*Mediating Nature* Sidney I. Dobrin, Sean Morey, 2019-10-31 *Mediating Nature* considers how technology acts as a mediating device in the construction and circulation of images that inform how we see and know nature Scholarship in environmental communication has focused almost exclusively on verbal rather than visual rhetoric and this book engages ecocritical and ecompositional inquiry to shift focus onto the making of images Contributors to this dynamic collection focus their efforts on the intersections of digital media and environmental ecological thinking Part of the book s larger argument is that analysis of mediations of nature must develop more critical tools of analysis toward the very mediating technologies that produce such media That is to truly understand mediations of nature one needs to understand the creation and production of those mediations right down to the algorithms circuit boards and power sources that drive mediating technologies Ultimately *Mediating Nature* contends that ecological literacy and environmental politics are inseparable from digital literacies and visual rhetorics The book will be of interest to scholars and students working in the fields of Ecocriticism Ecomposition Media Ecology Visual Rhetoric and Digital Literacy Studies
