worldviews with contemporary conservation practices and approaches The chapters focus on the modern significance of sacred natural sites in Asian protected areas with reference where appropriate to an Asian philosophy of protected areas Drawn from over 20 different countries the book covers examples of sacred natural sites from all of IUCN's protected area categories and governance types The authors demonstrate the challenges faced to maintain culture and support spiritual and religious governance and management structures in the face of strong modernisation across Asia The book shows how sacred natural sites contribute to defining new more sustainable and more equitable forms of protected areas and conservation that reflect the worldviews and beliefs of their respective cultures and religions The book contributes to a paradigm shift in conservation and protected areas as it advocates for greater recognition of culture and spirituality through the adoption of biocultural conservation approaches
