Naval Power and Expeditionary Wars Bruce A. Elleman, S.C.M. Paine, 2010-12-09 This book examines the nature and character of naval expeditionary warfare in particular in peripheral campaigns and the contribution of such campaigns to the achievement of strategic victory Naval powers which can lack the massive ground forces to win in the main theatre often choose a secondary theatre accessible to them by sea and difficult for their enemies to reach by land giving the sea power and its expeditionary forces the advantage The technical term for these theatres is peripheral operations The subject of peripheral campaigns in naval expeditionary warfare is central to the British the US and the Australian way of war in the past and in the future All three are reluctant to engage large land forces because of the high human and economic costs Instead they rely as much as possible on sea and air power and the latter is most often in the form of carrier based aviation In order to exert pressure on their enemies they have often opened additional theaters in on going regional and civil wars This book contains thirteen case studies by some of the foremost naval historians from the United States Great Britain and Australia whose collected case studies examine the most important peripheral operations of the last two centuries This book will be of much interest to students of naval warfare military history strategic studies and security studies **New**

Naval Warfare 1919-45 Malcolm H. Murfett,2008-11-04 Naval Warfare 1919 45 is a comprehensive history of the war at sea from the end of the Great War to the end of World War Two Showing the bewildering nature and complexity of the war facing those charged with fighting it around the world this book ranges far and wide sweeping across all naval theatres and those powers performing major as well as minor roles within them Armed with the latest material from an extensive set of sources Malcolm H Murfett has written an absorbing as well as a comprehensive reference work He demonstrates that superior equipment and the best intelligence ominous power and systematic planning vast finance and suitable training are often simply not enough in themselves to guarantee the successful outcome of a particular encounter at sea Sometimes the narrow difference between victory and defeat hinges on those infinite variables the individual s performance under acute pressure and sheer luck Naval Warfare 1919 45 is an analytical and interpretive study which is an accessible and fascinating read both for students and for interested members of the general public *The Naval War of 1812* ,1985 **Surface Warfare** ,1985 Non-Participation in Armed Conflict Constantine Antonopoulos,2022-03-03 Non participation in armed conflict gives rise to the relevance role and content of the law of neutrality in contemporary international law Despite scholarly opinion to the contrary the challenges posed by collective security and the prohibition of the use of force have not made neutrality obsolete The validity of the law of neutrality is reaffirmed in State practice mainly in the form of national military manuals and the case law of international tribunals The legal framework of neutrality remains unchanged with respect to most rules At the same time it has been adapted to the evolution of the law of the sea as a result of the 1982 UN Law of the Sea Convention the globalization of trade and the use of cyberspace in armed conflict This has been achieved mainly through soft law documents and national military manuals Neutrality however remains inapplicable in non international armed conflict **The Naval War of 1812** Theodore Roosevelt,1882 *The Naval War of 1812* Michael J. Crawford,2003 Michael J Crawford Editor Third of a four volume documentary history on the naval and maritime aspects of the War of 1812 Focuses on the Chesapeake Bay the Northern Lakes and the Pacific Ocean theaters of operation during the last two years of the war 1814 1815 *Ironclads in action, a sketch of naval warfare from 1855 to 1895* Herbert Wrigley Wilson,1897 *Underway Replenishment of Naval Ships* Naval Surface Warfare Center (U.S.). Port Hueneme Division. Underway Replenishment Department,1992 **Congressional Record** United States. Congress,1958 **All Possible Wars?** Sam J. Tangredi,2000 This survey is a product of the Quadrennial Defense Review QDR 2001 Working Group a project of the Institute for National Strategic Studies at the National Defense University Sponsored by the Chairman of the Joint Chiefs of Staff the working group is an independent honest broker effort intended to build intellectual capital for the upcoming QDR More specifically it aims to frame issues develop options and provide insights for the Chairman the services and the next administration in three areas defense strategy criteria for sizing conventional forces and force structure for

2005 2010 One of the group's initial tasks was to assess the future security environment to the year 2025. This was pursued by surveying the available literature to identify areas of consensus and debate. The goal was to conduct an assessment that would be far more comprehensive than any single research project or group effort could possibly produce. This survey documents major areas of agreement and disagreement across a range of studies completed since the last QDR in 1997. Because it distills a variety of sources and organizes and compares divergent views, this volume makes a unique contribution to the literature. It also provides a particularly strong set of insights and assumptions on which both strategists and force planners can draw in the next Quadrennial Defense Review. This survey does not claim to predict or illustrate all possible wars that America might face between now and the year 2025. Rather, it attempts through analysis of representative and reputable sources to incorporate the most likely characteristics of the future security environment into a single scenario while heightening our awareness of dissenting viewpoints and plausible wild cards. **Digesting History** Hal M.

Friedman, 2010-05-20 Product Description *Digesting History: The U.S. Naval War College the Lessons of World War II and Future Naval Warfare 1945-1947* by Professor Hal M. Friedman studies the contribution of the Naval War College especially in the presidency of Admiral Raymond Spruance to strategic thought during the first critical postwar years that is between the end of the war and the formulation of Containment. This transition period is especially valuable as a window through which to explore institutions such as the College in transition from a hot war to a cold one. While seminal studies exist of the College's work in the interwar years, none have been published on this period. **Review of Current Military Literature**
