Kathleen A. Baxter, Marcia Agness Kochel, 2006-11-30 Research indicates boys are interested in reading nonfiction materials yet most children's librarians prefer to booktalk fiction Offering citations for more than 1 100 books Gotcha for Guys deals specifically with books to pique the interest of middle grade boys A series of booktalks are grouped within chapters with like titles such as Creepy Crawly Creatures Disasters and Unsolved Mysteries Action and Innovation and All Things Gross Complete booktalks are presented in a beginning section of chapters 1 9 A second section in each of these chapters contains short annotations and talks for other books of interest and a third section offers lists of well reviewed titles to consider for boys The book is enhanced with book cover art and reproducible lists for teachers and librarians Nature's Yucky! in the Sea Karen Shragg, Lee Ann Landstrom, 2023 Did you know that California Halibuts those silly looking sideways swimming sand dwellers have one eye that moves to the other side of their heads Eewww That's Yucky But hey it's okay Just imagine if it weren't that way The authors go on to explain the benefits of having two eyes on one side if you happen to live at the bottom of the sea Nature's Yucky 4 highlights creepy behaviors and disgusting facts about 16 creatures of the sea and seashore including lightning whelks sharknose gobies and donkey dung sea cucumbers Younger children will love having the book read aloud to them with its alliteration and repeating refrain while older children and adults will appreciate the in depth information contained in the Fun Facts section The most yucky information in the book however is the discussion about plastic in the world's oceans and its effect on sea turtles dolphins and other creatures Readers of the Nature's Yucky series will revel in the disgusting slime of the Pacific Hagfish and then go on to save the planet Japan at Nature's Edge Ian Jared Miller, Julia Adeney Thomas, Brett L. Walker, 2013-07-01 Japan at Nature's Edge is a timely collection of essays that explores the relationship between Japan's history culture and physical environment It greatly expands the focus of previous work on Japanese modernization by examining Japan's role in global environmental transformation and how Japanese ideas have shaped bodies and landscapes over the centuries The immediacy of Earth's environmental crisis a predicament highlighted by Japan's March 2011 disaster brings a sense of urgency to the study of Japan and its global connections The work is an environmental history in the broadest sense of the term because it contains writing by environmental anthropologists a legendary Japanese economist and scholars of Japanese literature and culture The editors have brought together an unparalleled assemblage of some of the finest scholars in the field who rather than treat it in isolation or as a unique cultural community seek to connect Japan to global environmental currents such as whaling world fisheries mountaineering and science mining and industrial pollution and relations with nonhuman animals The contributors assert the importance of the environment in understanding Japan's history and propose a new balance

between nature and culture one weighted much more heavily on the side of natural legacies This approach does not discount culture Instead it suggests that the Japanese experience of nature like that of all human beings is a complex and intimate negotiation between the physical and cultural worlds Contributors Daniel P Aldrich Jakobina Arch Andrew Bernstein Philip C Brown Timothy S George Jeffrey E Hanes David L Howell Federico Marcon Christine L Marran Ian Jared Miller Micah Muscolino Ken ichi Miyamoto Sara B Pritchard Julia Adeney Thomas Karen Thornber William M Tsutsui Brett L Walker Takehiro Watanabe
