Nature Reborn:

Creation Care Discipleship Steven Bouma-Prediger, 2023-10-17 Although our planet faces numerous ecological crises including climate change many Christians continue to view their faith as primarily a spiritual matter that has little relationship to the world in which we live But Steven Bouma Prediger contends that protecting and restoring our planet is part and parcel of what it means to be a Christian Making his case from Scripture theology and ethics and including insights from the global church Bouma Prediger explains why Christians must acknowledge their identity as earthkeepers and therefore embrace their calling to serve and protect their home planet and fellow creatures To help readers put an earthkeeping faith into practice he also suggests numerous practical steps that concerned believers can take to care for the planet Bouma Prediger unfolds a biblical vision of earthkeeping and challenges Christians to view care for the earth as an integral part of Christian discipleship

Ecotheology Kiara Jorgenson, Alan G. Padgett, 2020-09-24 Just as God loves creation so are Christians called to care for it Now amid the accelerating degradation of our global environment that task has taken on greater urgency than ever How should Christians respond to the climate crisis and widespread pollution of earth's shared commons water and air How might Christian communities think about human responsibility to other living creatures In roundtable format Richard Bauckham Cynthia Moe Lobeda Steven Bouma Prediger and John F Haught navigate the layers of what it means for humans to live in right relationship with earth's lifecosystems After each contributor's essay the other three contributors issue a response including points of disagreement and questions thereby modeling for readers productive and respectful dialogue The ecumenical conversations in Ecotheology represent the diverse viewpoints of contributors theological and practical commitments exploring creation care through a variety of frameworks including natural science biblical studies systematic theology and Christian ethics

[Celebrating Nature by Faith](#) H. Paul Santmire, 2020-09-09 Sometimes it is helpful to take one step backward in order to take two steps forward In this insightful volume H Paul Santmire draws on his long standing and widely recognized engagement with ecological theology to propose that the traditions of the Protestant Reformation rightly read offer rich resources today for those who are struggling to move forward to respond theologically to the crisis of a planet in peril and thereby to celebrate nature by faith

Spirit and Nature Timothy Hessel-Robinson, Ray Maria McNamara, 2011-08-01 Spirit and Nature is a collection of essays exploring how the resources of Christian spirituality can inform the practice of a more ecologically sustainable faith Our current ecological situation calls for people of religious faith to reexamine the way they envision the practice of spirituality As environmental ethicists have called us to reconsider the human Earth relationship so that the planet is not seen as simply an endless supply of resources to fill human wants and needs so these essays call us to reconsider spiritual practice as it relates to Earth's ecology Rather than viewing spirituality as an escape from the material world the authors describe the embodiment of the God quest within the human nature relationship Drawing on diverse disciplinary perspectives these essays examine a variety

of topics including the relationship between Earth and humans in the Bible the role of nature's beauty in Christian spirituality the practice of Christian discernment and contemplation in light of the natural sciences the role of nature in liturgical prayer and others These essays consider how scholarship in Christian spirituality can contribute to reimagining faith in ways that better cherish the Earth's fragile beauty Before Nature H. Paul Santmire, 2014-05-01 Before Nature caps a set of themes first brought to the fore in Santmire's previous work most notably the classic *The Travail of Nature* Here Santmire continues the pursuit of a theology bound up with nature and its condition especially the fragility and fervent expectation of nature's redemption Santmire invites readers on a theological and spiritual journey to a prayerful and contemplative knowledge of the Triune God in which practitioners are inducted into a bountiful relationship with the cosmic and universal ministry of Christ and the Spirit uniting all of nature in a single vision of hope and anticipation *Earth & Nature Songs* Jerry Silverman, 2010-10-07 Perfect for Earth Day celebrations this is the book for any nature lover Many of the songs can be used for camp outs hiking or just pure fun Includes I Love the Mountains Land and Sea Morning Song America the Beautiful Down the River Earth Day Is Every Day a children's musical and many more Written for voice and piano with guitar chords

Nature, Human Nature, and God Ian G. Barbour, Ian Barbour offers analyses of the shape and import of evolutionary theory indeterminacy neuroscience information theory and artificial intelligence He also addresses deeper philosophical issues and the idea of nature itself Then Barbour advances to the interconnected religious questions at the core of contemporary debate Are humans free Does religion itself evolve Are we immortal Is God omnipotent How does God act in nature Barbour's work offers hope that newer religious insights and imperatives occasioned by deep interaction with science can address the environmental and global challenges posed by the relentless advance of science **The Human**

Relationship to Nature Matthew R. Foster, 2016-11-02 Growing alarm over the harm done by humans to the natural world and even to the viability of our own industrial civilization compels us to ask the deeper moral question What should be the human relationship to nature Matthew R Foster starts by assessing three contrasting patterns of moral reasoning the Progress Ethic that created the world we live in the biblically inspired Stewardship Ethic and the Connection Ethic based on scientific understanding of the interdependence of all natural entities Critical analysis reveals that none of these ethics is able to sustain the values it advocates due to two unsupportable presumptions that the norms of human morality are commensurate with the natural world and that the value of an entity is an intrinsic property Foster argues that in order for a future environmental ethic to be both logically coherent and environmentally constructive it must start from unconventional notions First because nature will never be commensurate with human moral reasoning non rational resources must be employed despite the risks involved Second value resides in the relationship of one entity to another and does not belong intrinsically to either in short value is foremost a verb rather than a noun Foster proposes a new paradigm attentive to the realm of value relations among all natural entities one which offers mediating opportunities between nature and morality In

this new ethic there are no shoulds Rather moral responsibilities to the natural entities around us are elective placing us in an unfamiliar yet potentially liberating network of relationships This book will be of interest to scholars both instructors and students of environmental ethics philosophy religion and intellectual history and all who are concerned about the environmental challenges of our time *Wild New Jersey* David Wheeler,2011 Wild New Jersey brings the reader on a real life safari through the Garden State s wildlife and natural wonders Tom Gilmore President New Jersey Audubon Society

The Ethics of Nature Celia Deane-Drummond,2008-04-15 This accessible and timely book uses a Christian perspective to explore ethical debates about nature A detailed exploration of humanity s treatment of the natural world from a Christian perspective Covers a range of ethical debates including current controversies about the environment animal rights biotechnology consciousness and cloning Sets the immediate issues in the context of underlying theological and philosophical assumptions Complex scientific issues are explained in clear student friendly language The author develops her own distinctive ethical approach centred on the practice of wisdom Discusses key figures in the field including Peter Singer Aldo Leopold Tom Regan Andrew Linzey James Lovelock Anne Primavesi Rosemary Radford Ruether and Michael Northcott The author has held academic posts in both theology and plant science
