Nature Western Attitudes Since Ancient Times Themes In History:

Nature Peter Coates,1998 Nature is a deceptively simple and ahistorical term suggesting intrinsic unchanging reality Yet nature has a history too both in terms of human attitudes and human impacts Coates outlines the major understandings of nature in the western world since classical times from nature as higher authority to its more recent meaning of threatened physical space and life forms Unlike many others this book places the history of attitudes to nature within the story of human induced changes in the material environment And few others take a supranational perspective or cross the divides between historical eras A distinctive unifying theme is Coates s interest in how green writers over the last thirty years have interpreted our past dealings with nature specifically their efforts to diagnose the roots of contemporary ecological problems and their search for ancestors He concludes with a discussion of the future of nature in the context of developments such as the new ecology global warming advances in genetic engineering and research on animal behaviour Assuming no previous knowledge Nature provides the reader with an accessible synthesis and introduction to some of environmental history s central features and debates confirming its status as one of the most enthralling current pursuits within historical studies This will be essential reading for second year undergraduates and above in cultural history and environmental history as well as to the general reader interested in environmental issues

Disease and the Modern World: 1500 to the Present Day Mark Harrison,2013-05-02 Mark Harrison s book illuminates the threats posed by infectious diseases since 1500 He places these diseases within an international perspective and demonstrates the relationship between European expansion and changing epidemiological patterns The book is a significant introduction to a fascinating subject Gerald N Grob Rutgers State University In this lively and accessible book Mark Harrison charts the history of disease from the birth of

the modern world around 1500 through to the present day He explores how the rise of modern nation states was closely linked to the threat posed by disease and particularly infectious epidemic diseases He examines the ways in which disease and its treatment and prevention changed over the centuries under the impact of the Renaissance and the Enlightenment and with the advent of scientific medicine For the first time the author integrates the history of disease in the West with a broader analysis of the rise of the modern world as it was transformed by commerce slavery and colonial rule Disease played a vital role in this process easing European domination in some areas limiting it in others Harrison goes on to show how a new environment was produced in which poverty and education rather than geography became the main factors in the distribution of disease Assuming no prior knowledge of the history of disease Disease and the Modern World provides an invaluable introduction to one of the richest and most important areas of history It will be essential reading for all undergraduates and postgraduates taking courses in the history of disease and medicine and for anyone interested in how disease has shaped and has been shaped by the modern world

Militarized Landscapes Chris Pearson, Peter Coates, Tim Cole, 2010-06-03 The black smoke billowing from burning oil wells during the Gulf War of 1990 91 directed media and public attention towards war's devastating environmental impact Yet even before the first bomb is dropped preparation for warfare materially and imaginatively reshapes rural landscapes and environments This volume is the first to explore the comparative histories and geographies of militarized landscapes Moving beyond the narrow definition of militarized landscapes as theatres of war it treats them as simultaneously material and cultural sites that have been partially or fully mobilized to achieve military aims Ranging from the Korean DMZ to nuclear testing sites in the American West and from Gettysburg to Salisbury Plain *Militarized Landscapes* focuses on these often secretive hidden dangerous and invariably controversial sites that occupy huge swathes of national territories

The Environment Philip W. Sutton, 2007-04-16 Philip Sutton shows how questions about the environment cannot be properly answered without taking a sociological approach He provides a comprehensive guide to the ways in which sociologists have responded to the challenge of environmental issues as diverse as global warming ozone depletion marine pollution
