Deming Alison H. and Lauret E Savoy, 2013 *The Colors of Nature* Alison Hawthorne Deming, Lauret E. Savoy, 2002 Challenging Euro American ideas of wilderness as absurd the writers in this book reaffirm the importance of nature to cultural identity whether Native American Chicano Mestizo or Hawaiian whether of Japanese Lebanese or African American descent back cover [Nature and Identity in Cross-Cultural Perspective](#) A. Buttimer, L. Wallin, 2013-04-17 Nature and Identity in Cross Cultural Perspective presents 20 essays which explore diverse cultural interpretations of the earth s surface Contrasted with each other and with the potentially cosmopolitan culture of science these detailed studies of ways in which different cultures conceptualise nature appear in the context of global environmental change Understanding across cultural lines has never been more important This book shows how individual cultures see their own histories as offering protection for nature while often viewing others as lacking such ethical restraints Through such writing a discourse of understanding and common action becomes possible The authors come from the places they discuss and offer passionate as well as scholarly visions of nature within their cultural homes Audience This volume is of interest to academics and professionals working in the fields of cultural geography environmental history environmental studies history of environmental ideas environmental education landscape and literature nature and culture It can be used for courses in the above mentioned areas

and seminars in comparative literature It can also be used as a complimentary text to provide cultural context to literary readings and for seminars on cultural aspects of the environment

Culture and Identity in a Muslim Society Gary S. Gregg, 2007-02-15 Culture and Identity presents an alternative to the individualist vs collectivist approach to identity Unlike most psychological and anthropological studies of culture and self it directly studies individuals using study of lives style interviews with young adults living in villages and small towns in southern Morocco It analyzes the life narratives of two men and two women building a theory of culture and identity that differs from prevailing psychological and anthropological models in important respects In contrast to modernist theories of identity as unified the life narratives show individuals to articulate a small set of shifting identities But in contrast to post modern theories that claim people have a kaleidoscopic multiplicity of fluid identities the narratives show that the identities are integrated by repeated use of culturally specific self symbols metaphors and story plots

Identity, Gender, and Status in Japan Takie Lebra, 2007-06-21 As one of Japan's leading post war anthropologists the writings of Takie Lebra have had significant impact on Western understanding and appreciation of the structures and workings of Japanese society In particular her research into the notions of self and self other relationships issues of gender and women and motherhood has provided a new paradigm in the way these issues are now addressed Similarly her analysis of the status culture of royalty and the aristocracy in Japan based on extensive field study which culminated in her book Above the Clouds Status Culture of the Modern Japanese Nobility 1993 has been widely regarded as the most important contribution of its kind to date This volume brings together twenty four of the author's key papers on the three principal areas of her research over the last thirty five years and includes a complete Bibliography of her published writings subdivided into books articles in journals or as book chapters and book reviews The collection is introduced by Takie Lebra herself in which she first reviews selected essays appearing in the volume along with a consideration of the contemporary controversy surrounding the imperial succession In conclusion by way of a personal mini memoir she offers what she terms a sentimental reverie on my own self as a native outsider

Cultural Identity and Global Process Jonathan Friedman, 1994-10-05 This fascinating book explores the interface between global processes identity formation and the production of culture Examining ideas ranging from world systems theory to postmodernism Jonathan Friedman investigates the relations between the global and the local to show how cultural fragmentation and modernist homogenization are equally constitutive trends of global reality With examples taken from a rich variety of theoretical sources ethnographic accounts of historical eras the analysis ranges across the cultural formations of ancient Greece contemporary processes of Hawaiian cultural identification and Congolese beauty cults Throughout the author examines the interdependency of world market and local cultural transformations and demonstrates the complex interrelations between globally structured social processes and the organization of identity Jonathan Friedman also documents the development and significance of a global perspective in an anthropology that illuminates a wide variety of

domains from prehistory to world hegemony In so doing he interrogates the emergence of the concept of culture and suggests that anthropology itself is best understood within the trajectory of modernity

A Human Right to Culture and Identity Janne Mende, 2016-06-15 Is it desirable or even necessary to have distinct human rights for cultural identities Do different conceptions of culture and identity and their potential to frame human rights violations as culturally appropriate complicate the question How should a human right to collective identity be outlined Claims to human rights as applying to a whole ethnic religious or cultural group instead of the individual prove to be complex This book reveals the pitfalls benefits and demands that surround the debate for and against culture and identity in human rights It connects a continuous and nuanced theoretical debate with highly topical empirical findings about collective rights for indigenous groups which for centuries have been suppressed and marginalized and now stand at the forefront of successfully demanding a human right to their own culture and distinct identity This book shows the ambivalences of those demands and discusses solutions so that human rights neither exclude marginalized cultural groups nor reproduce rigid distinctions between seemingly exclusive cultures

Nature's Writers Donald S. Clark, 2024-09-03 A photographic celebration of the landscapes that have influenced some of America's most important nature writers from John Muir to Terry Tempest Williams to Barbara Kingsolver Since 2019 Donald S Clark has documented the places that have been instrumental in influencing the lives and words of both historic and contemporary nature and environmental writers throughout the United States While we have always felt their passionate connection to their own environments no book has ever made this visual connection between writers and their land before the relationship between prose and place Featuring more than 40 of America's most important writers the content is as far reaching as America itself from sea to shining sea forest to prairie and mountain to coastline Accompanying each gallery of stunning photography is a selected excerpt by the writer about their land With the increasingly noticeable effects of climate change the significance of these writers and their personal connections to the environment is even more timely This unique and compelling story of the land and how it has inspired some of our greatest poets and authors will make a wonderful gift for budding environmentalists students of nature writing or anyone interested in conservation

Strange Natures Nicole Seymour, 2013-05-15 In *Strange Natures* Nicole Seymour investigates the ways in which contemporary queer fictions offer insight on environmental issues through their performance of a specifically queer understanding of nature the nonhuman and environmental degradation By drawing upon queer theory and ecocriticism Seymour examines how contemporary queer fictions extend their critique of natural categories of gender and sexuality to the nonhuman natural world thus constructing a queer environmentalism Seymour's thoughtful analyses of works such as Leslie Feinberg's *Stone Butch Blues* Todd Haynes's *Safe* and Ang Lee's *Brokeback Mountain* illustrate how homophobia classism racism sexism and xenophobia inform dominant views of the environment and help to justify its exploitation Calling for a queer environmental ethics she delineates the discourses that have worked to prevent such an ethics and argues for a concept of queerness that is

attuned to environmentalism's urgent futurity and an environmentalism that is attuned to queer sensibilities
