Bahr, 2004-06-24 Utilizing both primary and secondary materials this sourcebook presents the views of the Franciscan missionaries to the Navajo people both in their personal writings and in national publications and mission magazines addressing the Catholic laity and potential donors Select **Doña Tules** Mary J. Gómez, 2007-10-11 Watch the Author Interview on KNME In both the historic record and the popular imagination the story of nineteenth century westward expansion in America has been characterized by notions of annexation rather than colonialism of opening rather than conquering and of settling unpopulated lands rather than displacing existing populations Using the territory that is now New Mexico as a case study Manifest Destinies traces the origins of Mexican Americans as a racial group in the United States paying particular attention to shifting meanings of race and law in the nineteenth century Laura E Gómez explores the central paradox of Mexican American racial status as entailing the law's designation of Mexican

Americans as white and their simultaneous social position as non white in American society She tells a neglected story of conflict conquest cooperation and competition among Mexicans Indians and Euro Americans the region s three main populations who were the key architects and victims of the laws that dictated what one s race was and how people would be treated by the law according to one s race Gomez s path breaking work spanning the disciplines of law history and sociology reveals how the construction of Mexicans as an American racial group proved central to the larger process of restructuring the American racial order from the Mexican War 1846 48 to the early twentieth century The emphasis on white over black relations during this period has obscured the significant role played by the doctrine of Manifest Destiny and the colonization of northern Mexico in the racial subordination of black Americans *General Technical Report RMRS ,1998* **Chaco Canyon** Robert H. Lister, Florence C. Lister, 1981 The first complete account of Chacoan archaeology from the discovery of the ruins by Spanish soldiers in the seventeenth century through the scientific analyses of the 1970s Wastelanding Traci Brynne Voyles, 2015-05-15 Wastelanding tells the history of the uranium industry on Navajo land in the U S Southwest asking why certain landscapes and the peoples who inhabit them come to be targeted for disproportionate exposure to environmental harm Uranium mines and mills on the Navajo Nation land have long supplied U S nuclear weapons and energy programs By 1942 mines on the reservation were the main source of uranium for the top secret Manhattan Project Today the Navajo Nation is home to more than a thousand abandoned uranium sites Radiation related diseases are endemic claiming the health and lives of former miners and nonminers alike Traci Brynne Voyles argues that the presence of uranium mining on Din Navajo land constitutes a clear case of environmental racism Looking at discursive constructions of landscapes she explores how environmental racism develops over time For Voyles the wasteland where toxic materials are excavated exploited and dumped is both a racial and a spatial signifier that renders an environment and the bodies that inhabit it pollutable Because environmental inequality is inherent in the way industrialism operates the wasteland is the other through which modern industrialism is established In examining the history of wastelanding in Navajo country Voyles provides an environmental justice history of uranium mining revealing how just as civilization has been defined on and through savagery environmental privilege is produced by portraying other landscapes as marginal worthless and pollutable Episodes in the Rhetoric of Government-Indian Relations Janice Schuetz, 2002-05-30 Scholarly considerations of the relationship between the United States government and Native Americans have largely ignored the rhetoric utilized by both in the course of their ongoing conflicts This fascinating new study concentrates on the persuasive and public strategies of both government and Indian leaders focusing on the written and oral records of several key episodes in American history This approach which author Janice Schuetz calls rhetorical ancestry reveals the ways in which government and Indian spokespersons have constituted and defined issues created prolonged and managed conflict and silenced and empowered each other s voices Chronicling the emergence of government and Indian leaders who were forced to deal with conflicts in new ways each

chapter makes use of historical evidence to draw inferences about the rhetorical features of the discourse and its effects Both verbal and nonverbal rhetoric including treaties letters oral histories speeches ritual performances media reports biographical narratives protests and demonstrations political hearings and legal proceedings are represented here illuminating a legacy that evolved in the personal and political language of its participants Leslie Marmon Silko's Storyteller Catherine Rainwater,2016-09-15 As American Indian writers frequently remind their readers storytellers wield formidable power to affect the earth and its inhabitants This power is the same medicine power that inheres in tribal expression such as chants prayers and ceremonial rituals Leslie Marmon Silko critics point out modifies literary genres to create the most effective medicine power When Silko s Storyteller first appeared in 1981 critics were baffled by this complex text Today it is a canonical work in the study of American Indian literature The essays collected in this book addressing both the original edition of Storyteller and the 2012 revision use the growth in understanding of Native American literature in general and of Silko s work in particular to unpack this fascinating work and its critical reception over the years
