Nature's Hidden Force George Land,Beth Jarman,2014-07-30 A stunning new take on the old science vs spirituality debate Land and Jarman begin by demolishing one of the sacred cows of physics entropy the idea that the universe is irreversibly headed toward a whimpering heat death Using rigorous scientific methods they show that the universe isn't falling apart after all it's getting better all the time They next take on Einstein's theory of relativity explaining in simple terms how quantum mechanics describes a universe that isn't a giant clockwork but something far more profound a combination of past cause and Future Pull What does all this science have to do with spirituality Everything Land and Jarman label nature's impulse for overcoming entropy and pulling us into the future Creative Connecting A force as scientifically real and demonstrable as gravity and far more worthy of reverence than any ghost dreamed up by an ancient religion Think of your most memorable moments of deep spirituality watching a sunset being moved by music That powerful feeling you experience is being at one with the universe In other words a sense of connecting What's the best part of religious teaching Love thy neighbor more connecting Land and Jarman prove that you don't have to give up on science to be truly spiritual you just have to get it right And you don't have to be ashamed of your spiritual side if you want to live your life according to empirical reality you just have to revere the force in nature that really exists

Placing Modern Greece Constanze Guthenke,2008-02-07 *Placing Modern Greece* is about literary representations of Greece in the period of Romanticism encompassing the time in the 1820s when it became a territorial and political reality as a nation state Constanze Guthenke claims that the imagining of and attitude towards Greece was shaped by a fascination with the material and by the highly conceptualized tension between the ideal on the one hand and the material on the other Her study focuses on nature and landscape imagery as vehicles of representation on their specific inner workings and on their dynamic which conditions how and whether Greece as a modern entity in the making can be represented at all Offering readings from German and contemporaneous Greek authors Guthenke supplies a commentary on the translation and crossings of representational models and their limits

The Shepherd, the Volk, and the Middle Class Elystan Griffiths,2020 Analyzes the transformation of German language pastoral from a portrayal of the idyllic lives of herdsmen into a vehicle for the concerns and aspirations of the middle class

This Gulf of Fire Mark Molesky,2016-10-18 Winner of the Phi Alpha Theta Best Subsequent Book Award A Los Angeles Times Book Prize Finalist The captivating and definitive account of the Great Lisbon Earthquake the most consequential natural disaster of modern times On All Saints Day 1755 tremors from an earthquake measuring approximately 9.0 or perhaps higher on the magnitude scale swept furiously toward Lisbon then one

of the wealthiest cities in the world and the capital of a vast global empire Within minutes much of the city lay in ruins A half hour later a giant tsunami unleashed by the quake smashed into Portugal's coastline and barreled up the Tagus River carrying countless thousands out to sea To complete Lisbon's destruction a hellacious firestorm then engulfed the city's shattered remains killing thousands more and incinerating much of what the earthquake and tsunami had spared Drawing on a wealth of new sources the latest scientific research and a sophisticated grasp of European history Mark Molesky gives us the gripping authoritative account of the Great Lisbon Earthquake disaster and its impact on the Western world including descriptions of the world's first international relief effort the rise of a brutal yet modernizing dictatorship in Portugal and the effect of the catastrophe on the spirit and direction of the European Enlightenment **A Mist Connection** Katrin Kleemann, 2023-06-06 In the summer of 1783 an unusual dry fog descended upon large parts of the northern hemisphere The fog brought with it bloodred sunsets a foul sulfuric odor and a host of other peculiar weather events Inspired by the Enlightenment many naturalists attempted to find reasonable explanations for these occurrences Between 8 June 1783 and 7 February 1784 a 27 kilometer long fissure volcano erupted in the Icelandic highlands It produced the largest volume of lava released by any volcanic eruption on planet Earth in the last millennium In Iceland the eruption led to the death of one fifth of the population The jetstream carried its volcanic gases further afield to Europe and beyond where they settled as a fog the origin of which puzzled naturalists and laypersons A Mist Connection is an environmental history that documents the Laki eruption and its consequences for Iceland and the wider world The book combines methods of historical disaster research climate history global history history of science and geology in an interdisciplinary approach Icelandic flood lava eruptions of this scale have a statistical recurrence period of 200 to 500 years it is crucial to understand their nature so that we can prepare for the next one An eruption of this magnitude would surely be disastrous for our modern globalized and interconnected world *Anti-Money Laundering and Counter-Terrorism Financing* Abdul Abubakar, 2015-10-19 The international community has witnessed the use of increasingly sophisticated methods to move illicit funds through the financial systems across the globe some of which are used to finance terrorism The continued abuse of some off shore financial centres and the proliferation of internet banking have further increased the need for more effective detection and checks on money laundering and terrorist financing schemes Left unchecked some perpetrators expand their criminal pursuits fostering such illegal activities as corruption drug trafficking human trafficking arms trafficking smuggling and terrorism The book focuses on among other related matters the relative effectiveness of Nigerian laws in curbing money laundering and terrorist financing as well as the extent of compliance with international legal standards for combating money laundering and terrorist financing including creating a legislative and enforcement framework for the implementation of international instruments for combating both menaces The general conclusion is in spite of the efforts much is still left to be done The Infinite Nature of Man Rolf A.
