Nature God And Humanity Envisioning An Ethics Of Nature:

Nature, God and Humanity Richard L. Fern, 2002-04-04 Nature God and Humanity clarifies the task of forming an ethics of nature thereby empowering readers to develop their own critical faith based ethics Calling on original thought provoking analyses and arguments Richard L Fern frames a philosophical ethics of nature assesses it scientifically finds support for it in traditional biblical theism and situates it culturally Though defending the moral value of beliefs affirming the radical Otherness of God and human uniqueness this book aims not to compel the adoption of any particular ethic but rather illumine the contribution diverse forms of inquiry make to an ethics of nature How does philosophy clarify moral conviction What does science tell us about nature Why does religious faith matter Rejecting the illusion of a single rationally compelling ethics Fern answers these questions in a way that fosters both agreement and disagreement allowing those holding conflicting ethics of nature to work together for the common good

Water Resources and Inter-Riparian Relations in the Nile Basin Okbazghi Yohannes, 2009-01-01

Human demand for water resources is rising at an alarming rate in response to rapid population growth rival development requirements and the depletion of ecological resources In this book Okbazghi Yohannes examines the various facets of the competition for water resources among the ten Nile River Basin countries as they compete to harness the river s resources

for purposes of irrigation based agriculture and hydropower based industrialization Through a careful investigation of the rival states strategies to capture greater shares of water resources Yohannes assesses the lasting impact on the watershed ecology in the basin and on the hydrological demand of the river itself He proposes the formation of a radically different water regime to address the looming demographic crisis the stark regional food insecurity and the region s collapsing hydro ecology This book shows how the effort to construct a regional water regime cannot be separated from the necessity to construct an ecologically sustainable internal water regime in each co basin state particularly in terms of ecological resources conservation and ecosystem services protection

Spirit and Nature Timothy Hessel-Robinson, Ray Maria McNamara, 2011-08-01 Spirit and Nature is a collection of essays exploring how the resources of Christian spirituality can inform the practice of a more ecologically sustainable faith Our current ecological situation calls for people of religious faith to reexamine the way they envision the practice of spirituality As environmental ethicists have called us to reconsider the human Earth relationship so that the planet is not seen as simply an endless supply of resources to fill human wants and needs so these essays call us to reconsider spiritual practice as it relates to Earth s ecology Rather than viewing spirituality as an escape from the material world the authors describe the embodiment of the God quest within the human nature relationship Drawing on diverse disciplinary perspectives these essays examine a variety of topics including the relationship between Earth and humans in the Bible the role of nature s beauty in Christian spirituality the practice of Christian discernment and contemplation in light of the natural sciences the role of nature in liturgical prayer and others These essays consider how scholarship in Christian spirituality can contribute to re imaging faith in ways that better cherish the Earth s fragile beauty

provocative edge that has made him a vital and distinctive Christian voice Hauerwas's *Performing the Faith* allows him to cast a retrospective eye on his work At the same time in a brilliant essay under the title of the book he develops a profoundly important description of faithfulness Dennis O'Brien University of Rochester Stanley Hauerwas is the Gilbert T Rowe Professor Emeritus of Theological Ethics at Duke Divinity School Duke University [Biodiversity Conservation Ethics in Major Religions](#) H. S. A. Yahya, 2010-10-22 Covering three broader issues biodiversity conservation religious doctrine and environment the book *Biodiversity Conservation Ethics in Major Religions* is the result of a unique approach It attempts to initiate scientific discourse through the fabric of religions Spread across 15 chapters the book covers the essence of 10 religions on biodiversity encompassing a wide range of issues related to conservation The book promises to be a useful resource for biodiversity students researchers and protected area managers and also for religious scholars who are invited to look at the broader themes of religions beyond theology **Immanent Transcendence** Patrice Haynes, 2012-08-23 Over the last twenty years materialist thinkers in the continental tradition have increasingly emphasized the category of immanence Yet the turn to immanence has not meant the wholesale rejection of the concept of transcendence but rather its reconfiguration in immanent or materialist terms an immanent transcendence Through an engagement with the work of Deleuze Irigaray and Adorno Patrice Haynes examines how the notion of immanent transcendence can help articulate a non-reductive materialism by which to rethink politics ethics and theology in exciting new ways However she argues that contrary to what some might expect immanent accounts of matter and transcendence are ultimately unable to do justice to material finitude Indeed Haynes concludes by suggesting that a theistic understanding of divine transcendence offers ways to affirm fully material immanence thus pointing towards the idea of a theological materialism [Principles and Practice of Fertility Preservation](#) Jacques Donnez, S.
