Antimodernism and Artistic Experience Lynda Lee Jessup, 2001-12-15 Antimodernism is a term used to describe the international reaction to the onslaught of the modern world that swept across industrialized Western Europe, North America and Japan in the decades around the turn of the twentieth century. Scholars in art history, anthropology, political science, history and feminist media studies explore antimodernism as an artistic response to a perceived sense of loss, in particular the loss of authentic experience. Embracing the authentic as a redemptive antidote to the threat of unheralded economic and social change, antimodernism sought out experience supposedly embodied in pre-industrialized societies, in medieval communities or oriental cultures in the Primitive, the Traditional or Folk. In describing the ways in which modern artists used antimodern constructs in formulating their work, the contributors examine the involvement of artists and intellectuals in the reproduction and diffusion of these concepts. In doing so they reveal the interrelation of fine art, decorative art, souvenir or tourist art and craft, questioning the ways in which these categories of artistic expression reformulate and naturalise social relations in the field of cultural production.

The Liberation of Painting Patricia Leighton, 2013-11-08 The years before World War I were a time of social and political ferment in Europe which profoundly affected the art world. A major center of this creative tumult was Paris where many avant garde artists sought to transform modern art through their engagement with radical politics. In this provocative study of art and anarchism in prewar France, Patricia Leighton argues that anarchist aesthetics and a related politics of form played crucial roles in the development of modern art, only to be suppressed by war fever and then forgotten. Leighton examines the circle of artists: Pablo Picasso, Juan Gris, František Kupka, Maurice de Vlaminck, Kees van Dongen and others for whom anarchist politics drove the idea of avant garde art, exploring how their aesthetic choices negotiated the myriad artistic languages operating in the decade before World War I. Whether they worked on large scale salon paintings, political cartoons or avant garde abstractions, these artists, she shows, were preoccupied with social criticism. Each sought an appropriate subject, medium, style and audience based on different conceptions of how art influences society, and their choices constantly shifted as they responded to the dilemmas posed by contradictory anarchist ideas. According to anarchist theorists, art should expose the follies and iniquities of the present to the masses, but it should also be the untrammelled expression of the emancipated individual and open a path to a new social order. Revealing how these ideas generated some of modernism's most telling contradictions among the prewar Parisian avant garde, The Liberation of Painting restores revolutionary activism to the broader history of modern art.

Rethinking Race in Modern Argentina Paulina Alberto,Eduardo Elena,2016-03-21 This book reconsiders the relationship between race and nation in Argentina during the twentieth and twenty first centuries and places Argentina firmly in dialog with the literature on race and nation in Latin America from where it has long been excluded or marginalized for being a white European exception in a mixed race region The contributors based both in North America and Argentina hail from the fields of history anthropology and literary and cultural studies Their essays collectively destabilize widespread certainties about Argentina showing that whiteness in that country has more in common with practices and ideologies of Mestizaje and racial democracy elsewhere in the region than has typically been acknowledged The essays also situate Argentina within the well established literature on race nation and whiteness in world regions beyond Latin America particularly other European settler societies The collection thus contributes to rethinking race for other global contexts as well
