plant depiction emerged and ultimately gave rise to practices now recognized as central to modern botanical illustration. The author draws on centuries of remarkable and varied documentation from across Europe and the Mediterranean. Lavishly illustrated *Botanical Icons* marshals ample evidence for a dynamic and critical tradition of botanical inquiry and nature observation in the late antique and medieval Mediterranean. The author reveals that many of the critical practices characteristic of modern botanical illustrations began in premodern manuscript culture. Consequently, he demonstrates that the distinctions between pre and early modern botanical illustration center more on the advent of print, the expansion of collections and documentation, and the narrowing of the range of accepted forms of illustration than on the invention of critical and observational practices exclusive to modernity. Griebeler's emphasis on continuity, intercultural collaboration, and the gradual transformation of Mediterranean traditions of critical botanical illustration persuasively counters previously prevalent narratives of rupture and Western European exceptionalism in the histories of art and science.

The fourth section provides an international bio-bibliographical lexicon of the most prominent medievalists in all disciplines. A comprehensive bibliography rounds off the compendium. The result is a reference work which exhaustively documents the current status of research in medieval studies and brings the disciplines and experts of the field together.

Intelligent Action Timothy Ridlen, 2024-06-14 Through archival research and analysis of artworks by Gyorgy Kepes, Allan Kaprow, Mel Bochner, and Suzanne Lacy among others, *Intelligent Action* examines how these artists brought alternatives to dominant conceptions of research and knowledge production. The book is organized around specific institutional formations: artistic research centers, proposals, exhibitions on college campuses, and the establishment of new schools or pedagogic programs. Formal and social analysis demonstrate how artists responded to ideas of research, knowledge production, information, and pedagogy. Works discussed were produced between 1958 and 1975, a moment when boundaries between media were breaking down in response to technological, cultural, and generational change. In the context of academia, these artistic practices have taken up the look, feel, or language of various research and teaching practices. In some cases, artists bent to the demands of the cold war research university, while in others, artists developed new modes of practice and pedagogy. Reading these works through their institutional histories, author Tim Ridlen shows how artistic research practices and artistic subjectivity developed in the long 1960s within and alongside academia, transforming the role of artists in the process.
