Nature Risk And Responsibility Discourses Of Biotechnology:

Nature, Risk and Responsibility Patrick O'Mahony, 2020-09-29 This book explores ethical interpretations of biotechnology and examines whether sufficient consensus exists or is emerging to enable this technology to occupy a stable role in the techno economic social and cultural order It employs a wide range of social theories to evaluate risks *Hybrid Geographies* Sarah Whatmore, 2002-08-20 *Hybrid Geographies* is one of the most original and important contributions to our field in the last 30 years At once immensley provocative and productive it is written with uncommon clarity and grace and promises to breathe new life not only into geographical inquiry but into critical practice across the spectrum of the humanities and social sciences and beyond An extraordinary achievement Professor Derek Gregory Department of Geography University of British Columbia *Hybrid Geographies* critically examines the opposition between nature and culture the material and the social as represented in scientific environmental and popular discourses Demonstrating that the world is not an exclusively human achievement *Hybrid Geographies* reconsiders the relation between human and non human the social and the material showing how they are intimately and variously linked General arguments informed by work in critical geography feminist theory environmental ethics and science studies are illustrated throughout with detailed case study material This exemplifies the two core themes of the book a consideration of hybridity the human non human relation and of the fault lines in the spatial organization of society and nature *Hybrid Geographies* is essential reading for students in the social sciences with an interest in nature space and social theory *Analysing Citizenship Talk* Heiko Hausendorf, Alfons Bora, 2006-02-15 *Citizenship talk* refers to various types of discourse initiated to make citizens take part in politically and socially contested decision making processes citizen participation *Citizenship* has accordingly become one of the dazzling key words whenever the democratic deficit of modern societies is moaned about Asking for citizenship to be conceived of as a communicative achievement the present book shows that sociolinguistics and pragmatics can essentially contribute to this interdisciplinary up to date issue of research the volume offers a theoretically innovative concept of communicated citizenship and it presents a set of methodological approaches suited to deal with this concept at an empirical level including contributions from Conversation Analysis Critical Discourse Analysis Social Positioning Theory Speech Act Theory and Ethnography Furthermore concrete data and empirical analyses are provided which take up the case of decision making processes around the application of modern green biotechnology GMO field trials The volume thus illustrates the kind of findings and results that can be expected from this new and promising approach towards citizenship talk *Living Factories* Kenneth Fish, 2013 How biotechnology is changing the definition of life *The Fragility of Modern Societies* Nico Stehr, 2001-05-14 This book argues that knowledge is now central to the modern economy and its productive processes It is also essential for social relations social cohesion and conflict resolution We have moved from a society based around heavy commodities to symbolic goods from situated markets to non place specific locations from machines to software and from

things to ideas These changes produce new forms of social interaction and new perspectives on identity practice and association This penetrating book slices through the cliches and blind alleys of discussions around the knowledge society to reveal the tendons of contemporary change Written with insight and panache the book explains the momentous nature of the changes associated with the knowledge society

Social Theory, Health and Healthcare Orla McDonnell, Maria Lohan, Abbey Hyde, 2009-06-30 Health research education and provision have become increasingly interdisciplinary over the last few years leading health professionals to broaden their knowledge beyond technical aspects of care Practitioners now need a clear understanding of how society can affect health and an appreciation of how societal structures can drive healthcare practices In a clear systematic and accessible style this timely text looks at the social context of health and healthcare by Analysing a wide range of classic and contemporary theories Identifying the relevance of each theory to health Showing how theory has been used in research Outlining the impact of theory on health and health provision Specifically written for health professionals and those engaged in health studies research this book will help students and practitioners alike understand the sociology of health and illness and enable them to critically assess health issues policies and practices

Looking to the Future Derek Hodson, 2011-10-25 In advocating an action oriented and issues based curriculum this book takes the position that a major but shamefully neglected goal of science and technology education is to equip students with the knowledge skills attitudes and values to confront the complex and often ill defined socioscientific issues they encounter in daily life as citizens in an increasingly technology dominated world carefully critically confidently and responsibly In outlining proposals for addressing socioscientific issues through a curriculum organized in terms of four increasingly sophisticated levels of consideration the author adopts a highly critical and politicized stance towards the norms and values that underpin both scientific and technological development and contemporary scientific engineering and medical practice criticizes mainstream STS and STSE education for adopting a superficial politically naive and hence educationally ineffective approach to consideration of socioscientific issues takes the view that environmental problems are social problems occasioned by the values that underpin the ways in which we choose to live and urges teachers to encourage students to reach their own views through debate and argument about where they stand on major socioscientific issues including the moral ethical issues they often raise More controversially the author argues that if students are to become responsible and politically active citizens the curriculum needs to provide opportunities for them to experience and learn from sociopolitical action The relative merits of direct and indirect action are addressed notions of learning about action learning through action and learning from action are developed and a case is made for compiling a user friendly database reflecting on both successful and less successful action oriented curriculum initiatives Finally the book considers some of the important teacher education issues raised by this radically new approach to teaching and learning science and technology The book is intended primarily for teachers and student teachers of science technology and environmental education graduate students and

researchers in education teacher educators curriculum developers and those responsible for educational policy The author is Emeritus Professor of Science Education at the Ontario Institute for Studies in Education University of Toronto Adjunct Professor of Science Education at the University of Auckland and Visiting Professor of Science Education at the University of Hong Kong His research interests include considerations in the history philosophy and sociology of science and their implications for science and technology education STSE education and the politicization of both students and teachers science curriculum history multicultural and antiracist education and teacher education via action research

Becoming Biosubjects Neil Gerlach, Sheryl Hamilton, Rebecca Sullivan, Priscilla Walton, 2011-01-01 *Becoming Biosubjects* examines the ways in which the Canadian government media courts and everyday Canadians are making sense of the challenges being posed by biotechnologies The authors argue that the human body is now being understood as something that is fluid and without fixed meaning This has significant implications both for how we understand ourselves and how we see our relationships with other forms of life Focusing on four major issues the authors examine the ways in which genetic technologies are shaping criminal justice practices how policies on reproductive technologies have shifted in response to biotechnologies the debates surrounding the patenting of higher life forms and the Canadian and global response to bioterrorism Regulatory strategies in government and the courts are continually evolving and are affected by changing public perceptions of scientific knowledge The legal and cultural shifts outlined in *Becoming Biosubjects* call into question what it means to be a Canadian a citizen and a human being

Communicative Reason Patrick O'Mahony, 2024-09-30 The book examines philosophical and sociological approaches within critical theory and more widely from the vantage point of communicative reason It seeks to revitalize the sociological dimension of critical theory by advancing a critical sociology of reason It does so fully in the knowledge that reason is a contentious concept in sociology and other disciplines Nonetheless building on Habermas's original insight it argues that an extensively modified version of communicative reason is indispensable This modified approach will draw extensively from Peirce's pragmatist semiotics and critical cognitive sociology Such a focus has significant implications for meta-theoretical theoretical empirical and methodological approaches in critical theory critical sociology and related disciplines This book will be of interest to readers in the social sciences humanities and philosophy who value the importance of a social theory of a reasonable society for their disciplines and for increasingly essential interdisciplinary activities The book will also appeal to many in critical theory and beyond who are interested in the cognitive foundations of normative orders including unjust or pathological as well as actually or potentially just foundations The book emphasizes both validity and critique within communicative reason and critical theory and accordingly presents a distinctive perspective on critical reconstructive research

Knowledge Politics Nico Stehr, 2015-12-03 This book argues that new technologies and society's response to them have created a relatively new phenomenon knowledge politics Nico Stehr describes Western society's response to a host of new technologies developed

only since the 1970s including genetic experiments test tube human conception recombinant DNA and embryonic stem cells genetically engineered foods neurogenetics and genetic engineering and reproductive cloning and the reconstruction of the human ancestral genome He looks also at the prospective fusion of nanotechnology biotechnology information technology transgenic human engineering and cognitive science whose products may as its boosters claim some day cure disease slow the aging process eliminate pollution and generally enhance human performance Knowledge Politics shows how human civilization has reached a new era of concern about the life altering potentials of new technologies Concerns about the societal consequences of an unfettered expansion of natural scientific knowledge are being raised more urgently and are moving to the center of disputes in society and thus to the top of the political agenda Stehr explains the ramifications of knowledge politics and the approaches society could take to resolve difficult questions and conflicts over present and future scientific innovation

Transnationalising Reproduction Roisin Ryan Flood, Jenny Gunnarsson Payne, 2018-06-28 Third party conception is a growing phenomenon and provokes a burgeoning range of ethical legal and social questions What are the rights of donors recipients and donor conceived children How are these reproductive technologies regulated How is kinship understood within these new family forms Written by specialists from three different continents Transnationalising Reproduction examines a broad range of issues concerning kinship and identity citizenship and regulation and global markets of reproductive labour including gamete donation and gestational surrogacy Indeed this book seeks to highlight how reproductive technologies not only makes possible new forms of kinship and family formations but also how these give rise to new ethical political and legal dilemmas about parenthood as well as new modes of discrimination and a re distribution of medical risks It also thoroughly investigates the ways in which a commodification of reproductive tissue and labour affects the practices representations and gendered self understandings of gamete donors fertility patients and intended parents in different parts of the world With a broad geographical scope Transnationalising Reproduction offers new empirical and theoretical perspectives on third party conception and demonstrates the need for more transnational approaches to third party reproduction This volume will appeal to postgraduate students and postdoctoral researchers interested in fields such as Gender Studies Health Care Sciences Reproductive Technology and Medical Sociology

New Femininities R. Gill, C. Scharff, 2013-05-31 This collection of original essays looks at the way in which experiences and representations of femininity are changing and explores the possibilities for producing new femininities in the twenty first century The volume includes a Preface by leading feminist scholar Angela McRobbie

Democratic Transgressions of Law, 2010-01-25 Participation of concerned actors and the public is a central element in the legal regulation of science and technology In constitutional democracy these participatory forms are governed by the rule of law The volume critically examines participatory governance in this realm and makes suggestions with respect to further institutional and political cultural developments It assembles contributions of a broad interdisciplinary range within a comparative research programme opening the black box

of participatory governance in legal procedure The contributions are the result of almost a decade of fruitful discussion between the authors They also demonstrate the potential of a cross disciplinary approach that stretches from sociology via political science and jurisprudence to hermeneutics linguistics and conversation analysis Contributors are Gabriele Abels Matthias Baier Alfons Bora Elena Collavin Heiko Hausendorf Zsuzsanna Iv nyi Andr s Kert sz Les Levidow Korn lia Marinecz Peter M nte Patrick O Mahony Giuseppe Pellegrini and Henrik Rahm Technology and Cultural Values Peter D. Hershock, Marietta Stepaniants, Roger T. Ames, 2003-10-31 Recent history makes clear that the quantum leaps being made in technology are the leading edge of a groundswell of paradigm shifts taking place in science politics economics social institutions and the expression of cultural values Indeed it is the simultaneity and interdependence of these changes occurring in every dimension of human experience and endeavor that makes the present so historically distinctive The essays gathered here give voice to perspectives on the always improvised relationship between technology and cultural values from Africa the Americas Asia Australia Europe and the Pacific Contributors Syed Muhammad Naquib Al Attas Roger T Ames Yoko Arisaka Carl Becker Francesca Bray James Buchanan Arindam Chakrabarti Frank W Derringham Rolf Elberfeld Charles Ess Andrew Feenberg Susantha Goonatilake H Jiuan Heng Peter Hershock Thomas P Kasulis George Khushf David Farrell Krell Joel J Kupperman William R LaFleur Lois Ann Lorentzen David Loy Joseph Margolis Hans Georg M ller Robert Cummings Neville Peimin Ni Monica Atieno Opole Kuruvilla Pandikattu SJ Helen Petrovsky Ramon Sentmart Kristin Shrader Frechette Vasanthi Srinivasan Marietta Stepaniants Vyacheslav S Stiopin Henk ten Have Paul B Thompson Mary Tiles David B Wong

Bioethics Marcus Düwell, 2013 This book is a philosophically oriented introduction to bioethics It offers the reader an overview of key current debates in bioethics in the areas including organ retrieval stem cell research justice in healthcare and issues in environmental ethics including issues surrounding food and agriculture The book also seeks to go beyond describing the issues in order to provide the reader with the methodological and theoretical tools for a more comprehensive understanding of bioethical debates The book investigates the theoretical foundations and normative implications of bioethical debates and situates the areas of ethics into their philosophical context *Modernity and Postmodernity* Gerard Delanty, 2000-04-19 This accessible and comprehensive overview of the main issues on the modernity postmodernity controversy is the first clear sighted book on the subject It surveys modern social theory from Kant to Weber with economy and masterly precision And evaluates the work of the Frankfurt School Arendy Strauss Luhmann Habermas Heller Castoriadis and Touraine before moving on to consider the approaches of the leading writers on postmodernity Lyotard Vattimo Derrida Foucault and Jameson The result is a new way of conceptualizing the modernity postmodernity debate and an exciting new approach to the roots of contemporary social theory **Social Theory in a Changing World** Gerard Delanty, 2013-05-08 This book provides a critical assessment of contemporary social theory for students in the social sciences Delanty examines the writings of a number of key contemporary thinkers including Habermas Foucault Bauman Touraine

Giddens and Beck and provides a clear account of the strengths and limitations of their work **Lesbian Motherhood**
Róisín Ryan-Flood,2009-05-27 This book studies the growing number of lesbian women embarking on parenthood after coming out Theoretical debates about lesbian motherhood often consider its assimilative or transgressive dimensions This book offers a different approach contextualising lesbian motherhood in relation to sexual citizenship and hegemonic discourses of kinship Molecular Models of Life Sahotra Sarkar,2007-01-26 Despite the transformation in biological practice and theory brought about by discoveries in molecular biology until recently philosophy of biology continued to focus on evolutionary biology When the Human Genome Project got underway in the late 1980s and early 1990s philosophers of biology unlike historians and social scientists had little to add to the debate In this landmark collection of essays Sahotra Sarkar broadens the scope of current discussions of the philosophy of biology viewing molecular biology as a unifying perspective on life that complements that of evolutionary biology His focus is on molecular biology but the overriding question behind these papers is what molecular biology contributes to all traditional areas of biological research Molecular biology described with some foresight in a 1938 Rockefeller Foundation report as a branch of science in which delicate modern techniques are being used to investigate ever more minute details and its modeling strategies apparently argue in favor of physical reductionism Sarkar s first three chapters explore reductionism defending it but cautioning that reduction to molecular interactions is not necessarily a reduction to genetics and does not support the claims of either hereditarianism or environmentalism The next sections of the book discuss function exploring how functional explanations pose a problem for reductionism the informational interpretation of biology and how it interacts with reductionism and the tension between the unifying framework of molecular biology and the received framework of evolutionary theory The concluding chapter is an essay in the emerging field of developmental evolution exploring what molecular biology may contribute to the transformation of evolutionary theory as evolutionary theory takes into account morphogenetic development **Ibss:**
