Working the Navajo Way Colleen O'Neill, 2005-10-20 The Dine have been a pastoral people for as long as they can remember but when livestock reductions in the New Deal era forced many into the labor market some scholars felt that Navajo culture would inevitably decline Although they lost a great deal with the waning of their sheep centered economy Colleen O'Neill argues that Navajo culture persisted O'Neill s book challenges the conventional notion that the introduction of market capitalism necessarily leads to the destruction of native cultural values She shows instead that contact with new

markets provided the Navajos with ways to diversify their household based survival strategies Through adapting to new kinds of work Navajos actually participated in the reworking of modernity in their region weaving an alternate culturally specific history of capitalist development O Neill chronicles a history of Navajo labor that illuminates how cultural practices and values influenced what it meant to work for wages or to produce commodities for the marketplace Through accounts of Navajo coal miners weavers and those who left the reservation in search of wage work she explores the tension between making a living the Navajo way and working elsewhere Focusing on the period between the 1930s and the early 1970s a time when Navajos saw a dramatic transformation of their economy O Neill shows that Navajo cultural values were flexible enough to accommodate economic change She also examines the development of a Navajo working class after 1950 when corporate development of Navajo mineral resources created new sources of wage work and allowed former migrant workers to remain on the reservation Focusing on the household rather than the workplace O Neill shows how the Navajo home serves as a site of cultural negotiation and a source for affirming identity Her depiction of weaving particularly demonstrates the role of women as cultural arbitrators providing mothers with cultural power that kept them at the center of what constituted Navajo ness Ultimately Working the Navajo Way offers a new way to think about Navajo history shows the essential resilience of Navajo lifeways and argues for a more dynamic understanding of Native American culture overall

North American Indian Anthropology Raymond J. DeMallie, Alfonso Ortiz, 1994 These essays explore the blending of structural and historical approaches to American Indian anthropology that characterizes the perspective developed by the late Fred Eggan and his students at the University of Chicago They include studies of kinship and social organization politics religion law ethnicity and art Many reflect Eggan s method of controlled comparison a tool for reconstructing social and cultural change over time Together these essays make substantial descriptive contributions to American Indian anthropology presenting contemporary interpretations of diverse groups from the Hudson Bay Inuit in the north to the Highland Maya of Chiapas in the south The collection will serve as an introduction to Native American social and cultural anthropology for readers interested in the dynamics of Indian social life

 Wilkins,2013-03-15 The Navajo rugs and textiles that people admire and buy today are the result of many historical
 influences particularly the interaction between Navajo weavers and the traders who guided their production and controlled
 their sale John Lorenzo Hubbell and other late nineteenth century traders were convinced they knew which patterns and
 colors would appeal to Anglo American buyers and so they heavily encouraged those designs In Patterns of Exchange Teresa
 J Wilkins traces how the relationships between generations of Navajo weavers and traders affected Navajo weaving The
 Navajos valued their relationships with Hubbell and others who operated trading posts on their reservation As a result they
 did not always see themselves as exploited victims of a capitalist system Rather because of Navajo cultural traditions of gift
 giving and helping others the artists slowly adapted some of the patterns and colors the traders requested into their own
 designs By the 1890s Hubbell and others commissioned paintings depicting particular weaving styles and encouraged Navajo
 weavers to copy them reinforcing public perceptions of traditional Navajo weaving Even the Navajos came to revere certain
 designs as the weaving of the ancestors Enhanced by numerous illustrations including eight color plates this volume traces
 the intricate play of cultural and economic pressures and personal relationships between artists and traders that guided
 Navajo weavers to produce textiles that are today emblems of the Native American Southwest Winner Multi cultural Subject
