Young Children's Emotional Experiences Jane Murray, Ioanna Palaologou, 2020-06-29 Based on a rich seam of research evidence this book leverages value in engaging with scientific enquiry to further understanding of young children s emotional experiences Early childhood development has featured increasingly prominently on international policymakers agenda in recent years Yet whilst policy foregrounds economic imperatives including academic attainment school readiness and time bound outcomes similar attention has not been afforded to the potential value of nourishing affective engagements that may secure emotional capital for infants and young children This collection from the field of early childhood is therefore timely Its chapters are based on empirical evidence derived from contemporary scientific studies and address challenges and opportunities inherent in young children s emotional experiences in diverse twenty first century early childhood education and care contexts The authors provoke debate discussion and critique and they ask significant questions of the policymakers practitioners and carers who may influence young children s lives and their emotional experiences The findings that are presented in the chapters indicate overall that a test based approach may detract from young children s emotional development as well as the positive affective experiences in early childhood which have potential to provide an important foundation for a fulfilling life This book was originally published as a special issue of Early Child Development and Care

The Standing of Vocational Education and the Occupations It Serves Stephen Billett, Barbara Elisabeth Stalder, Vibe Aarkrog, Sarojni Choy, Steven Hodge, Anh Hai Le, 2022-04-21 This book addresses what is perhaps the single most important issue for vocational education its relatively low standing in an era of high aspiration The work explores the nature extent and consequences for an educational sector that whilst having an increasingly important role in contemporary societies is seen to be of low standing across both countries with developed and developing economies Some of the standing is associated with the occupation it serves and this is highlighted in an era of high aspiration by young people and their parents The consequences are far reaching This includes how governments and community view and support vocational education parents and familiars advise about participation in it and young people s decision making associated with their post school pathways More than describing this problem the focus of this collection is how this issue can be redressed through the actions of supra government agencies governments

schools in tertiary education institutions industry and professional bodies and employers It sets out the quality and extent of societal sentiments in shaping how vocational education and the occupation it serves are projected across countries continents and cultures and offers a range of perspectives and contributions from scholars on how this issue might be redressed These contributions are drawn together and synthesised into sets of propositions practices and approaches directed towards governments schooling and tertiary education institutions educators researchers industry and professional bodies and employers In this way the book seeks to provide an authoritative seminal comprehensive and central text to understand and respond to this central issue for vocational education Pathway to Bliss Dr. Cecilia R.
