**The Nonprofit Sector in International Perspective** Estelle James, 1989-03-30 Arising as a market induced improvement on existing governmental services and competing with the government for customers and resources nonprofit organizations are a relatively unexplored area of public policy This collection of essays written by scholars from a variety of disciplines adds new dimensions to the theory of nonprofit organizations and describes the public policies regarding nonprofit organizations that do or should exist in both developing and developed countries The contributors consider why governments subsidize such organizations the problems such subsidies create and the role played from an international perspective by religion and other ideological institutions in the founding and managing of nonprofit services Research Division Report , 1976

**Cultural Pedagogy** David Trend, 1992-04-20 In recent years debates over culture and education have entered the public consciousness as never before Politicians bureaucrats and scholars have credited these endeavors with the capacity to influence matters ranging from public morality to national productivity Trend examines points at which art and learning intersect in both traditional and nontraditional settings and offers a variety of alternatives for the construction of a new cultural pedagogy He argues that we need to redefine concepts like art literature and education to integrate them more fully into our lives On one hand Trend uses a critical approach to examine how cultural work and pedagogy intersect within a range of discourses such as Marxist feminist deconstructionist and postcolonial Yet on the other he focuses on the use of specific examples of cultural practice within and outside the classroom to emphasize the importance of action as well as philosophy to bring about social change Trend provides a theoretical overview of the ideological battles over texts and their discursive contexts and then analyzes how cultural education has evolved in such settings as the school the university and the community He concludes with a discussion of pedagogy and democracy which suggests a range of possible resolutions Handbook of the Economics of Art and Culture Victor A. Ginsburgh, David Throsby, 2006-09-13 Over the last 30 or 40 years a substantial literature has grown up in which the tools of economic theory and analysis have been applied to problems in the arts and culture Economists who have surveyed the field generally locate the origins of contemporary cultural economics as being in 1966 the year of publication of the first major work in modern times dedicated specifically to the economics of the arts It was a book by Baumol and Bowen which showed that economic analysis could illuminate the supply of and demand for artistic services the contribution of the arts sector to the economy and the role of public policy Following the appearance of the Baumol and Bowen work interest in the economics of the arts grew steadily embracing areas such as demand for the arts the economic functions of artists the role of the nonprofit sector and other areas Cultural economics also expanded to include the cultural or entertainment industries the media movies the publishing industry popular music as well as heritage and museum management property right questions in particular copyright and the role of new communication technologies such as the internet The field is therefore located at the crossroads of several disciplines economics and management but also art history art philosophy sociology and law The Handbook is placed firmly

in economics but it also builds bridges across these various disciplines and will thus be of interest to researchers in all these different fields as well as to those who are engaged in cultural policy issues and the role of culture in the development of our societies Presents an overview of the history of art markets Addresses the value of art and consumer behavior toward acquiring art Examines the effect of art on economies of developed and developing countries around the world *Who Benefits from the Nonprofit Sector?* Charles T. Clotfelter, 1992-10-15 Over a million nonprofit organizations from day care centers and neighborhood churches to major research universities and metropolitan hospitals are currently relied upon to deliver an array of essential social services This is in keeping with a historical conviction that private voluntary action as opposed to government intervention should address as many of the nation's social needs as possible But just how much to rely on the nonprofit sector is the question at the center of a growing debate Critics challenge the assumption that nonprofit organizations have successfully directed much of their benefits toward the poor and disadvantaged an assumption that has to date justified favorable tax treatment for donations and nonprofit operations *Who Benefits from the Nonprofit Sector* examines all the major elements of the nonprofit sector health services educational and research institutions religious organizations social services arts and cultural organizations and foundations describing each institution and its function and then exploring how their benefits are distributed across various economic classes The book's findings indicate that while few institutions serve primarily the poor there is no evidence of a gross distribution of benefits upwards toward the more affluent The source of an institution's funding is also shown to be an important determinant in how its benefits are distributed They show for example that Nonprofit nursing homes and drug treatment centers have a lower concentration of Medicaid patients than their for-profit public counterparts do Twenty seven percent of social service agencies serve primarily the poor and the large majority of these received most of their income from the federal government The effective educational subsidy i.e. cost of education less tuition per person at both public and private universities increases with income The analysis of this data makes for a book with profound implications for future social and tax policy **Managing Culture** Victoria
