Navigating World History Patrick Manning, 2003-05-16 A comprehensive analysis of the major dimensions of the academic study of world history by one of the foremost scholars in the field Global History, Globally Sven Beckert, Dominic Sachsenmaier, 2018-02-22 In recent years historians in many different parts of the world have sought to transnationalize and globalize their perspectives on the past Despite all these efforts to gain new global historical visions however the debates surrounding this movement have remained rather provincial in scope Global History Globally addresses this lacuna by surveying the state of global history in different world regions Divided into three distinct but tightly interweaved sections the book's chapters provide regional surveys of the practice of global history on all continents review some of the research in four core fields of global history and consider a number of problems that global historians have contended with in their work The authors hail from various world regions and are themselves leading global historians Collectively they provide an unprecedented survey of what today is the most dynamic field in the discipline of history As one of the first books to systematically discuss the international dimensions of global historical scholarship and address a wealth of questions emanating from them Global History Globally is a must read book for all students and scholars of global history

Micro-Spatial Histories of Global Labour Christian G. De Vito, Anne Gerritsen, 2017-09-28 This volume suggests a new way of doing global history Instead of offering a sweeping and generalizing overview of the past we propose a micro spatial approach combining micro history with the concept of space A focus on primary sources and awareness of the historical discontinuities and unevennesses characterizes the global history that emerges here We use labour as our lens in this volume The resulting micro spatial history of labour addresses the management and recruitment of labour its voluntary and coerced spatial mobility its political perception and representation and the workers own agency and social networks The individual chapters are written by contributors whose expertise covers the late medieval Eastern Mediterranean to present day Sierra Leone through early modern China and Italy eighteenth century Cuba and the Malvinas Falklands the journeys of a missionary between India and Brazil and those of Christian captives across the Ottoman empire and Spain The result is a highly readable volume that addresses key theoretical and methodological questions in historiography Chapter 7 is open access under a CC BY 4.0 license via link.springer.com

The Oxford Handbook of Global Studies Mark Juergensmeyer, Saskia Sassen, Manfred B. Steger (ed), 2019 Since the end of the Cold War globalization has been reshaping the modern world and an array of new scholarship has risen to make sense of it in its various transnational manifestations including economic social cultural ideological technological environmental and in new communications The chapters discuss various aspects in the field through a broad range of approaches This handbook

focuses on global studies more than on the phenomenon of globalization itself although the various aspects of globalization are central to understanding how the field is currently being shaped **The Material of World History** Tina Mai

Chen, David S. Churchill, 2015-03-27 This volume considers the confluence of World History and historical materialism with the following guiding question in mind given developments in the field of historical materialism concerned with the intersection of race gender labour and class why is it that within the field of World History historical materialism has been marginalized precisely as World History orients toward transnational socio cultural phenomenon micro studies or global histories of networks Answering this question requires thinking in an inter related manner about both the development of World History as a discipline and the place of economic determinism in historical materialism This book takes the position that historical materialism as applied to the field of World History needs to be more open to the methodological diversity of the materialist tradition and to refuse narrowly deterministic frameworks that have led to marginalization of materialist cultural analysis in studies of global capitalism At the same time World History needs to be more self critical of the methodological diversity it has welcomed through a largely inclusionary framework that allows the material to be considered separately from cultural social and intellectual dimensions of global processes Thinking History Globally Diego

Olstein, 2014-11-04 The book brings together many recent trends in writing history under a common framework thinking history globally By thinking history globally the book explains applies and exemplifies the four basic strategies of analysis the big C s comparing connecting conceptualizing and contextualizing using twelve different branches of history **Handbook**
