Nausea And Vomiting Mechanisms And Treatment:

Nausea and Vomiting: Mechanisms and Treatment Christopher J. Davis, Gerry V. Lake-Bakaar, David G. Grahame-Smith, 2012-12-06 The following papers were presented at an international symposium on the mechanisms and treatment of nausea and vomiting in man held in Oxford in 1984 I believe that this meeting was the first occasion on which representatives from such a wide variety of scientific and clinical specialties had come together to review and debate the spectrum of the vomiting phenomenon An attempt was made to put before an invited international audience all the pertinent facts on the different facets of the topic and then to encourage extensive discussion of the contentious issues The first day of the meeting was devoted to the basic science approach to the problem and the second day to the more clinical aspects This format has been broadly retained in the layout of the book with the addition of summary chapters reviewing each day's contributions and focusing upon areas of particular importance Acknowledgement must here be made to the enormous input from the many participants who either spoke in the debate or rose and themselves gave small presentations in addition to those of the invited speakers The meeting occurred at a time of increasing interest in the problem of nausea and vomiting especially because of its importance in cancer chemotherapy and radiation therapy and even in space travel *Oxford Textbook of Palliative Medicine* Geoffrey W. C. Hanks, 2011-07-21 Emphasising the multi disciplinary nature of palliative care the fourth edition of this text also looks at the individual professional roles that contribute to the best quality palliative care

Medical Management of Cancer-treatment Induced Emesis Mario A. Dicato, 2024-11-01 Nausea and vomiting are two of the most common side effects of anti cancer treatment and the discovery and clinical application of 5 hydroxytryptamine₃ receptor antagonists has transformed the management of these side effects resulting in a much improved quality of life for cancer patients This text presents a detailed overview of the management of cancer treatment induced emesis in a number of different treatment settings and focuses on the mechanisms and use of 5 HT₃ receptor antagonists Contributions are also included from the points of view of the nurse and the patient *Problems of the Gastrointestinal Tract in Anesthesia, the Perioperative Period, and Intensive Care* M.K. Herbert, P. Holzer, N. Roewer, 2012-12-06 After a long period of neglect the gastrointestinal tract is increasingly being recognized as an important target of anesthetics and anesthesia related processes as well as of conditions and treatments related to peri and postoperative period and intensive care Drugs used in anesthesia and intensive care and physiological or pathological changes in the perioperative period affect the digestive system in its function from the pharynx to the colon Prolonged postoperative ileus or stasis of propulsive peristalsis in the critically ill or multiply injured patient may impair enteral nutrition and give rise to complications such as sepsis or multiple organ failure In view of this new understanding of the clinical relevance of gut function we felt that a book on problems of the gastrointestinal tract in anesthesia the perioperative period and intensive care was badly needed The present volume is the product of an international symposium which brought

together physiologists pharmacologists experimental and clinical anesthetists gastroenterologists surgeons and intensive care physicians to discuss all major contemporary aspects of bowel function in health and under the influence of anesthesia surgery and intensive care **Pediatric Gastrointestinal and Liver Disease E-Book** Robert Wyllie,Jeffrey S.

Racsa,Hsiang-Hsuan Michael Yu,2016-12-23 Handbook of Supportive and Palliative Radiation Oncology serves as a practical tool and rapid reference to assist radiation oncology practitioners in direct patient care with common palliative care issues Containing the most recent advances in translational palliative care research each chapter is organized in a succinct fashion to discuss major symptom burdens suggested assessment and various management options Each symptom and disease section is written to be a rapid practical guide for clinicians on the floor The book starts with general approaches in palliative radiation oncology that are followed by a section that focuses on common symptoms in palliative care and their management

The next section of the book is devoted to site and disease specific evaluation intervention and management This handbook provides general guidelines and management recommendations for common clinical vignettes encountered by palliative radiation oncology practitioners and supported by palliative radiation oncology research Concise references are cited to support treatment recommendation Provides a quick reference for the busy clinician Details standard of care resources for researchers of palliative and supportive care Contains updated standards of care for palliative medicine and a list of common medications and dosages Includes a comprehensive index by symptom and condition to facilitate quick reference

Radiation and the Gastrointestinal Tract Andre Dubois, Gregory L. King, David R. Livengood, 1994-11-22 This book evolved from a two day 1993 International Symposium on Radiation and the Gastrointestinal Tract held at the Uniformed Services University of the Health Sciences Bethesda Maryland This area of investigation is particularly important because of growing medical needs and the documented occurrence of accidents involving overexposure of healthy subjects patients Some questions have been answered through cellular and animal research results that lead to hypotheses that have been tested through clinical protocols In an attempt to answer the unresolved questions basic scientists and clinicians describe the data obtained to date present in a critical manner the consensus that has been reached and discuss what still remains to be investigated The book is divided into five parts Overview and Clinical Perspective Emesis Motility Diarrhea and Behavioral Correlates of Gastrointestinal Dysfunction Each part consists of separate discussions on the pathophysiology the methodology and when applicable the clinical relevance of the observations The book provides helpful information to both basic scientists involved in radiobiological research and to clinicians caring for patients exposed to radiation It also serves as an introduction to the subject for young clinical investigators interested in the field and for scientists searching for correlates between their observations and disorders of the gastrointestinal tract

The latest surgical techniques for children with gastrointestinal conditions **Plant Polyphenols** Richard W. Hemingway, Peter E. Laks, 2012-12-06 This book was developed from the proceedings of the 2nd North American Tannin Conference held in Houghton Michigan June 1991 The objective of this conference was to bring together people with a common interest in plant polyphenols and to promote interdisciplinary interactions that will lead to a better understanding of the importance of these substances Another objective of this conference was to extend the tannin family by making special efforts to encourage participation by scientists outside the United States obtain more coverage of the hydrolyzable tannins and further broaden the scope of coverage from the initial concentration on forestry and forest products Comparison of the contents of this book with Chemistry and Significance of Condensed Tannins that resulted from the proceedings of the 1st North American Tannin Conference shows the degree that these objectives were met In developing the second conference care was taken to assure that this book extends rather than duplicates the coverage of the first conference Therefore the two books should be taken together to obtain an up to date coverage of the broad area of chemistry and significance of plant polyphenols Our thanks go to the authors who so kindly contributed chapters and so patiently responded to our requests We thank the Conference Assistance Staff of Michigan Technological University for their help in planning and conducting the conference
