Nature Reserves Of The Himalaya And The Mountains Of Central Asia:

Nature Reserves of the Himalaya and the Mountains of Central Asia Michael John Beverley Green,1993 Nature Reserves of the Himalaya and the Mountains of Central Asia World Conservation Monitoring Centre,1993 **Regional action plan for the protected areas of East Asia 2006-2010 (Chinese version)** , *Protected Areas of the World* IUCN Conservation Monitoring Centre,1991 *Land of the Tiger* Valmik Thapar,1997-01-01 Showcases the diversity and beauty of the animals sharing the tiger s domain and documents the strain that modern and urban values place on India s ecosystems

Wildlife Conservation in China Richard B. Harris,2014-12-18 Very little is known about the issue of wildlife conservation within China Even China specialists get a meager ration of stories about pandas giving birth in zoos or poachers in some remote setting being apprehended But what does the future hold for China s wildlife In this thoughtful work the leading U S expert on wildlife projects in Western China presents a multi faceted assessment of the topic Richard B Harris draws on twenty years of experience working in China and incorporates perspectives ranging from biology through Chinese history and tradition to interpret wildlife conservation issues in a cultural context In non technical language Harris shows that particularly in its vast western sections where most species of wildlife still have a chance to survive China has adopted a strongly preservationist hands off approach to wildlife without confronting the larger and more difficult problem of habitat loss This policy treats wildlife conservation as a strictly technical problem and thus prioritizes captive breeding to meet the demand for animal products while ignoring the manifold cultural social and economic dimensions that truly dictate how wild animals will fare in their interaction with the physical and human environments The author concludes that any successes this policy achieves will be temporary *Equids--zebras, Asses, and Horses* Patricia Des Roses Moehlman,IUCN/SSC Equid Specialist Group,2002 The new Equid Action Plan provides current knowledge on the biology ecology and conservation status of wild zebras asses and horses It specifies what information is lacking and prioritizes needed conservation actions The Action Plan also provides chapters on equid taxonomy genetics reproductive biology and population dynamics These chapters highlight unsolved issues of taxonomy and genetics They also provide information and insight into the special demographic and genetic challenges of managing small populations The chapter on disease provides a review of documented equine disease and epidemiology and focuses on priorities for equid conservation health The final chapter deals with the importance of developing an assessment methodology that explicitly considers the role of equids in ecosystems and the ecological processes that are necessary for ecosystem viability The approach of combining ecological field studies and ecosystem modeling should prove useful for the scientific management and conservation of wild equids worldwide These chapters provide research and conservation practitioners with new information and paradigms *Resistance and the State* David Gellner,2007-04 There has been growing concern about failed states and since the massacre of the Royal family in Nepal in 2001 increasing media attention has focused on the decline of the state and the rise of the Maoist rebels This book explores

the complex relationship between a modernizing developmentalist state and the people it professes to represent **High**
Mountain Pastoralism in Northern Pakistan Eckart Ehlers, Hermann Kreutzmann, 2000 The strength of the book lies in
this differentiated analysis which is based on extensive empirical research Several chapters challenge conventional
modernization theories and the authors intimate connection to their data makes for an unusually stimulating and pleasurable
