A History of the Royal Navy Martin Robson,2014-03-27 The French Revolutionary and Napoleonic Wars were the first truly global conflicts The Royal Navy was a key player in the wider wars and for Britain the key factor in her eventual emergence as the only naval power capable of sustained global hegemony The most iconic battles of any era were fought at sea during these years from the Battle of the Nile in 1798 to Nelson's momentous victory at Trafalgar in October 1805 In this period the Navy had reached a peak of efficiency and was unrivalled in manpower and technological strength The eradication of scurvy in the 1790s had a significant impact on the health of sailors and along with regular supplies of food and water gave the British an advantage over their rivals in battle As well as naval battles the Navy also undertook amphibious operations capturing many of France's Caribbean colonies and Dutch colonies in the East Indies and Ceylon this Imperial dimension was integral to British strength and counteracting French success on continental Europe This book looks at the history of the Royal Navy during the French Revolutionary and Napoleonic Wars 1793-1815 from a broad perspective examining the strategy operations and tactics of British seapower While it delves into the details of Royal Navy operations such as battle blockade commerce protection and exploration it also covers a myriad of other aspects often overlooked in narrative histories

such as the importance of naval logistics transport relations with the army and manning An assessment of key naval figures and combined eyewitness accounts situate the reader firmly in Nelson's navy Through an exploration of the relationship between the Navy trade and empire Martin Robson highlights the contribution Royal Navy made to Britain's rise to global hegemony through the nineteenth century Pax Britannica

Britain, Portugal and South America in the Napoleonic Wars Martin Robson,2010-12-14 In the maelstrom of Napoleonic Europe Britain remained defiant resisting French imperial ambitions This Anglo French rivalry was essentially a politico economic conflict for pre eminence fought on a global scale and it reached a zenith in 1806 1808 with France's apparent dominance of Continental Europe Britain reacted swiftly and decisively to implement maritime based strategies to limit French military and commercial gains in Europe while protecting British overseas interests The policy is particularly evident in relations with Britain's Ancient Ally Portugal That country and by association her South American empire became the front line in the battle between Napoleon's ambitions and British maritime security Shedding new light on British war aims and maritime strategy this is an essential work for scholars of the Napoleonic Wars and British political diplomatic economic and maritime military history

The Man Who Discovered Antarctica Sheila Bransfield,2019-04-30 The definitive biography of the British naval officer who found the Antarctic shoreline in the early nineteenth century Captain Cook claimed the honor of being the first man to sail into the Antarctic Ocean in 1773 which he circumnavigated the following year Cook though did not see any land and declared that there was no such thing as the Southern Continent Fifty years later an Irishman who'd been impressed into the Royal Navy at eighteen and risen through the ranks to the position of master proved Cook wrong discovering and charting parts of the Antarctic shoreline He also discovered Elephant Island and Clarence Island claiming them for the British Crown Edward Bransfield's naval career included taking part in the Bombardment of Algiers in 1816 onboard the 50 gun warship HMS Severn Then in 1817 he was posted to the Royal Navy's Pacific Squadron off Valparaíso in Chile and it was while he served there that the skipper of an English whaling ship the Williams was driven south by adverse winds and discovered what came to be known as the South Shetland Islands where Cook had said there was no land Bransfield's superior officer Captain Sherriff decided to investigate further He chartered Williams and sent Bransfield with two midshipmen and a ship's surgeon into the Antarctic and the Irishman sailed into history Despite many parts of Antarctica and an Antarctic survey vessel being named after him and a Royal Mail commemorative stamp issued in his name the full story of this remarkable man and his historic journey have never been told until now Following decades of research Sheila Bransfield MA a member of the UK Antarctic Heritage Trust has produced the definitive biography of one of Britain's greatest maritime explorers The book also includes a foreword by the Trust's patron the Princess Royal Bransfield's meticulous research gives us a detailed account of the daily routines of the Navy and the immense amount of maintenance required of a large wooden warship in the Age of Sail Historical Novel Society

The Coalitions Against Napoleon William Nester,2023-06-30 Britain alone could not hope to defeat the might of

Napoleonic France which through enforced conscription had become a nation in arms But British leaders had a long history of forging alliances to counter their rivals and when revolution ravaged France in 1793 and a levée en masse raised a huge patriotic army it was through a coalition of monarchies that French ambitions were restrained a coalition made possible by British gold and British industry When Napoleon seized the reins of power in France he too introduced conscription and once again it was a succession of British led and funded coalitions which eventually brought Napoleon to his knees During the years 1793 to 1815 the British Government formed and underwrote seven coalitions that cost Britain 1 657 854 518 as the national debt tripled from 290 000 000 to 860 000 000 Of that British subsidies to around thirty allies amounted to 65 830 228 along with staggering amounts of war supplies mass produced by British factories and shipped to allies Britain's leading role in Europe did not end with Waterloo Immediately following the Sixth Coalition and amidst the Seventh Coalition Britain constructed with the other great powers a security system of cooperation and consultation called the Concert of Europe that prevented a serious war among them for two generations Britain's power to underwrite those coalitions came from a related series of revolutions agrarian mercantile financial technological manufacturing cultural and political that developed over the proceeding century For many reasons that happened in Britain and not elsewhere Of them cultural values may be most crucial Constraints were fewer and incentives greater for enterprising Britons to invest invent buy and sell in ways that enriched themselves and their nation more than elsewhere During the eighteenth century Britain's leaders mastered a virtuous power cycle of victorious wars expanding production captured territories and markets and more income During a speech before Congress in December 1940 President Franklin D Roosevelt called on Americans to be an arsenal of democracy to aid Britain and other countries threatened by the imperialistic fascist powers Britain played exactly the same role during the Napoleonic era The Coalitions Against Napoleon explores how Britain developed and asserted the financial manufacturing and military power to achieve that goal

Midshipmen and Quarterdeck Boys in the British Navy, 1771-1831 S. A. Cavell, 2012 A fascinating study of midshipmen and other young gentlemen outlining their social background career paths and what life was like for them Officer recruits young gentlemen entered the Royal Navy with dreams of fame fortune and glory but many found promotion difficult with a large number unable to progress beyond lieutenant Recent scholarship has argued that during the wars of 1793 1815 there was greater social diversity among naval officers with promotion increasingly related to professional competence This book based on extensive original research examines the social background of around 4 000 young gentlemen a term which includes midshipmen and various other categories including captains servants volunteers and masters mates It concludes that in fact high birth became an increasingly important factor in the selection of officer candidates and that as the Admiralty grip on the appointment and management of officer aspirants increased especially after 1815 aristocratic presence in the ranks of young officers increased significantly as a result of deliberate Admiralty policy The book also discusses the assertion that the increase in

elite sons led to a dramatic increase in cases of indiscipline and insubordination concluding that although there was a marked increase in courts martial for insubordination during and after the French Wars there is no evidence that such cases related more to the elites than to young aspirants in general The book includes many case study examples of midshipmen and other young gentlemen illustrating what life was like for them and how they themselves viewed their situation S A CAVELL is a graduate of the Queensland University of Technology and Louisiana State University and completed her doctorate at the University of Exeter

Washington Tom Lewis, 2015-10-13 Breathing life into the men and women who struggled to help the city realize its full potential he introduces us to the mercurial French artist who created an ornate plan for the city en grande members of the nearly forgotten anti Catholic political party who halted construction of the Washington monument for a quarter century and the cadre of congressmen who maintained segregation and blocked the city's progress for decades In the twentieth century Washington's Mall and streets would witness a Ku Klux Klan march the violent end to the encampment of World War I Bonus Army veterans the 1963 March on Washington for Jobs and Freedom and the painful rebuilding of the city in the wake of Martin Luther King Jr's assassination

A Cultural History of the Sea in the Age of Enlightenment Jonathan Lamb, 2023-02-09 This volume covers a period when Europeans were making great advances in the production and application of pure knowledge especially in the fields of navigation and discovery Thus European powers gained empires around the globe and the benefits that came with them while the rest of the world had to be content with supplying the raw material i.e. labour bullion wood plants ore of these good things This would not have been possible without navies and trading monopolies enterprises in which the freedom of the seas was disputed then gained or lost The essays in this volume range between three eras in the age of discovery first the excitement of seeing something for the first time second the experience of understanding the importance of the new thing and third the disillusion incident to reframing the prehistory of humanity and its destiny without the usual signposts of an anthropocentric journey from innocence to salvation via sin atonement and judgment The maritime contribution to all three eras was enormous not simply because it provided a mobile platform for the inspection of the new but because it proved experimentally that there were no extremes of heroic virtue or of brutal depravity to which humans might not tend when necessity or wantonness called for them Usually the evil side of humanity was assigned to savages but in the curiously singular person of the pirate a mirror image can be found of everyone really all people who lived on or by the sea were pirates of a sort Commencing as an age of rational certainties the Enlightenment gave way to the opposite The symmetries of the Linnaean system yielded to the endless process of mutation Buffon called speciation Rational government of the passions was succeeded by the cult of sensibility and spontaneous emotion The mathematical exactness of Cartesian knowledge was supplanted by imagination Sailors returned with pictures of mirages never seen before the products of Nature's own imagination that posed a question posed again here No doubt they are real but are they true

AMERICAN INTERNATIONAL LAW CASES Fourth Series 2009 VOLUME 2 Oceana

Editorial Board, 2010-12-24 AILC is an annual case law reporter that provides the full text of U S court opinions involving international law issues The courts covered include all U S federal district courts federal appellate courts and the U S Supreme Court as well as some state courts the U S Court of Claims the U S Court of International Trade and the U S Tax Court The series seeks to provide not every single case in which a court refers to international law but rather all cases that analyze at least one international law issue in depth The list of subjects addressed by these volumes is vast and changes from year to year with the inclusion and prominence of most topics turning on their prevalence in a given year s jurisprudence Some consistently prominent topics are personal jurisdiction over foreign defendants deportation procedure and double taxation Over the last three editions 2006 2007 and 2008 many topics have developed rapidly and constitute a correspondingly larger portion of the volumes particularly Terrorism the Foreign Sovereign Immunities Act Forum Non Conveniens and an entirely new added topic the National Security Exception to deportation eligibility The 2008 edition of AILC also features expanded sections on family law and on the detention of terrorist suspects The U S war on terror and the crisis at Guantanamo have made that last topic a significant and dynamic component of AILC Each edition of AILC also comes framed with two practical resources for students and scholars The first is an introductory editor s note that both reviews international law s major developments for the given year and explains to readers how to use the volumes The second is a subject index to allow for targeted research Volume Two of AILC consists of cases concerning territories trusteeships boundaries and navigable waters covering marine torts and crimes and death on the high seas by wrongful act Also covered are procedural aspects including in personam jurisdiction extraterritoriality and forum selection clauses In *Atlantic Sounding Co Inc v Edgar L Townsend* the issue was whether an injured seaman may recover punitive damages for his employer s willful failure to pay maintenance and cure The court ruled that punitive damages were available as a matter of general maritime law The issue in *Jose Marcial Reyes Fuentes et al v Shannon Produce Farm Inc et al* was whether the Fair Labor Standards Act s FLSA provision provides a cause of action to foreign workers located abroad who are denied re hire in retaliation for exercising their rights under the FLSA The court ruled that neither the FLSA nor general extraterritoriality principles stand in the way of the plaintiffs retaliation claim

British Expeditionary Warfare and the Defeat of

Napoleon, 1793-1815 Robert K. Sutcliffe, 2016 The defeat of Napoleon required the shipping of large numbers of troops to and successfully landing them on French controlled territory This book examines the logistical operations which supported British expeditionary warfare in the period It outlines the role of the Transport Board explores how it periodically chartered a large proportion of the British merchant fleet and what the effects of this were on merchant shipping and discusses the Transport Board s relationship with other branches of government including the Navy The book concludes that the Transport Board grew in competence that the failure of expeditions was often due to circumstances beyond its control and that its role in the preparation of all the major military expeditions in which hundreds of thousands of British troops served overseas was

very significant and very effective
