Digital Media Use in Early Childhood - Contextual Factors, Developmental Outcomes and Pathways Margarete Ingrid Bolten ,Eva Unternaehrer,2025-08-19 Families daily lives are heavily influenced by digital media Especially during the COVID 19 pandemic the daily screen time of parents and children increased extraordinary At the same time concerns are growing about the effects on the physical socio emotional and cognitive development of children in early childhood Although the research on the effect of digital media use on preschool children is still patchy and sometimes inconsistent It is by no means clear if and how the development of children is impacted by digital media use of parents or the children themselves However the healthy development in early childhood is crucially dependent on direct contact with sensitive physically present care takers and the real world with all senses There are however two areas of risk in this context a the so called technoference or parental distraction caused by digital media use which can have a negative effect on the parent child interactions and relations and b the use of digital media by the infant toddler or preschooler itself
