Gold's enduring value makes it an attractive investment.

AVERAGE ANNUAL NET DEMAND FOR GOLD, GLOBALLY

Source: Metals Focus, Refinitiv GFMS, World Gold Council  
Note: Based on 10-year average annual net demand estimates ending in 2022.

Physical gold assets like bars, coins, ETFs, and central bank reserves make up a nearly \$5 trillion market.

## THE ENVIRONMENTAL COST OF GOLD MINING

### POLLUTION

126,359,000 CO<sub>2</sub>e tonnes in annual emissions.

Physical gold assets are mined and extracted only to be stored in gold vaults. This raises the question: Is the environmental cost justified?

But the mining of gold brings with it significant environmental concerns.

### DEFORESTATION

3,520 km<sup>2</sup> of land was deforested through the expansion of gold mining areas between 2000 and 2019.

### WASTE

99% of ore from gold mining is waste, which can be toxic.

## THE SOLUTION A DIGITAL GOLDMINE

Investors can now add a gold-linked value to their portfolio without the environmental toll of mining.

So, how do you build a digital goldmine?

### STEP 1

Identify and evaluate mining rights with independently quantified gold deposits.

Source: WWF, World Gold Council, NBT, Nature's Vault

### STEP 2

Acquire and maintain unencumbered legal titles to mining rights to prevent sale or exploitation of the underlying gold deposits.

### STEP 3

Create gold-linked assets by tokenizing mineral rights and preserving in-ground gold using blockchain and asset fractionalization.

The NaturesGold Token and Pistol Lake NFT gold-linked assets make gold preservation profitable, merging tradition with innovation.

## Natures Goldmine:

**The Nature of Gold** Kathryn Morse, 2009-11-23 In 1896 a small group of prospectors discovered a stunningly rich pocket of gold at the confluence of the Klondike and Yukon rivers and in the following two years thousands of individuals traveled to the area hoping to find wealth in a rugged and challenging setting Ever since that time the Klondike Gold Rush especially as portrayed in photographs of long lines of gold seekers marching up Chilkoot Pass has had a hold on the popular imagination In this first environmental history of the gold rush Kathryn Morse describes how the miners got to the Klondike the mining technologies they employed and the complex networks by which they obtained food clothing and tools She looks at the political and economic debates surrounding the valuation of gold and the emerging industrial economy that exploited its extraction in Alaska and explores the ways in which a web of connections among America s transportation supply and marketing industries linked miners to other industrial and agricultural laborers across the country The profound economic and cultural transformations that supported the Alaska Yukon gold rush ultimately reverberate to modern times The story Morse tells is often narrated through the diaries and letters of the miners themselves The daunting challenges of traveling working and surviving in the raw wilderness are illustrated not only by the miners compelling accounts but by newspaper reports and advertisements Seattle played a key role as gateway to the Klondike A public relations campaign lured potential miners to the West and local businesses seized the opportunity to make large profits while thousands of gold seekers streamed through Seattle The drama of the miners journeys north their trials along the gold creeks and their encounters with an extreme climate will appeal not only to scholars of the western environment and of late 19th century industrialism but to readers interested in reliving the vivid adventure of the West s last great gold rush

The appearance of gold in nature Lin Chi Chou, 林其周, The content of gold in the earth s crust is only 0.011 ppm and it is unevenly distributed that is only under special geological conditions can there be gold mines plus people think that gold is beautiful so it is cherished by people In this topic we introduce gold samples from major gold producing areas as well as the principles of detecting gold deposits and the formation of gold deposits The features of this book are 1 A more comprehensive introduction to the famous and unique gold mines on the earth This book is undoubtedly a good reference for friends who want to get to know the gold mines 2 It contains an introduction to the unique gold mines in Taiwan s Jinguashi and Jiufen This is the first time that gold mines in this place have been fully presented through a book I would like to thank the Jinjiu mineral collector Zhang Yingjie Xia Guoxiong old miner Chen Huosheng old miner and others for providing specimens and assistance Let the only remaining orphans in the gold mines here once again give the world a chance to appreciate them 3 Although some foreign gold mines are not as exaggerated as orphans they are also extremely rare Some of them are not in the gallery They are collected from more than 50 countries more than 300 mines or places and thousands of gold mines The exquisite products selected from the specimens can be said to be beautiful Taiwan s early textbooks stated that Taiwan lacked metal minerals and only a small

amount of gold and copper was produced in Ruifang It was not until the autumn of 1991 that my wife and I first visited Jinjiu Jinkuashi and Jiufen are collectively called Jinjiu is also the area where Ruifang produces gold and copper that this introduction is very incorrect At that time it was not long before the Jinguashi Gold Mine ceased production 1987 and it was in a state of depression With a feeling of learning and care I asked the old miners about the relevant knowledge and information about the gold mine As a result I found that the old miners only knew how to mine gold but don t know much about the relevant academic principles I originally thought that the reports or writings of government agencies and academic institutions could be fully accountable but the situation was not satisfactory Since I have been interested in chemistry for a long time it can be considered a little basic so I met with the old miners to help solve the mystery of the Jinguashi gold mine In the next 20 years as long as there is no work I rode a motorcycle from Taoyuan to Jinguashi exploration and discuss with old miners nearly 800 round trips Thirty years have passed this book is considered complete and finally the promise of the year has been fulfilled Lin Chi Chou was born on January 22 1958 in New Taipei City Taiwan Graduated from the Department of Nuclear Engineering National Tsinghua University in 1980 After leaving the army in 1982 I devoted myself to science education Currently the curator of Taoyuan Mineral Museum If readers have comments please contact me at jinbee1103 gmail com
