Natures Pharmacy For Animals:

Nature's Pharmacy for Animals:Second Edition Harald W. Tietze,2001

Doctors by Nature Jaap de Roode,2025-03-04

The astonishing story of how animals use medicine and what it can teach us about healing ourselves Ages before the dawn of modern medicine wild animals were harnessing the power of nature s pharmacy to heal themselves Doctors by Nature reveals what researchers are now learning about the medical wonders of the animal world In this visionary book Jaap de Roode argues that we have underestimated the healing potential of nature for too long and shows how the study of self medicating animals could impact the practice of human medicine Drawing on illuminating interviews with leading scientists from around the globe as well as his own pioneering research on monarch butterflies de Roode demonstrates how animals of all kinds from ants to apes from bees to bears and from cats to caterpillars use various forms of medicine to treat their own ailments and those of their relatives We meet apes that swallow leaves to dislodge worms sparrows that use cigarette butts to repel parasites and bees that incorporate sticky resin into their hives to combat pathogens De Roode asks whether these astonishing behaviors are learned or innate and explains why now more than ever we need to apply the lessons from medicating animals it can pave the way for healthier livestock more sustainable habitats for wild pollinators and a host of other benefits Doctors by Nature takes readers into a realm often thought to be the exclusive domain of humans exploring how scientists are turning to the medical knowledge of the animal kingdom to improve agriculture create better lives for our pets and develop new pharmaceutical drugs

Wild Health Cindy Engel,2003-03 As Dr Engel emphasizes in this enticing well referenced and entertaining book Science we can learn a lot about human health by studying animal behavior in the wild Indeed some of the natural holistic and alternative human medicine being practiced today arose through the observation of wild animals In this groundbreaking work Dr Engel points out fascinating parallels between animal and human medicine She offers intriguing examples of how animals prevent and cure sickness and poisonings heal open wounds balance their diets and regulate fertility For instance chimpanzees carefully eat bitter tasting plant medicines that counter intestinal parasites elephants roam miles to find the clay they ingest to counter dietary toxins broken legged chicks have been known to eat analgesic foods that alleviate pain By observing wild health we may discover or rediscover ways to benefit our own health As Craig Stoltz of the Washington Post noted this highly readable assessment triggers more outside the double helix thoughts about human health than anything I ve read recently

Nourishment Fred Provenza, 2018 Reflections on feeding body and spirit in a world of change Animal scientists have long considered domestic livestock to be too dumb to know how to eat right but the lifetime research of animal behaviorist Fred Provenza and his colleagues has debunked this myth Their work shows that when given a choice of natural foods livestock have an astoundingly refined palate nibbling through the day on as many as fifty kinds of grasses forbs and shrubs to meet their nutritional needs with remarkable precision In Nourishment Provenza presents his thesis of the wisdom body a wisdom that links flavor feedback relationships at a cellular level with biochemically rich foods to meet the body's nutritional and medicinal needs Provenza explores the fascinating complexity of these relationships as he raises and answers thought provoking questions about what we can learn from animals about nutritional wisdom What kinds of memories form the basis for how herbivores and humans recognize foods Can a body develop nutritional and medicinal memories in utero and early in life Do humans still possess the wisdom to select nourishing diets Or has that ability been hijacked by nutritional authorities Consumers eager for a quick fix have empowered the multibillion dollar a year supplement industry but is taking supplements and enriching and fortifying foods helping us or is it hurting us On a broader scale Provenza explores the relationships among facets of complex poorly understood ever changing ecological social and economic systems in light of an unpredictable future To what degree do we lose contact with life sustaining energies when the foods we eat come from anywhere but where we live To what degree do we lose the mythological relationship that links us physically and spiritually with Mother Earth who nurtures our lives Provenza's paradigm changing exploration of these questions has implications that could vastly improve our health through a simple change in the way we view our relationships with the plants and animals we eat Our health could be improved by eating biochemically rich foods and by creating cultures that know how to combine foods into meals that nourish and satiate Provenza contends the voices of authority disconnect most people from a personal search to discover the inner wisdom that can nourish body and spirit That journey means embracing wonder and uncertainty and avoiding illusions of stability and control as we dine on a planet in a universe bent on consuming itself
