Wolfgang Grisold,Walter Struhal,Thomas Grisold,2019-02-07 Advocacy is a broad term that covers activities aimed at increasing attention awareness information nursing treatment and support to improve the outcome of patients These actions can be focused directly towards patients or indirectly via third parties Although advocacy is present in all medical specialties neurology in particular finds itself in need of strong advocacy tools as the diagnosis treatment long term care and associated resource and social issues have become increasingly complex While some physicians implicitly or explicitly act as advocates there is a lack of holistic research in order to clarify the meaning of advocacy along with concrete methods and strategies Advocacy in Neurology provides an integrated approach to the concept of advocacy in neurology Structured in five sections the book begins by explaining the term advocacy in general before elaborating on the areas of interest within neurology The text goes on to offer concrete strategies and tools for clinicians to deploy advocacy in their daily work and then discusses specific neurological diseases to point out and explain where advocacy is or could be beneficial The book ends with an outlook presentation of results and an ending conclusion Advocacy in Neurology offers a practical perspective on advocacy activities in neurology aiming to show when and why they are important for neurology Ethical Issues in Neurology James L. Bernat,2008 Written by an eminent authority from the American Academy of Neurology s Committee on Ethics Law and Humanities this book is an excellent text for all clinicians interested in ethical decision making The book features outstanding presentations on dying and palliative care physician assisted suicide and voluntary active euthanasia medical futility and the relationship between ethics and the law New chapters in this edition discuss how clinicians resolve ethical dilemmas in practice and explore ethical issues in neuroscience research Other highlights include updated material on palliative sedation advance directives ICU withdrawal of life sustaining therapy gene therapy the very low birth weight premature infant the developmentally disabled patient informed consent organizational ethics brain death controversies and fMRI and PET studies relating to persistent vegetative state *Proceedings of the Commission on the Future Structure of Veterans Health Care*

United States. Commission on the Future Structure of Veterans Health Care,1991 **Clinical Neurology of Aging** Martin Albert, MD, PhD, FAAN,Janice Knoefel, MD, MPH,2011-01-11 Clinical Neurology of Aging Third Edition continues the tradition of the First 1984 and Second 1994 editions with 60 chapters written by the world s elite clinicians from neurology geriatrics and research on all aspects of geriatric neurology Aging does not automatically imply decline Many older people find joy in their friendships and their willingness to look at the world with a calmer view than they may have had in youth

This clinically focused book is designed to help clinicians help older persons maintain that joy Now divided into 9 comprehensive sections the Third Edition contains subjects ranging from geriatric assessment to pain management and palliative care Specific sections include Introduction to Geriatric Neurology Neurological Assessment in Aging Cognitive Disorders in Aging Motor Disorders in Aging Neuropsychiatric Illness in Aging Sensory Disturbance in Aging Peripheral Neurology of Aging Disease States in Elderly and Neurological Therapeutics With a deft touch the editors Drs Martin Albert and Janice Knoefel have incorporated the geriatric care perspective and a quality oriented approach to health care throughout the volume The result the definitive reference useful for all clinicians caring for older people and informative to those who set policies that affect research and clinical practice Neurological Disorders World Health Organization,2006 Although there are several gaps in understanding the many issues related to neurological disorders we know enough to be able to shape effective policy responses to some of the most common This book describes and discusses the increasing public health impact of common neurological disorders such as dementia epilepsy headache disorders multiple sclerosis neuroinfections neurological disorders associated with malnutrition pain associated with neurological disorders Parkinson s disease stroke and traumatic brain injuries It provides information and advice on public health interventions that may reduce their occurrence and consequences and offers health professionals and planners the opportunity to assess the burden caused by these disorders The clear message that emerges is that unless immediate action is taken globally the neurological burden is likely to become an increasingly serious and unmanageable The Practice of Emergency and Critical Care Neurology Eelco F. M. Wijdicks,2024-08 The Practice of Emergency and Critical Care Neurology is the classic and comprehensive reference for physicians caring for patients with critical neurologic disorders at risk of deterioration and in need of immediate attention This third edition is richly illustrated and contains new chapters on the basics of neuroimaging pharmacology issues in the intensive care setting intoxications critical care ultrasound and more The Practice of Emergency and Critical Care Neurology Eelco F. M. Wijdicks, MD, PhD, FACP,2010-06-22 The Practice of Emergency and Critical Care Neurology serves as the definitive authoritative reference on the care of the patient with a critical neurologic disorder at risk of deterioration and in need of immediate attention This work is an expanded new edition of the book on the management of patients with critical neurologic disorders This single authored monograph is broad in scope and follows the patients from the very moment they enter the emergency department to their care in the neurosciences intensive care unit This book condenses the essential information into several sections These are The General Principles of Recognition of Critically Ill Neurologic Patients in the Emergency Department The Evaluation of Presenting Symptoms Indicating Urgency and Critical Emergency General Principles of Management of Critically Ill Patients Monitoring Devices and Diagnostic Tests Complete Management of Specific Disorders in the Neurosciences Intensive Care Unit Postoperative Neurosurgical and Neurointerventional Complications Management of Medical Complications and End of Life Care This accessibly written book differs from the

conventional by specifically following the time course of clinical complexities as they emerge and change. It offers advice on how to diagnose and manage acute neuromuscular respiratory failure, acute worrisome headache, acute febrile confusion, acute diplopia, acute movement disorders, acute paraplegia, seizures, and coma of uncertain cause in the emergency department. The major disorders requiring neurocritical care are covered in great detail and include traumatic brain injury, aneurysmal subarachnoid hemorrhage, cerebral hemorrhage, hemispheric ischemic stroke, basilar artery occlusion, acute bacterial meningitis and encephalitis, myasthenic crisis, and severe Guillain Barre syndrome. This book comes with a pocket book of selected tables and figures. This booklet covers all essential points for quick reference and has been considered a survival guide for the house staff.

Atlas of Clinical Neurology Roger N. Rosenberg, 2019-05-08. Like its preceding editions, this atlas is an indispensable guide to the field of neurology, featuring the most clinically essential images and figures. Chapters offer insight and research written by deeply practiced knowledgeable neurologists, that is supplemented with detailed imagery, tables, algorithms, and delineative drawings. Topics covered include developmental and genetic diseases, neuroendocrine disorders, critical care neurology, cerebrovascular disease, dementias, behavioral neurology, neuro oncology, movement disorders, epilepsy, neuromuscular diseases, infectious diseases, neuroimmunology, neurotoxic disorders, and headache. The authors also delve into specific issues currently prevalent in neuroscientific research, including Alzheimer's disease, dementia, Machado Joseph disease, Huntington's disease, and brain scanning with PET and fMRI. The *Atlas of Clinical Neurology* 4th Edition serves as a comprehensive and premier visual resource for neurologists.

Critical Care Neurology Part II, 2017-01-25. *Critical Care Neurology Part II: Neurology of Critical Illness* focuses on the care specialists and general neurologists that consult in the ICU and their work with patients in acute life-threatening situations who are dealing with neurologic or neurosurgical crises emanating from either a preexisting neurologic syndrome or from a new neurologic complication appearing as a result of another medical or surgical critical illness. These two separate clinical situations form the pillars of neurocritical care; hence, these practices are addressed via two separate but closely related HCN volumes. Chapters in both focus on pathophysiology and management and are tailored for both general neurologists and active neurocritical specialists, with a specific focus on management over diagnostics. Part I addresses the principles of neurocritical care and the management of various neurologic diseases. Part II addresses the interplay between neurologic complications and the surgical, medical, cardiac, and trauma of critical illnesses that most typically present in the ICU. Provides an essential neurocritical care overview for general neurologists. Presents neurocritical care specialists with an update on severe neurological illness management. Offers coverage of all the most frequent neurologic diseases requiring intensive care. Includes chapters authored by global leaders in the field, providing the broadest, most expert coverage available on the topics discussed.

Jose I. Suarez,2004-01-13 An authoritative and comprehensive review of the most important clinical issues facing critically ill neurologic and neurosurgical patients The authors provide pertinent basic clinical diagnostic and management guidelines for all the conditions commonly encountered in the neurocritical care unit including the management of autonomic disorders that require critical care postoperative management and endovascular treatment The authors also discuss the latest developments in the monitoring of different body systems emphasizing the management of

cardiorespiratory complications and other medical conditions that may threaten the patient's life. Also detailed are the concepts of intracranial physiology and current neuromonitoring techniques, subjects whose understanding is basic to effective management of critically ill neurologic patients. Numerous tables, figures, diagrams, and radiographs simplify and explicate both the diagnostic and therapeutic processes.

A Christian from Egypt: Life Story of a Neurosurgeon Pursuing the Dreams for Quintuple Certifications Rhamsis F. Ghaly, 2015-01-23

A CHRISTIAN FROM EGYPT LIFE STORY RAMSIS F GHALY MD FACS

This is my life story as a Coptic Christian born and raised in Egypt in an environment of limited opportunities and scarce resources, especially for Christian minorities. Seeking the promise opportunity, I came to the United States nearly 30 years ago as a young man. As I flew westward on the plane, it did not occur to me that I would become a prominent neurosurgeon with a practice in one of the great cities of America. Nor did I anticipate that I would ever be in a position to fight for save lives and fight for patients' lives, protecting them from the specter of financial greed permeates the health care industry. This book chronicles my journey in America from my early struggles to get past closed doors to my current practice serving the mission set before me with uncompromising zeal and devotion. Eventually, I became a prominent American neurosurgeon among the only 4000 active nationwide and the only one nationally and internationally to achieve five board certifications in five acknowledged medical disciplines. My story takes the reader through my first-hand experiences through the eight health care systems and Chicago's history of neuroscience over the last three decades, providing an in-depth view of the medical practices in the surrounding suburban communities. My book also includes the lessons that I have learned, my personal views, and patient testimonials. What I have faced and seen since my plane landed in this country in 1984 is almost inexpressible. It is my sincere wish that others may find hope and inspiration from my story as well as an understanding of the challenges that the healthcare industry faces today along with my own passion for excellence in neuroscience as I confront them. I owe my success to God, to my cherished parents, my teachers, my mentors, and most importantly, my beloved patients.
