**Structural Transformation and Sustainable Development in the Global South** Seung Jin Baek, 2021-12-24 This book investigates the relationship between sustainable development and structural transformation within international development policy On the

one hand sustainable development is promoted as a multi dimensional concept for achieving environmentally and socially responsible change On the other hand structural transformation refers to a sustained period of growth in living standards and incomes that brings sectoral change For some these two objectives seem at odds with each other but this book argues that incorporating environmental initiatives into structural transformation goals in lower income countries actually results in better results than strategies prioritising economic growth Drawing on extensive structural equation modelling and original analysis the book presents an innovative inclusive sustainable development framework to demonstrate the benefits of a more integrated approach to development planning aiming for structural transformation in line with inclusive sustainable development principles This book will be of interest to students and researchers of global development and to policymakers within government and development organizations

*Knowledge, Policy and Practice in Teacher Education* Maria Teresa Tatto,Ian Menter,2019-02-21 *Knowledge Policy and Practice in Teacher Education* reviews the evolution of education policy on initial teacher education as an indicator of the knowledge that is considered important for nation building It also looks at research on approaches and structures to initial teacher learning as an indication of the intellectual and moral direction to which schooling must aspire Contributors look at these dynamics across a range of societies including Australia the Czech Republic England Finland Hong Kong Israel Italy Japan South Korea Mexico Russia and the USA Using a review of the literature approach within a comparative framework the book seeks to answer the following questions for each country What has been the evolution of different approaches to learning to teach in each setting and what factors have influenced change over the years What are the underlying theories that characterize past and current thinking about the knowledge skills and dispositions needed by teachers and what evidence is used to support these theories What does a review on the state of the knowledge about teacher education over the past 30 years reveal about the evolution of the research and knowledge traditions that have supported current and past innovations in teacher education Maria Teresa Tatto and Ian Menter explore international variability in different conceptions of knowledge in the context of learning to teach and explore the way in which national and international influences interact in the developing trajectories of teacher education policy and practice considering what knowledge is considered important for teachers to have
