

CULTURAL RESEARCH

GOALS AND MEANS

"Know thyself!" These solemn words saluted the ancient Greeks at the entrance to the temple of the Pythian Apollo. And sagest of all Montaigne said that rather than know Christ he would know himself fully. Both the Greeks and Montaigne are right, but we can understand him better and completely unless we also understand others. We must observe our own characteristics against the background of those of other peoples.

It is a characteristic of primitive cultures that it is sufficient with itself. We are the only "proper" people, and to strangers we offer little more than a sting of the shoulder. The Hottentots call all the members of their own group *naam*; likewise in the Hottentots' name for themselves. Both words simply mean "man," or "proper human beings," and a certain note of disdain toward all others is implied. The basic emotion responsible for such designations also prevails on the highest levels of culture. Strangers do not speak a "mother language"; they are "foreigners" (*barbaroi*), as the Hottentots said, or say nothing of "natives" (*autochthones*), the Hottentots name for the Germanic peoples. And, in any case, foreigners are "strangers" (*xenoi*).

If we look beneath the surface, we soon discover, however, that all cultures have a common interest. Everywhere we see, or at least heard about, the Australian boomerang, the sickle-shaped throwing implement which in others is described that it is like to hit the mark it returns to the point of origin. But how many of us know that the Indians of the southwestern United States used the same kind of weapons, that it is found in India and in certain parts of Africa, and is shown in various depicting

Paths Of Culture A General Ethnology:

Paths of Culture Kaj Birket-Smith, 1965 *The Paths of Culture* Kaj Birket-Smith, 1965 *The paths of culture a general ethnology*, tr Kaj Birket-Smith, Dictionary of Concepts in Cultural Anthropology Robert H. Winthrop, 1991-11-18 The field of cultural anthropology describes and interprets the thought and behavior of contemporary and near contemporary societies. Inherently pluralistic it offers a framework in which the distinctive perspectives of each cultural world can be appreciated. Robert Winthrop's dictionary describes the major concepts that have shaped the discipline both historically and theoretically. It sets modern anthropology in its proper context within the broader intellectual tradition. Eighty entries review the key concepts: culture, race, nature, symbolism, adaptation, the primitive, etc. that have established the fundamental problems and issues, guided research and served as the focus for debate in key areas of the discipline. The entries, which range from 2 000 to 6 000 words in length, are both thorough in treatment and contemporary in relevance. Some entries are primarily of historical significance while others describe recent developments. Each entry contains an annotated bibliography and a guide to additional reading on the subject. While this is not primarily a technical lexicon, many terms have been glossed and explained. Designed to be useful to students of anthropology, this dictionary will assist those in other disciplines to find their way through the anthropological labyrinth.

Cultural Analysis Hans Gullestrup, 2006 With internationalization the world is becoming smaller and the opportunity to meet people from other countries and cultures is becoming more common, providing the need for cooperation, shared knowledge and cross border trade. Individual cultures tend to understand themselves best and base their understanding of the world and its peoples on ideas they each have come to believe, irrespective of reality and thus make it difficult to reach a proper understanding of other cultures. This book considers intercultural understanding and co-action partly by means of general insights into the concept of culture and the dimensions which bring about cultural differences and partly as a methodology to analyze a certain culture, whether one's own or others. This leads towards an understanding of cultural complexity and cultural differences among people. The book provides a discussion of a number of ethical issues which almost invariably will arise when people meet and co-act across cultural boundaries. Cultural Analysis offers a theoretical, abstract proposal for cultural understanding, intercultural plurality and complexity.

Special Bibliography Series, 1957 The Routledge Dictionary of Anthropologists Gérald Gaillard, 2004 This detailed and comprehensive guide provides biographical information on the most influential and significant figures in world anthropology from the birth of the discipline in the nineteenth century to the present day. Each of the fifteen chapters focuses on a national tradition or school of thought, outlining its central features and placing the anthropologists within their intellectual contexts. Fully indexed and cross-referenced, *The Routledge Dictionary of Anthropologists* will prove indispensable for students of anthropology.
