cultural heritage and as a dynamically interconnected ecosystem which is at the same time the historic site of significant developments in fieldwork and natural science This collection situates these cultures of the Atlantic edge in a series of essays that create new contexts for coastal study in literary history and criticism The contributors frame their research in response to emerging conversations in archipelagic criticism the blue humanities and island studies the essays challenging the reader to reconsider ideas of margin periphery and exchange These twelve case studies establish the coast as a crucial location in the imaginative history of Britain Ireland and the north Atlantic edge Coastal Works will appeal to readers of literature and history with an interest in the sea the environment and the archipelago from the 18th century to the present Accessible innovative and provocative Coastal Works establishes the important role that the coast plays in our cultural imaginary and suggests a range of methodologies to represent relationships between land sea and cultural work **Teaching with**
