Reform in the House of Commons Michael Jogerst, 2021-10-21 One of the most significant changes in the British House of Commons has been the development in 1979 of a system of select committees charged with monitoring government ministries Unlike previous experiments in parliamentary reform these committees are staffed exclusively with backbench MPs who regularly review executive policies and offer recommendations Michael Jogerst reappraises the relationship between the executive and legislative branches in light of these new circumstances which are likely to affect the entire governmental structure of the United Kingdom

Modernising the Labour Party T. Quinn, 2004-10-14 Few parties have undergone such comprehensive organizational change as the Labour Party since 1983 Labour's organization once institutionalised the political exchange between office seeking politicians and the party's policy seeking trade union paymasters Using accessible rational choice models Thomas Quinn explores how consecutive election defeats prompted party leaders to modernize this structure to regain voters trust reducing union influence in policymaking parliamentary candidate selection and leadership contests The price may be a centralized party vulnerable to membership exit and union funding cuts

Democracy and the Cartelization of Political Parties Richard S. Katz, Peter Mair, 2018-07-04 Political parties have long been recognized as essential institutions of democratic governance Both the organization of parties and their relationships with citizens the state and each other have evolved since the rise of liberal democracy in the 19th and early 20th centuries Going into the 21st century it appears that parties losing popular support putting both parties and potentially democracy in peril This book traces the evolution of parties from the model of the mass party through the catch all party model to argue that by the late 20th century the principal governing parties and their allied smaller parties collectively the political mainstream were effectively forming a cartel in which the form of competition might remain and indeed even appear to intensify while its substance was increasingly hollowed out The spoils of office were increasingly shared rather than restricted to the temporary winners contentious policy questions were kept off the political agenda and competition shifted from large questions of policy to minor questions of managerial competence To

support this cartel the internal arrangements of parties changed to privilege the party in public office over the party on the ground The unintended consequence has been to stimulate the rise of extra cartel challengers to these cozy arrangements in the form of anti party system parties and populist oppositions on the left but especially on the right Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu The series is edited by Emilie van Haute Professor of Political Science Universit libre de Bruxelles Ferdinand M ller Rommel Director of the Center for the Study of Democracy Leuphana University and Susan Scarrow John and Rebecca Moores Professor of Political Science University of Houston **political science is for everybody** amy l. atchison,2021-02-16 This book is the first intersectionality mainstreamed textbook written for introductory political science courses
