He describes the anatomical and neurophysiological characteristics of the horse's brain and compares these features with those of other species to gain an evolutionary perspective A horseman himself Leblanc also considers the opinions of renowned riding masters as well as controversies surrounding the horse s extraordinary mental powers that have stirred in equestrian and scientific circles The Mind of the Horse brings together in one volume the current state of equine research and will likely stimulate surprising new discoveries Early Riders Robert Drews, 2004-08-02 In this wide ranging and often controversial book Robert Drews examines the question of the origins of man's relations with the horse He questions the belief that on the Eurasian steppes men were riding in battle as early as 4000 BC and suggests that it was not until around 900 BC that men anywhere whether in the Near East and the Aegean or on the steppes of Asia were proficient enough to handle a bow sword or spear while on horseback After establishing when where and most importantly why good riding began Drews goes on to show how riding raiders terrorized the civilized world in the seventh century BC and how central cavalry was to the success of the Median and Persian empires Drawing on archaeological iconographic and textual evidence this is the first book devoted to the question of when horseback riders became important in combat Comprehensively illustrated this book will be essential reading for anyone interested in the origins of civilization in Eurasia and the development of man's military relationship with the horse A Companion to Greek Warfare Waldemar Heckel, F. Civil War Field Artillery Earl J. Hess, 2022-10-05 The American Civil War saw the creation of the largest most potent artillery force ever deployed in a conflict fought in the Western Hemisphere It was as sizable and powerful as any raised in prior European wars Moreover Union and Confederate artillery included the largest number of rifled pieces fielded in any conflagration in the world up to that point Earl J Hess's Civil War Field Artillery is the first comprehensive general history of the artillery arm that supported infantry and cavalry in the conflict Based on deep and expansive research it serves as an exhaustive examination with abundant new interpretations that reenvision the Civil War s military Hess explores the major factors that affected artillerists and their work including the hardware the organization of artillery power relationships between artillery officers and other commanders and the influence of environmental factors on battlefield effectiveness He also examines the lives of artillerymen the use of artillery horses manpower replacement practices effects of the widespread construction of field fortifications on artillery performance and the problems of resupplying batteries in the field In one of his numerous reevalutions Hess suggests that the early war practice of dispersing guns and assigning them to infantry brigades or divisions did not inhibit the massing of artillery power on the battlefield and that the concentration system employed during the latter half of the conflict failed to produce a greater concentration of guns In another break with previous scholarship he shows that the efficacy of fuzes to explode long range ordnance proved a problem that neither side was able to resolve during the war Indeed cumulative data on the types of projectiles fired in battle show that commanders lessened their use of the new long range exploding ordnance due to bad fuzes and instead increased their use of solid shot the oldest artillery projectile in history Ableist Rhetoric James L. Cherney, 2019-11-01 Ableism a form of discrimination that elevates

able bodies over those perceived as less capable remains one of the most widespread areas of systematic and explicit discrimination in Western culture Yet in contrast to the substantial body of scholarly work on racism sexism classism and heterosexism ableism remains undertheorized and underexposed In this book James L Cherney takes a rhetorical approach to the study of ableism to reveal how it has worked its way into our everyday understanding of disability Ableist Rhetoric argues that ableism is learned and transmitted through the ways we speak about those with disabilities Through a series of textual case studies Cherney identifies three rhetorical norms that help illustrate the widespread influence of ableist ideas in society He explores the notion that deviance is evil by analyzing the possession narratives of Cotton Mather and the modern horror touchstone The Exorcist He then considers whether normal is natural in Aristotle's Generation of Animals and in the cultural debate over cochlear implants Finally he shows how the norm body is able operates in Alexander Graham Bell s writings on eugenics and in the legal cases brought by disabled athletes Casey Martin and Oscar Pistorius These three simple equivalencies play complex roles within the social institutions of religion medicine law and sport Cherney concludes by calling for a rhetorical model of disability which he argues will provide a shift in orientation to challenge ableism s epistemic ideological and visual components Accessible and compelling this groundbreaking book will appeal to scholars of rhetoric and of disability studies as well as to disability rights advocates Making the San Fernando Valley Laura R. Barraclough, 2011 In the first book length scholarly study of the San Fernando Valley home to one third of the population of Los Angeles Laura R Barraclough combines ambitious historical sweep with an on theground investigation of contemporary life in this iconic western suburb She is particularly intrigued by the Valley's many rural elements such as dirt roads tack and feed stores horse keeping districts citrus groves and movie ranches Far from natural or undeveloped spaces these rural characteristics are she shows the result of deliberate urbanplanning decisions that have shaped the Valley over the course of more than a hundred years The Valley's entwined history of urban development and rural preservation has real ramifications today for patterns of racial and class inequality and especially for the evolving meaning of whiteness Immersing herself in meetings of homeowners associations equestrian organizations and redistricting committees Barraclough uncovers the racial biases embedded in rhetoric about open space and western heritage The Valley's urban cowboys enjoy exclusive semirural landscapes alongside the opportunities afforded by one of the world's largest cities Despite this enviable position they have at their disposal powerful articulations of both white victimization and with little contradiction color blind politics The Intentional Spinner Judith Mackenzie, 2015-11-01 Offering a blend of technical knowledge history and easy to use tips this inspiring collection of spinning wisdom deftly explores the three fundamental areas of yarn production understanding fibers managing yarn structure and making yarns that precisely meet the spinner's needs The rich historic traditions of plant and animal fibers are fascinatingly juxtaposed with recent advances in synthesized fiber and mankind s use of fibers in the past present and future while detailed image laden instructions for four intermediate projects demonstrate the range of

possibilities from sturdy plied yarns to playful novelty yarns Spinners are also offered guidance on planning a project from start to finish as well as how to care for and store completed projects *The Animals of Spain* Abel Alves, 2011-07-14 An overlooked area in the burgeoning field of animal studies is explored the way nonhuman animals in the early modern Spanish empire were valued companions as well as economic resources Montaigne was not alone in his appreciation of animal life
