Liberating Learning Terry M. Moe, John E. Chubb, 2009-07-15 Praise for *Liberating Learning* Moe and Chubb have delivered a truly stunning book rich with the prospect of how technology is already revolutionizing learning in communities from Midland Pennsylvania to Gurgaon India At the same time this is a sobering telling of the realpolitik of education a battle in which the status quo is well defended But most of all this book is a call to action a call to unleash the power of technological innovation to create an education system worthy of our aspirations and our childrens dreams Ted Mitchell CEO of the New Schools Venture Fund As long as we continue to educate students without regard for the way the real world works we will continue to limit their choices In *Liberating Learning* Terry Moe and John Chubb push us to ask the questions we should be asking to have the hard conversations about how far technology can go to advance student achievement in this country Michelle Rhee Chancellor of Education for the Washington D C schools A brilliant analysis of how technology is destined to transform America s schools for the better not simply by generating new ways of learning but also and surprisingly by unleashing forces that weaken its political opponents and open up the political process to educational change A provocative entirely novel vision of the future of American education Rick Hanushek the Paul and Jean Hanna Senior Fellow at the Hoover Institution Stanford University Terry Moe and John Chubb two long time astute observers of educational reform see technology as the way to reverse decades of failed efforts Technology will facilitate significantly more

individualized student learning and perhaps most importantly technology will make it harder and harder for the entrenched adult interests to block the reforms that are right for our kids This is a provocative informative and ultimately optimistic read something we badly need in public education Joel Klein Chancellor of the New York City schools

Energy Resources and Systems Tushar Ghosh, Mark Prelas, 2009-06-17 In the lifetimes of the authors the world and especially the United States have received three significant wake up calls on energy production and consumption The first of these occurred on October 15 1973 when the Yom Kippur War began with an attack by Syria and Egypt on Israel The United States and many western countries supported Israel Because of the western support of Israel several Arab oil exporting nations imposed an oil embargo on the west These nations withheld five million barrels of oil per day Other countries made up about one million barrels of oil per day but the net loss of four million barrels of oil production per day extended through March of 1974 This represented 7% of the free world's i.e. excluding the USSR oil production In 1972 the price of crude oil was about 3.00 per barrel and by the end of 1974 the price of oil had risen by a factor of 4 to over 12.00 This resulted in one of the worst recessions in the post World War II era As a result there was a movement in the United States to become energy independent At that time the United States imported about one third of its oil about five million barrels per day After the embargo was lifted the world chose to ignore the wake up call and went on with business as usual
