological Networks in Europe R. H. Jongman,Ib Kristiansen,Council of Europe. Committee for the Activities of the Council of Europe in the field of Biological and Landscape Diversity,2001-01-01 This report is written within the framework of the Council of Europe s Committee of Experts for the setting up of the Pan European Ecological Network It gives an overview of the concept of the ecological network dealing with nature conservation at national and regional levels In addition it presents the experiments carried out in 17 European countries and highlights the need to put ecological measures into practice by integrating them into planning policies **The Laws Protecting Animals and Ecosystems** Paul A.

Rees,2017-09-20 There is currently no basic text in wildlife law suitable for the wide range of courses in wildlife conservation and animal welfare at both bachelors and masters level or for the large number of people who work in conservation and animal welfare The Laws Protecting Animals and Ecosystems fills the gap in this significant market for a basic law text applicable to students and professionals whose primary training is in biology but who require a basic understanding of the laws relating to the protection of animals and ecosystems The text is applicable to a wide range of subjects including wildlife conservation animal handling animal welfare animal husbandry and veterinary science This foundational text supports those studying animal and ecosystem law by providing an overview of the basic legal principles national and international laws

terminology the legal mechanisms used to protect animals and ecosystems and a compendium of the major animal welfare and conservation laws in major English speaking countries Dr Rees has been teaching wildlife law for 20 years and ecology for over 35 years and is ideally placed to write this book
