Pathways Of Change In Africa:

Pathways of Change in Africa Ian Scoones, 2002 In the literature of sustainable development many have argued for the encouragement of mixed farming involving the integration of livestock and crops on one farm to meet the needs of small scale African farming systems Scoones and Wolmer both with the Environment Group at the Institute of Development Studies U of Sussex argue that behind this argument is the implicit or explicit assumption that mixed farming represents a stage in a normative evolutionary process towards an ideal They suggest that this view is mistaken and that mixed farming is only one of a range of possible pathways of change in agricultural systems They present case studies from Ethiopia Mali and Zimbabwe and analyze how social actors have varying access to resources This variance is often due to institutional arrangements that are too often ignored in discussions of mixed farming and therefore fail to take into account situations that could help development efforts to be more effectively targeted Annotation copyrighted by Book News Inc Portland OR

Evaluation Management in South Africa and Africa Fanie Cloete, 2014-12-01. This blind peer-reviewed book systematically records analyses and assesses for the first time in a single volume the implications of the global development and management of professional evaluation for the African continent. The book deals with the most strategic contemporary evaluation themes. Each of these themes contains discussions of theoretical issues illustrated with one or more short case studies, while selected longer case studies and other relevant documentation are also taken up in annexures at the end of the book. The book therefore comprises a guide to best M/E practices for purposes of systematic policy programme and project evaluations. It is suitable for both professional M/E institutionalisation and capacity building projects as well as for evaluation information dissemination and education at different levels in the public, private, and voluntary sectors in society, especially in a developmental context.

accruing benefits from wildlife The book illustrates the empirical relevance of these novel arrangements by presenting their growth in numbers and discuss how these arrangements differ in their form With respect to the conservation and development impacts of these arrangements we show that they have secured large amounts of land for conservation but also generated governance challenges and disputes on tourism benefit sharing affecting the stability of these arrangements to generate socioeconomic and conservation benefits **Africa's Future, Africa's Challenge** Marito H. Zengeya, 2020-03-10 This open access volume presents a comprehensive account of all aspects of biological invasions in South Africa where research has been conducted over more than three decades and where bold initiatives have been implemented in attempts to control invasions and to reduce their ecological economic and social effects It covers a broad range of themes including history policy development and implementation the status of invasions of animals and plants in terrestrial marine and freshwater environments the development of a robust ecological theory around biological invasions the effectiveness of management interventions and scenarios for the future The South African situation stands out because of the remarkable diversity of the country and the wide range of problems encountered in its varied ecosystems which has resulted in a disproportionate investment into both research and management The South African experience holds many lessons for other parts of the world and this book should be of immense value to researchers students managers and policy makers who deal with biological invasions and ecosystem management and conservation in most other regions Mining and Community in South Africa Philippe Burger, Lochner Marais, Deirdre van Rooyen, 2017-09-22 Mining has played a key role in the growth of many towns in South Africa This growth has been accompanied by a proliferation of informal settlements by

pressure to provide basic services and by institutional pressures in local government to support mining. Fragile municipal finance changing social attributes the pressures of shift work on mineworkers the impact on the physical environment and perceived new inequalities between mineworkers contract workers and original inhabitants have further complicated matters. Mining growth has however also led to substantial local economic benefits to existing business and it has contributed to a mushrooming of new enterprises. While the relationship between mining and economic development at the country level has received adequate attention in existing literature less is known about the consequences of mining at the local level. This book investigates the local impacts of mining in South Africa focusing on employment inequality housing business development worker well being governance municipal finance planning and the environment. Taking an interdisciplinary approach Mining and Community in South Africa will be of interest to scholars of South Africa economic development labour and industry politics and planning.

Culture, Entertainment and Health Promotion in Africa Kimani Njogu, 2005. This book brings together multiple voices and positions from Africa. These voices assembled during a 2003 Soap Summit held in Nairobi are powerful and varied and suggest ways in which issues of health could be tackled in an entertaining manner. The summit organised by Population Communications International Africa highlighted the critical role that the arts can play in ensuring better health especially among the youth. It resulted from the recognition that young people in Africa are faced with a myriad of problems and complications as they struggle to deal with growth and identity formation within a globalising social and economic setup. They are in dire need of information on their own sexuality and how to deal with it and are getting conflicting signals from the mass media as well as their immediate environment. The youth are under intense pressure from their peers to engage in premarital sex which is in most cases unprotected. The HIV AIDS epidemic presents frightening challenges and all health programs should look for ways of dealing with it. Of great concern is the vulnerability of women and girls in Africa due to rising poverty gender violence lack of access to youth friendly reproductive health facilities and lack of a conducive infrastructure especially in informal settlements and in the rural areas. The myriad problems presented by the pandemic require a multi sectoral approach. This book brings together a number of strategies being undertaken in Africa that combine entertainment and education in a positive way. The voices from the Soap Summit are interspersed with those of the Editor to create a dialogue on entertainment education that contributes to the discussion on the way social change might be undertaken.
